*Globalization in 2020* Janet P. Brown,2006 This book presents an analysis of globalisation as it is projected to be in 2020. It is based on a Report of the National Intelligence Council's 2020 Project based on consultations with non-governmental experts around the world.

**Mapping the Global Future** National Intelligence Council (U.S.),2004 Takes a long-term view of the future. Offers a fresh look at how key global trends might develop over the next decade and a half to influence world events. Offers a range of possibilities and potential discontinuities. Builds upon methods used to develop two earlier studies, *Global Trends 2010* and *Global Trends 2015*". Employs a wide variety of innovative methodologies and approaches, including extensive consultations with a wide range of governmental and non-governmental experts. Includes a CD-ROM in a pocket which contains the entire text of the report. National Intelligence Council 2004-13.

*Handbook Of Energy Finance: Theories, Practices And Simulations* Stephane Goutte,Duc Khuong Nguyen,2020-01-30 Modeling the dynamics of energy markets has become a challenging task. The intensification of their financialization since 2004 had made them more complex but also more integrated with other tradable asset classes. More importantly, their large and frequent fluctuations in terms of both prices and volatility, particularly in the aftermath of the global financial crisis 2008-2009, posit difficulties for modeling and forecasting energy price behavior and are primary sources of concerns for macroeconomic stability and general economic performance.This handbook aims to advance the debate on the theories and practices of quantitative energy finance while shedding light on innovative results and technical methods applied to energy markets. Its primary focus is on the recent development and applications of mathematical and quantitative approaches for a better understanding of the stochastic processes that drive energy market movements. The handbook is designed for not only graduate students and researchers but also practitioners and policymakers.

*Shaping Tomorrow's World* Elke Seefried,2024-05-01 Shaping Tomorrow's World tells the crucial story of how futures studies developed in West Germany, Europe, the US and within global futures networks from the 1940s to the 1980s. It charts the emergence of different approaches and thought styles within the field ranging from Cold War defense intellectuals such as Herman Kahn to critical peace activists like Robert Jungk. Engaging with the challenges of the looming nuclear war, the changing phases of the Cold War, '1968', and the growing importance of both the Global South and environmentalism, this book argues that futures scholars actively contributed to these processes of change. This multiple award-winning study combines national and transnational perspectives to present a unique history of envisioning, forecasting, and shaping the future.

The Future of Learning Playbook John Bessant,Olga Kokshagina,Kyriaki Papageorgiou,2023-11-20 Learn about the future of CIE learning and how to build your capacity to design an innovative and creative learning landscape. Whether you are a student who wants to learn and acquire new capabilities for Creativity, Innovation and Entrepreneurship (CIE), a teacher or lecturer trying to pass on the skills and capabilities of CIE to a new generation, or an industry professional responsible for skills development as part of a talent management strategy, learn how to create a supportive and useful learning environment for the future world of CIE. The Future of Learning Playbook provides a rich set of easy-to-use canvases, specific examples, and invites readers to begin a journey of reflection to design their own futures. In an easily accessible and visually appealing way, De Gruyter playbooks offer practical concepts for improving business performance. They are an extremely valuable resource for a wide range of business professionals.

**Energy and Emissions Markets** Tom James,Peter C. Fusaro,2011-08-24 Written by best selling author Peter C. Fusaro and renowned energy market expert and commentator Tom James, this book demonstrates that the forces of energy and environmental issues are linked more than ever before. The beginning of European emissions trading in 2005 and the implementation of the Kyoto protocol have accelerated efforts already underway in the US to use market forces to remediate environmental issues. Topics such as emissions trading, renewable energy trading, the fourth dimension in energy trading, and new outcomes on green project finance will be analyzed in this book.

**Shaping the Next One Hundred Years** Robert J. Lempert,2003-07-18 A sophisticated reader ought to view with great skepticism the prospect of answering questions about the long-term future. The checkered history of predicting the future-from the famous declarations that humans would never fly to the Limits to Growth study to claims about the New Economy-has dissuaded policymakers from considering the effects of their decisions more than a few months or years ahead. However, today's choices will significantly influence the course of the twenty-first century. New analytic methods, enabled by modern computers, may transform our ability to reason systematically about the long term. This report reviews traditional methods of grappling with the morrow, from narratives to scenario analysis, which fail to address the multiplicity of plausible long-term futures. The authors demonstrate a quantitative approach to long-term policy analysis (LTPA). Robust decision methods enable decisionmakers to examine a vast range of plausible futures and design near-term, often adaptive, strategies to be robust across them. Reframing the question What will the long-term future bring? as How can we choose actions today that will be consistent with our long-term interests? these methods provide powerful analytic support to humans' innate capacity for what-if-ing. Choosing the challenge of sustainable development as an example, the authors discuss how these methods may be applied to real-world LTPA and a wide range of other challenges of decisionmaking under conditions of deep uncertainty.

*Global Standard Setting in Internet Governance* Alison Harcourt,George Christou,Seamus Simpson,2020-01-31 The book addresses representation of the public interest in Internet standard developing organisations (SDOs). Much of the existing literature on Internet governance focuses on international organisations such as the United Nations (UN), the Internet Governance Forum (IGF) and the Internet Corporation for Assigned Names and Numbers (ICANN). The literature covering standard developing organisations has to date focused on organisational aspects. This book breaks new ground with investigation of standard development within SDO fora. Case studies centre on standards relating to privacy and security, mobile communications, Intellectual Property Rights (IPR) and copyright. The book lifts the lid on internet standard setting with detailed insight into a world which, although highly technical, very much affects the way in which citizens live and work on a daily basis. In doing this it adds significantly to the trajectory of research on Internet standards and SDOs that explore the relationship between politics and protocols. The analysis contributes to academic debates on democracy and the internet, global self-regulation and civil society, and international decision-making processes in unstructured environments. The book advances work on the Multiple Streams Framework (MS) by applying it to decision-making in non-state environments, namely SDOs which have long been dominated by private actors. The book is aimed at academic audiences in political science, computer science communications and science and technology studies as well as representatives from civil society, the civil service, government, engineers and experts working within SDO fora. It will also be accessible to students at the postgraduate and undergraduate levels.

**A Holistic Approach to Ship Design** Apostolos Papanikolaou,2021-06-21 This book deals with modern Computer-Aided Design (CAD) software tools and platforms implemented in ship design, the integration of techno-economic databases, the use of optimisation and simulation software tools, which are integrated in these platforms, and the virtual modelling of ships and their operation by using a Virtual Vessel Framework (VVF). It contains a series of application case studies related to the developed holistic approach to ship design and operation. Nine case studies are described, referring to the design and operation of various ship types, namely RoPax, cruise ship, double-ended ferry, bulk carrier, containership, offshore support vessel, ocean surveillance ship and research vessel and one offshore structure. All case studies are driven by leading representatives of the European Maritime Industry. This book complements A Holistic Approach to Ship Design, volume 1, which covers methods and tools for the life cycle optimisation and assessment of ship design and operation.
