A National Security Staff for the 21st Century Jack A. LeCuyer,2012 Our

legacy 1947/1989 national security system is unsuited for the dynamic and complex global security environment that has developed since the end of the Cold War. Over time, the National Security Council has evolved from the very limited advisory group initially imagined by President Truman to that of a vast network of interagency groups that were developed since 1989. These interagency groups view themselves as deeply involved in integrating policy development, crisis management, and staffing for the President. However, the National Security Staff (NSS) and the national security system are relics of the industrial age -- vertical stovepipes -- in an age that demands that the management of the national security system be conducted at the strategic level. What is required is a true national security strategy based on ends, ways, and means; the alignment of resources with integrated national security missions; and the assessment and accountability of management functions that should be performed by a properly resourced NSS unburdened from the urgency of the 24/7 news cycle. The President's National Security Strategy of May 2010 calls for reform in many of these areas. Section 1072 of the 2012 Defense Authorization Act calls upon the President to outline the changes and resources that are needed in both the executive branch and in Congress to implement his national security strategy. The President's response to this legislative mandate can and should be the first step in a strategic partnership for transforming our national security system, in both the executive branch and the Congress, to that of a system that can meet and anticipate the challenges and opportunities for ensuring our security and well-being.

Trade, Inequality and Justice: Toward a Liberal Theory of Just Trade Law Frank Garcia,2021-10-25 Recent crises in trade policy and globalization highlight both the problematic role of economic inequality in international trade law and the shortcomings of contemporary, largely economic, approaches to this problem and to international trade law generally. This book argues for an alternative approach to the problem of trade and inequality, as a problem of justice. Drawing on political and moral theory and legal philosophy, the author develops a Rawlsian model for justice as fairness in international trade law. This model highlights the important normative role of the principle of special and differential treatment, which can justify economic inequality by making the wealthy markets of developed states work to the benefit of smaller economies, thus satisfying the difference principle as applied to international economic relations. Applying this model to contemporary trade law, the author offers concrete proposals for modifying existing special and differential treatment doctrine, and suggests "second generation" policies for the problem of inequality once special and differential treatment is either fully implemented or rendered obsolete. Published under the Transnational Publishers imprint.

European Socialists Respond to Fascism: Ideology, Activism and Contingency in the 1930s Gerd-Rainer Horn, 1996-11-21 Based on documents collected in six European countries, European Socialists Respond to Fascism: Ideology, Activism and Contingency in the 1930s is a transnational study of largely parallel developments in Austria, Belgium, France, Germany, and Spain in the years 1933-1936. Triggered into action by the shock effect of the Nazi rise to power in Germany, socialists throughout Western Europe entered an unusually active period of practical reorientation and debate over political strategy which helped determine the contours of European politics up to the outbreak of World War II and beyond. Stressing the transnational dimension of this process while simultaneously integrating local, regional, and national factors, this work finds that it was social democracy, rather than communism, that acted as the primary vehicle for radical change among European marxists during the 1930s. Following major figures within the European left and the significant events that made up the inter-war period, Gerd-Rainer Horn demonstrates the interconnectedness of Europe's interwar socialists. Finally, Horn manages to relate these findings to the ongoing interdisciplinary debate on structure, agency, and contingency in the historical process.
