How Racism Takes Place George Lipsitz,2011-03-11 How racism shapes urban spaces and how African Americans create vibrant communities that offer models for more equitable social arrangements.

The Compact City Elizabeth Burton,Mike Jenks,Katie Williams,2003-09-02 This book presents the latest thinking on the benefits and dangers of higher density urban living. It offers diverse opinions and research, from a wide range of disciplines, and gives an insight into both the theoretical debate and the practical challenges surrounding the compact city. Essential reading for anyone with an interest in sustainable urban development.

Achieving Sustainable Urban Form Elizabeth Burton,Mike Jenks,Katie Williams,2013-07-04 Achieving

Sustainable Urban Form represents a major advance in the sustainable development debate. It presents research which defines elements of sustainable urban form - density, size, configuration, detailed design and quality - from macro to micro scale. Case studies from Europe, the USA and Australia are used to illustrate good practice within the fields of planning, urban design and architecture.

Sustainable Communities Hugh Barton, 2013-12-02 'This book re-addresses the concepts of neighbourhood and community in a refreshing and challenging way. It will be of immense benefit, not only to town planners but also to all those professional and voluntary groups and politicians who seek to create the new communities of tomorrow' From the Foreword by Jed Griffiths, Past President of the Royal Town Planning Institute. There is widespread support for the principle of creating more sustainable communities, but much hazy, wishful-thinking about what this might mean in practice. In reality, we witness more the death of local neighbourhoods than their creation or rejuvenation, reflecting an increasingly mobile, privatized and commodified society. Sustainable Communities examines the practicalities of re-inventing neighbourhoods. It is neither an idealistic, utopian tract nor a designer's manual, but is, rather, a serious attempt to address the real issues. This collection of expert contributions: * examines the nature of local community and methods of building social capital * presents the findings of a world-wide survey of eco-neighbourhoods and eco-villages with case studies from the United Kingdom, Europe, America and Australia * develops a fresh perspective on the planning and design of neighbourhoods in urban areas, based on the eco-system approach * explores practical programmes for local resource management and the implications for community-based decision-making * provides a detailed appendix listing current eco-village and eco-neighbourhood schemes by country Written by an interdisciplinary team of social and environmental scientists, town planners and urban designers, this is a thought-provoking and important contribution to both the theory and practice of the development of sustainable communities.

Home from Nowhere James Howard Kunstler, 1998-03-26 In his landmark book *The Geography of Nowhere* James Howard Kunstler visited the tragic sprawlscapes of cartoon architecture, junked cities, and ravaged countryside America had become and declared that the deteriorating environment was not merely a symptom of a troubled culture, but one of the primary causes of our discontent. In *Home from Nowhere* Kunstler not only shows that the original American Dream -- the desire for peaceful, pleasant places in which to work and live -- still has a strong hold on our imaginations, but also offers innovative, eminently practical ways to make that dream a reality. Citing examples from around the country, he calls for the restoration of traditional architecture, the introduction of enduring design principles in urban planning, and the development of public spaces that acknowledge our need to interact comfortably with one another.
