Methods of Soil Analysis, Part 4 Jacob H. Dane, Clarke G. Topp, 2020-05-27 The best single reference for both the theory and practice of soil physical measurements, Methods, Part 4 adopts a more hierarchical approach to allow readers to easily find their specific topic or measurement of interest. As such it is divided into eight main chapters on soil sampling and statistics, the solid, solution, and gas phases, soil heat, solute transport, multi-fluid flow, and erosion. More than 100 world experts contribute detailed sections.

Video Data Management and Information Retrieval Sagarmay Deb, 2005-01-01 This book combines the two important areas of research within computer technology and presents them in comprehensive, easy to understand manner. Ideal for graduates and under-graduates, as well as researchers working in either video data management or information retrieval, it takes an in depth look at many relevant topics within both video data management and information retrieval. The Nature of Magmatism in the Appalachian Orogen A. Krishna Sinha, Joseph Bruce Whalen, John P. Hogan, 1997-01-01 The thermal evolution of mountain belts is recorded in the distribution, origin and ages of magmatism. In this volume, petrologic, isotopic and geochemical evidence is presented to

highlight the contribution of igneous rocks to the evolution of the Appalachian Orogen in both Canada and the United States. These papers emphasize the use of modern geochemical and petrologic data to discriminate the sources yielding magmas, and thus the nature of the crust and mantle.

Process Modelling Bernd Scholz-Reiter, Hans-Dietrich Stahlmann, Arnim Nethe, 2012-12-06 A process model is very often used for system analysis, design and management in various application areas. Using a process model has the advantage that it has only to be as precise as necessary within the parameters of the individual field of application, whereas the precision externally is less important. This makes process modeling easier and open for structuring. The contributions deal with different approaches to process modelling, especially in the areas of business process modelling, logistics and production processes and water systems.

30th Anniversary Edition Dek Terrell, Daniel Millimet, 2012-12-17 The 30th Volume of *Advances in Econometrics* is in honor of the two individuals whose hard work has helped ensure thirty successful years of the series, Thomas Fomby and R. Carter Hill.

High-temperature Metamorphism and Crustal Anatexis J.R. Ashworth, M. Brown, 2012-12-06 This second volume in the new series produced by the Mineralogical Society is concerned with the study of rocks from the deep continental crust. It is, we hope, timely to summarize recent petrological advances contributing to this field of active interest. Based mainly on review papers read at a conference, the chapters have subsequently been revised and expanded, while the editors have produced an introductory overview as Chapter 1. The conference was the Winter Meeting of the Mineralogical Society on 15 December 1988, at which Prof. R. C. Newton delivered the 20th Hallimond Lecture of the Society (which forms the basis of Ch. 7). The editors are grateful to all who contributed to the smooth running of the meeting at Kingston Polytechnic, and in the ensuing preparation of the volume: in particular, we sincerely thank all of the following for their labours as referees: A. J. Baker, L. M. Barron, M. J. Bickle, A. D. Chambers, J. D. Clemens, J. S. Daly, G. T. R. Droop, C. R. L. Friend, E. S. Grew, S. L. Harley, R. S. Harmon, N. B. W. Harris, B. Harte, T. J. B. Forest Politics in Kenya's Tugen Hills Léa Lacan, 2024-07-02 Forests are a changing environment, impacted as much by people and politics as by the species-rich diversity they contain. This book explores human-sylvan relations in the Katimok forest, Baringo highlands, Kenya, and asks us to rethink the forest beyond questions of access and control of natural resources, as a habitat where forest politics and human lives are inextricably intertwined. Tracing the development of the Katimok

forest from colonial times to the present day, the author shows how - as with many forests in Africa - it has become constructed as a category and territory of nature under state control: an area both to be protected and turned into exploitable resources. For those living within and on the boundaries of the forest, this social-ecological transformation has had a significant impact. Despite now being settled outside Katimok itself, dispossessed by administrators heedless of local management practices, many former residents continue to maintain a close connection with the forest, not only to sustain their livelihoods, but also to maintain their intimate links with ancestral lands, where their stories and memories are materially inscribed and powerfully invoked. Intimate connections to the forest are revealed to be as political as the use of its resources, culminating in local claims for redress of historical dispossession.

Radiocarbon Dates, Stone Tools and the Origin of Herding on the West Coast of South Africa Karim Sadr, 2014-08-12 This monograph makes a significant contribution to answering some long standing questions in the Later Stone Age prehistory of southern Africa and to archaeological methods in general. The Vredenburg Peninsula Survey project originally set out to confirm that the first herders at the south-western Cape were immigrant Khoekhoe-speakers who had migrated from farther north about two thousand years ago. It failed to find evidence to support this hypothesis and instead ended up making a solid contribution to documenting the regional transition from formal, microlithic technology to the informal stone tool repertoire that marks the immediately Pre-Colonial period. It also throws light on another regional question concerning the rise and fall of stone adze technology. Its contribution to survey methodology is of worldwide importance and this is the first time an archaeologist has gambled on dating surface shell on a large scale and it has paid off handsomely. Coastal archaeologists on all continents should take note of this, and be rightly encouraged.

Rock Properties of Different Metamorphism Facies of Eastern Fennoscandia Feliks F. Gorbatshevich, Olga M. Trishina, Mikhail V. Kovalevskiy, 2023-01-17 This book explores the elastic-anisotropic properties of rocks from the Matert suite of the Pechenga complex, the Kola superdeep well (SG-3), the Finnish Outokumpu well, massifs in the vicinity of the Tuloma River and Lake Chudzyavr, and xenoliths from the explosion pipe (Elovy Island). It shows that velocity and density increase from prehnite-pumpelliite to granulite facies, while the anisotropy of rocks also increases with the deepening of the degree of metamorphic transformations. The book also details an acoustopolariscope that can be used not only to determine elastic properties of rock samples, but to control anisotropic alloys, plastics, ceramics, natural minerals, and gemstones.

Frontiers in Physics - 2017 & 2018 Editor's Choice Thomas Beyer, Ewald Moser, Dieter W. Heermann, Christian F. Klingenberg, James Sauls, José W. F. Valle, Jan de Boer, Emilio Elizalde, Dumitru Baleanu, Alex Hansen, Nicholas X. Fang, Lorenzo Pavesi, Bretislav Friedrich, Christine Charles, Matjaž Perc, Jasper Van Der Gucht, Rudolf von Steiger, Claudio Bogazzi, 2019-02-22 Launched in 2013, Frontiers in Physics consists of 18 specialties covering all areas of research in physics. With over 500 published manuscripts, the journal is now indexed in SCIE with the first impact factor coming in 2019. Frontiers in Physics aims to become the largest and most cited open access multidisciplinary physics journal. This eBook collects what the Specialty Chief Editors of the journal believed were the most interesting manuscripts published over the past two years. It is a nice collection, which will offer the reader the chance to have a quick overview of the specialties of the journal and offer a glimpse into the state of the art of physics. We must confess that it has been quite challenging to select only one article per specialty section given the many important manuscripts published by the journal in 2017 and 2018. We invite our reader to have a look at the journal homepage and browse what we have published so far. It includes articles on topics very different from each other, written by both early career scientists and well-known researchers, ranging from the indisputable advance of the field to the more bold. We hope you enjoy reading our first edition of the Frontiers in Physics Editor's Choice eBook! Professor Alex Hansen (Field Chief Editor) and Dr Claudio Bogazzi (Journal Manager)

Reactive Transport in Porous Media Peter C. Lichtner, Carl I. Steefel, Eric H. Oelkers, 2018-12-17 Volume 34 of Reviews in Mineralogy focuses on methods to describe the extent and consequences of reactive flow and transport in natural subsurface systems. Since the field of reactive transport within the Earth Sciences is a highly multidisciplinary area of research, including geochemistry, geology, physics, chemistry, hydrology, and engineering, this book is an attempt to some extent bridge the

gap between these different disciplines. This volume contains the contributions presented at a short course held in Golden, Colorado, October 25-27, 1996 in conjunction with the Mineralogical Society of America's (MSA) Annual Meeting with the Geological Society of America in Denver, Colorado.

Road and Off-Road Vehicle System Dynamics Handbook Gianpiero Mastinu, Manfred Ploechl, 2014-01-06 Featuring contributions from industry leaders in their respective fields, this volume presents comprehensive, authoritative coverage of all the major issues involved in road vehicle dynamic behavior. It begins with a short history of road and off-road vehicle dynamics followed by thorough, detailed state-of-the-art chapters on modeling, analysis and optimization in vehicle system dynamics, vehicle concepts and aerodynamics, pneumatic tires and contact wheel-road/off-road, modeling vehicle subsystems, vehicle dynamics and active safety, man-vehicle interaction, intelligent vehicle systems, and road accident reconstruction and passive safety.
