Recognition and Enforcement of Foreign Arbitral

Awards George A. Bermann, 2017-07-17 This book examines how the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, commonly known as The New York Convention, has been understood and applied in [insert number] jurisdictions, including virtually all that are leading international arbitration centers. It begins with a general report surveying and synthesizing national responses to a large number of critical issues in the Convention's interpretation and application. It is followed by national reports, all of which are organized in accordance with a common questionnaire raising these critical issues. Following introductory remarks, each report addresses the following aspects of the Convention which include its basic implementation within the national legal system; enforcement by local courts of agreements to arbitrate (including grounds for withholding enforcement), recognition and enforcement of foreign awards by local courts under the Convention (including grounds for denying recognition and enforcement), and essential procedural issues in the courts' conduct of recognition and enforcement. Each report concludes with an overall assessment of the Convention's interpretation and application on national territory and recommendations, if any, for reform. The New York Convention was intended to enhance the workings of the international arbitral system, primarily by ensuring that arbitral awards are readily recognizable and enforceable in States other than the State in which they are rendered, subject of course to certain safeguards reflected by the Convention's limited grounds for denying recognition or enforcement. It secondarily binds signatory states to enforce the arbitration agreements on

the basis of which awards under the Convention will be rendered. Despite its exceptionally wide adoption and its broad coverage, the New York Convention depends for its efficacy on the conduct of national actors, and national courts in particular. Depending on the view of international law prevailing in a given State, the Convention may require statutory implementation at the national level. Beyond that, the Convention requires of national courts an apt understanding of the principles and policies that underlie the Convention's various provisions. Through its in-depth coverage of the understandings of the Convention that prevail across national legal systems, the book gives practitioners and scholars a much-improved appreciation of the New York Convention "on the ground."

International Arbitration in Italy Massimo V. Benedettelli, 2020-12-09 Arbitrating cross-border business disputes has been common practice in Italy since centuries. It is no wonder, then, that Italian arbitration law and jurisprudence are ample and sophisticated. Italian courts have already rendered thousands of judgments addressing complex problems hidden in the regulation of arbitration. Italian jurists have been among the outstanding members of the international arbitration community, starting from when back in 1958, Professor Eugenio Minoli was among the promoters of the New York Convention. Being Italy the third-largest economy in the European Union and the eighth-largest economy by nominal GDP in the world, it also comes as no surprise that Italian companies, and foreign companies with respect to the business they do in the Italian market, are among the main 'users' of international arbitration, nor that Italy is part to a network of more than 80 treaties aimed to protect inbound and outbound foreign direct investments and being the ground for investment arbitration cases. Moreover, in recent years, Italy has risen to prominence as a neutral arbitral seat, in particular for the settlement of 'intra-Mediterranean' disputes, also thanks to the reputation acquired by the Milan Chamber of Arbitration which has become one of the main European arbitral institutions. This book is the first commentary on international arbitration in Italy ever written in English. It is

an indispensable tool for arbitrators, counsel, experts, officers of arbitral institutions and judges who happen to be involved in arbitral proceedings or arbitration-related court proceedings somewhat linked to the Italian legal system, either because Italy is the seat of the arbitration, the Italian jurisdiction has been ousted by a foreign-seated arbitration, the assistance of Italian courts is sought for the granting of interim measures or the enforcement of a foreign award or the arbitration results from a multilateral or bilateral investment protection treaty to which Italy is a party. This book may also be of general interest for scholars and practitioners of international arbitration at large to the extent that it deals with the ‘theory’ of international arbitration and illustrates original solutions offered by Italian arbitration law to various complex issues, such as: the potential conflicts (and required balance) between party autonomy and State sovereignty in the governance of arbitrations; the relationship between the New York Convention and the legal system of the State of the arbitral seat; the potential impact on cross-border arbitrations of insolvencies, human rights, or European Union law; the arbitrability of corporate disputes; the extension of arbitration agreements to ‘necessary parties’. Appendixes include an English translation of the main provisions of Italian law relevant to arbitration, a list of the investment protection treaties to which Italy is a party, and an English version of the Rules of Arbitration of the Milan Chamber of Arbitration. The author, who is full professor of international law, name partner of ArbLit (the first Italian boutique focusing on cross-border dispute settlement) and the current Italian member of the ICC Court of Arbitration, has written the book aiming to combine his academic background with his long-standing experience as counsel and arbitrator.

Doing Business 2012 World Bank,2011-10-18 Ninth in a series of annual reports comparing business regulations in 183 economies, Doing Business 2012 measures regulations affecting 11 areas of everyday business activity: starting a business dealing with construction permits employing workers registering property getting credit protecting investors paying taxes trading across borders enforcing contracts closing a business getting electricity The report updates all indicators as of June 1, 2011, ranks countries on their overall ease of doing business, and analyzes reforms to business regulation identifying which countries are strengthening their business environment the most. Doing Business 2012 includes a new set of indicators on the time, steps, and cost for a private business to get an electricity connection. The data on connection services can inform utilities, regulators and governments seeking to strengthen the performance of the electricity sector. Drawing on a now longer time series, this year's report introduces a measure to illustrate how the regulatory environment for business has changed in each economy since Doing Business 2006 was published in 2005. A new distance to frontier measure complements the aggregate ranking on the ease of doing business, which benchmarks each economy's current performance on the indicators against that of all other economies in the sample for a given year. A fundamental premise of Doing Business is that economic activity requires good rules that are transparent and accessible to all. Such regulations should be efficient, striking a balance between safeguarding some important aspects of the business environment and avoiding distortions that impose unreasonable costs on businesses. Where business regulation is burdensome and competition limited, success depends more on whom you know than on what you can do.

But where regulations are relatively easy to comply with and accessible to all who need to use them, anyone with talent and a good idea should be able to start and grow a business in the formal sector. The Doing Business report, which was started in 2003, has become one of the key ways in which the bank and other observers gauge business climate within developing countries... -- The Financial Times [Doing Business started] as a way to encourage countries to reduce obstacles to entrepreneurship. Developing countries compete to land a spot on the top 10 list of most-improving countries because it is seen as a way to get attention and investment. -- The Wall Street Journal [Doing Business] has succeeded in putting the issue of business red tape on the international political agenda. -- The Economist

Banking and Beyond Caterina Cruciani, Gloria

Gardenal, Elisa Cavezzali, 2021-08-28 This book explores the evolution of the banking sector and the financing tools it fosters, addressing the impact of new regulations and the ensuing opportunities for financial institutions, firms, and individuals. Written in two parts, the project includes papers presented at the 2019 Annual Conference of the Wolpertinger Club - The European Association of University Teachers in Banking and Finance. The first part addresses the impact of policy changes on banks and financial institutions, particularly the impact of recent changes in European policy. The authors explore how policy has been, and is, communicated and how it shapes new incentives and challenges for the banking sector and institutional and individual investors. The book touches upon the debate on the 'bail-in' vs 'bail-out' options and reviews new opportunities for investors on covered and subordinated bond markets in Europe, covering the new regulatory structure provided by the European authorities. The second part explores new financing tools besides the traditional

banking sector available to firms and individuals, examining financing options for firms and individuals, and describing the role that alternative capital-market tools such as mini bonds and crowdfunding are playing within the landscape of SME financing. Arguing that financing decisions can ultimately affect the survival rate of startups, this edited collection will be valuable to those researching both finance and business, but particularly to those studying banking, financial institutions and entrepreneurial finance.

Leading Arbitrators' Guide to International Arbitration - Third Edition Lawrence W. Newman,Richard D. Hill,2014-04-01 The Leading Arbitrators' Guide to International Arbitration Third Edition offers thoughtful advice and insights into the world of international arbitration from some of the most prominent and experienced international arbitrators in the world. The contributors are arbitrators from Australia, Belgium, Canada, Chile, Denmark, England, France, Germany, Italy, The Netherlands, Italy, Spain, Sweden, Switzerland and the USA. The contributors offer insights and advice on the way in which international arbitrations are carried out from the point of view of arbitrators reading pleadings and memorials and listening to witnesses and hearing arguments. The authors' discussions are intended to be thoughtful, insightful and useful - and perhaps, occasionally, iconoclastic. As a result, there may be instances in which the authors disagree with one another on certain points. This is to be expected for there are often many routes that can be taken to achieve a result. The book will be useful not only to persons who may serve as arbitrators in international arbitral proceedings but also to those who may, in their position as advocates, wish to persuade persons -- including, perhaps, the authors.

13 abstieg zur hölle es ist
spannend actionreiche und
fesselnde untersuchung alle
register herausgezogen sind
nichts unversucht gelassen
und was sie entdecken ist
schrecklich und grausam
aber es hebt schließlich die
deckung von schuld und
schmerz auf und bringt
erleichterung und die
fähigkeit zu trauern und
loszulassen
