Qasem, 2014-08-01 Presenting a new Teaching Arabic as a Foreign Language (TAFL) curriculum that can be used in secondary and postsecondary educational settings, *Kalima wa Nagham* (Volume I) is a textbook that uniquely and simultaneously introduces Modern Standard Arabic (MSA) and salient aspects of Educated Spoken Arabic (ESA) to beginning language students. At the core of the textbook are dialogues that present students and teachers with examples of Arabic grammatical concepts and important cultural aspects, as well as related vocabulary. These are supplemented by drills and activities that can be used in a classroom setting or pursued individually. Dialogues, pronunciation and listening drills, and charts to accompany the lessons are available on the UT Press website. This volume is student-centered in content and methodology, which will enable learners to meet and exceed linguistic and cultural proficiency expectations.

Frontiers of Nuclear Medicine/Aktuelle Nuklearmedizin Wolfgang Horst, 2012-12-06 That nuclear medicine has advanced so far and so fast is due in no small measure to GEORGE VON HEVESY. His work on radioactive indicator technique laid the foundation on which this young branch of medicine was able to develop in the decade which followed World War II. In the intervening years the second generation has grown up in nuclear medicine. Some of them were still exposed to VON HEVESY'S influence, for instance, his address to the 1957 meeting of the Italian Society of Nuclear Medicine in Turin, or his Marie Curie Memorial Lecture at the Pittsburg meeting of the North American Society of Nuclear Medicine in 1961. Others again will remember that he helped to found the European Society of Nuclear Medicine in 1962-1963 and became its honorary president. It was VON HEVESY who, together with HEILMEYER, insisted that this be a completely open society, having neither national nor geographical attributes, its Europeanness being reflected in the variety of languages spoken at its congresses. Its members exhibited a similar variety, including in addition to those medically qualified -specialists in internal medicine, radiologists and laboratory research workers-physicists, chemists and engineers. A group of young second-generation scientists from eleven countries have dedicated these papers to the memory of the great pioneer of nuclear medicine. This book contains new results reported by doctors, physicists, chemists and computer specialists-results so far-ranging as to push the frontiers of nuclear medicine still further forward.
