John Mighton, JUMP Math

JUMP at Home Grade 1 John Mighton, 2010-06-01

John Mighton's JUMP program is changing the way math is taught, and his powerful math workbooks give children the tools they need to master this crucial subject. The key is a step-by-step teaching method that isolates and describes concepts so clearly that anyone can understand them: students build on their successes, becoming proficient at solving problems with confidence and enthusiasm. Now, parents and caregivers can bring the JUMP program home. These workbooks follow the current student worksheets used by JUMP tutors and classroom teachers, including: an introduction for parents and caregivers that clearly explains the thinking behind the program and provides hours of activities, worksheets carefully designed to enable children to move from one success to the next, a glossary of math terms, and a selected answer key.

JUMP Math 8. 2 John Mighton, 2009-11 Jump math was founded in the belief that all children, even those who have traditionally struggled at school, can learn mathematics. The JUMP Math student assessment & practice books are meant to be used in conjunction with the extensive teacher resources to enable students to practice and explore subtle variations on the lessons and to enable teachers to rapidly assess progress. For each lesson, there is a clear and highly effective lesson plan, which enables teachers to accomplish the seemingly impossible task of teaching to the whole class while tailoring to individual needs. Each lesson is carefully designed to generate deep, subtle, transferable mastery of key concepts. Lesson plans include ideas for contextualizing the math, questions and tasks that allow students to discover mathematical concepts, games, activities, and innovative extension questions that keep fast students engaged and learning while teachers help others to master the key objectives.

The Myth of Ability John Mighton, 2003-05-01 John Mighton's revolutionary bestselling guide to how every child can learn math through his groundbreaking JUMP program. A student in a remedial class who couldn't count by twos is now in an academic program a year ahead of her grade level. An entire Grade 3 class, including so-called slow learners, scores over 90% on a Grade 6-7 math test. These are just two of mathematician John Mighton's many success stories since he started JUMP (Junior Undiscovered Math Prodigies), a not-for-profit organization providing free math tutoring for elementary-level students from low income homes. In *The Myth of Ability* John Mighton tells JUMP's fascinating story and explains its teaching method with lots of simple examples.
