Trustworthy Ubiquitous Computing Ismail Khalil,Teddy Mantoro,2012-09-13 Trustworthy Ubiquitous Computing covers aspects of trust in ubiquitous computing environments. The aspects of context, privacy, reliability, usability and user experience related to "emerged and exciting new computing paradigm of Ubiquitous Computing", includes pervasive, grid, and peer-to-peer computing including sensor networks to provide secure computing and communication services at anytime and anywhere. Marc Weiser presented his vision of disappearing and ubiquitous computing more than 15 years ago. The big picture of the computer introduced into our environment was a big innovation and the starting point for various areas of research. In order to totally adopt the idea of ubiquitous computing several houses were build, equipped with technology and used as laboratory in order to find and test appliances that are useful and could be made available in our everyday life. Within the last years industry picked up the idea of integrating ubiquitous computing and already available products like remote controls for your house were developed and brought to the market. In spite of many applications and projects in the area of ubiquitous and pervasive computing the success is still far away. One of the main reasons is the lack of acceptance of and confidence in this technology. Although researchers and industry are working in all of these areas a forum to elaborate security, reliability and privacy issues, that resolve in trustworthy interfaces and computing environments for people interacting within these ubiquitous environments is important. The user experience factor of trust thus becomes a crucial issue for the success of a UbiComp application. The goal of this book is to provide a state the art of Trustworthy Ubiquitous Computing to address recent research results and to present and discuss the ideas, theories, technologies, systems, tools, applications and experiences on all theoretical and practical issues.

Zombie J.R. Angelella,2012-06-05 A zombie-obsessed teenager has his own way of navigating high school and family dysfunction in this "crazy, wicked, knockout of a book" (Garth Stein, author of The Art of Racing in the Rain). High school may be hell. But for fourteen-year-old Jeremy Barker, hell doesn't end when the bell rings. His pill-addicted mother, sex-addicted brother, and mostly-absentee Vietnam-vet father aren't much of an improvement over the bullies at his all-boys Catholic school. He stays sane by watching movies. Zombie movies, to be exact, that provide a useful code of survival: avoid contact, keep quiet, forget the past, lock-and-load, and fight to survive. His father's also a fan, and watching zombie flicks together is their one way of father-son bonding. But even the wildest movie can't prepare Jeremy for the day his English teacher slips his dad a DVD in the school parking lot—a home DVD of a macabre, ritual surgery. Jeremy's father won't say why he has the movie, or whether the gruesome spectacle is real. When his father disappears from the house yet again, Jeremy decides to investigate. Twisted, fast-paced, and hilarious, this coming-of-age novel is a brand-new take on growing up in a world full of people who don't understand you—whether those people are your ninth-grade classmates or a horde of slavering zombies.
