Race and Labor Matters in the New U.S. Economy Manning Marable,Immanuel Ness, Professor, Brooklyn College, City University of New York,Joseph Wilson,2006-05-25 In this powerful new work, Marable, Ness, and Wilson maintain that contrary to the popular hubris about equality churned out by the capitalist class, race is entrenched and more divisive than any time since the Civil Rights Movement. Race and Labor Matters in the New U.S. Economy asserts that all advances in American race relations have only evolved through conflict and collective struggle. The foundation of the class divide in the United States remains, while racial and ethnic segregation, privilege, and domination, and the institution of neoliberalism have become a detriment to all workers.remains, while racial and ethnic segregation, privilege and domination, and the institution of neoliberal policies are a detriment to all workers.

The Charlie Book Diana Bowman, 2016-10-13 Homeless kids of all ages exist in every community, but few realize this. Because of their invisibility, the needs of these kids, a population of over 3 million, go largely unmet. The Charlie Book not only offers a range of ways ordinary compassionate people can help in their own communities, but it also gives background information to help understand the scope of this hidden problem. Additionally, it directs readers to existing resources. Schools districts must have a trained homeless liaison to identify and assist students experiencing homelessness. The federal McKinney-Vento Education for Homeless Children and Youth Act, reauthorized in December 2015 as part of the Every Student Succeeds Act (ESSA), specifies duties and responsibilities of these liaisons. One is to develop local resources to help the students succeed in school. Charlie, for whom the book is named, was instrumental in passage of homeless children and youth's educational rights. Society's choice in dealing with widespread angst about income inequality, racial strife, domestic and international violence, and personal challenges could angrily tumble into an apathetic stupor or embrace compassion that spurs action. The Charlie

Book: 60 Ways to Help Homeless Kids grew out of the desire to create a compassion epidemic that would spill out across the country to ease the suffering of millions of homeless children and youth. It was created and reviewed by people with years of experience working with homeless kids. This concise handbook will provide the know-how for adults and kids, civic organizations and faith communities, scout troops and neighborhood associations to make a viable difference in their local communities for the mostly invisible families and youth experiencing a variety of shapes of homelessness. Those involved in this book believe that good people doing good things will mitigate the apathy and anxiety that grabs headlines and shatters lives. The Charlie Book offers a simple, doable approach to providing tangible help to young people striving to get an education despite the formidable challenges they face. The antidote to apathy is action. The Charlie Book, offers simple activities that can simply change lives for the better.

*Teaching Electronic Literacy* Kathleen W. Craver, 1997-09-30 School library media specialists will find this concepts-based approach to teaching electronic literacy an indispensable basic tool for instructing students and teachers. It provides step-by-step instruction on how to find and evaluate needed information from electronic databases and the Internet, how to formulate successful electronic search strategies and retrieve relevant results, and how to interpret and critically analyze search results. The chapters contain a suggested lesson plan and sample assignments for the school library media specialist to use in teaching electronic literacy skills to students and teachers. Dr. Kathleen W. Craver, a nationally recognized specialist in technology in the library media center, identifies the universal concepts of electronic literacy and provides the library media specialist with the rationales, background, methods, and model assignments to teach students and faculty to become proficient and critical users of electronic information technologies. At the beginning of each chapter, Craver furnishes a rationale for change that school library media specialists can use to justify these essential modifications to their teaching curriculum. Chapters include: The Structure of Electronic Information; The Common Vocabulary and Characteristics of Electronic Resources; Formulating Electronic Search Strategies; The Physical Arrangement of Information; Choosing Appropriate On-Site and Remote Electronic Libraries; Choosing Appropriate Electronic Databases; Internet Search Tools and Techniques; Identifying Electronic Resources; On-Site Electronic Records Access; Using Primary Electronic Resources; and Evaluating Electronic Sources. The Appendix contains a list of principal vendors. A glossary of terms and a bibliography of suggested reading complete the work.
