Conversational Marketing David Cancel,Dave Gerhardt,2019-01-23 Real-time conversations turn leads into customers Conversational Marketing is the definitive guide to generating better leads and closing more sales. Traditional sales and marketing methods have failed to keep pace with the way modern, internet-savvy consumers purchase goods and services. Modern messaging apps, which allow for real-time conversations and instant feedback, have transformed the way we interact in our personal and professional lives, yet most businesses still rely on 20th century technology to communicate with 21st century customers. Online forms, email inquiries, and follow-up sales calls don't provide the immediacy that modern consumers expect. Conversational marketing and sales are part of a new methodology centered around real-time, one-on-one conversations with customers via chatbots and messaging. By allowing your business to communicate with customers in real time—when it's most convenient for them—conversational marketing improves the customer experience, generates more leads, and helps you convert more leads into customers. Conversational Marketing pioneers David Cancel and Dave Gerhardt explain how to: Merge inbound and outbound tactics into a more productive dialog with customers Integrate conversational marketing techniques into your existing sales and marketing workflow Face-to-face meetings, phone calls, and email exchanges remain important to customer relations, but adding a layer of immediate, individual conversation drives the customer experience—and sales—sky-high.

Personal But Not Private Assistant Professor Department of Communication Studies Stefanie Duguay,Stefanie Duguay,2022-04 Privacy has become a pressing concern for many users of digital platforms who fear legal or social liability for sharing personal details online. Yet for queer women and others, an emphasis on privacy fails to reflect the creativity and struggles of everyday people seeking to represent themselves and form meaningful connections through social media. Personal but Not Private explores how queer women share and maintain their identities through digital technologies despite overlapping technological, social, economic, and political concerns. Focusing on representations of sexual identity through Tinder, Instagram, and Vine, this volume uncovers how queer women are continuously engaging in identity modulation, or the process through which people and platforms adjust or modify personal information, to form relationships, increase their social and economic participation, and counter intersecting forms of oppression. While queer women's representations of sexual identity give rise to publics and counterpublics through intimate and collective self-representation, platform-specific elements like design and governance place limitations on queer women's agency and often make them targets of censorship, harassment, and discrimination. This book also considers how identity modulation can be applied to a range of people negotiating digital contexts and promotes tangible changes to digital platforms and their broader social, economic, and political structures to empower individuals and their personal sharing on social media. Bringing together personal interviews and empirical research, Personal but Not Private offers a new lens for examining digitally mediated identities and highlights how platforms act as complicated sites of transformation.

Learning, Teaching, and Social Media Andrew McWhirter,2024-01-31 Employing a unique generational approach, this book critically assesses social media in educational contexts across all educational levels: from primary and secondary schools to further and higher education, proposing a schema for social media literacy (SML). Using research obtained from fieldwork observations conducted in online teaching groups, surveys, and in-depth interviews with teachers and educators on the topic of social media and education, chapters interrogate the historical relationship between educator and learner, and use the frame of expert methodology to understand what educators themselves consider important about social media and education relative to their sectors. Bringing together current literature from education, learning and media technologies, along with longstanding debates around technological influence, chapters also draw on audience and communication studies, psychology and arts and humanities at a time when many different disciplines are trying to understand what social media means to our society. This interdisciplinary volume will be of great interest to academics, researchers and postgraduates in the fields of technology in education, media literacy, and critical digital media. Practitioners involved in the sociology of education will also find the book of use.

The dominant force in the lives of girls coming of age in America today is social media: Instagram, Whisper, Vine, Youtube, Kik, Ask.fm, Tinder. Provocative, explosive, and urgent, American Girls will ignite much-needed conversation about how we can help our daughters and sons negotiate the new social and sexual norms that govern their lives.
