Family Engagement in the Digital Age Chip Donohue, 2016-08-12 Family Engagement in the Digital Age: Early Childhood Educators as Media Mentors explores how technology can empower and engage parents, caregivers and families, and the emerging role of media mentors who guide young children and their families in the 21st century. This thought-provoking guide to innovative approaches to family engagement includes Spotlight on Engagement case studies, success stories, best practices, helpful hints for media mentors, and learn more resources woven into each chapter to connect the dots between child development, early learning, developmentally appropriate practice, family engagement, media mentorship and digital age technology. In addition, the book is driven by a set of best practices for teaching with technology in early childhood education that are based on the National Association for the Education of Young Children (NAEYC) and Fred Rogers Center joint position statement on Technology and Interactive Media. How and Why to Read and Create Children's Digital Books Natalia Kucirkova, 2018-12-03 How and Why to Read and Create Children's Digital Books outlines effective ways of using digital books in early years and primary classrooms, and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps and personalised reading, Natalia Kucirkova combines theory and

practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts, Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children's reading for pleasure. *How and Why to Read and Create Children's Digital Books* is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of creating and sharing. *Praise for How and Why to Read and Create Children's Digital Books* 'This is an exciting and innovative book – not least because it is freely available to read online but because its origins are in primary practice. The author is an accomplished storyteller, and whether you know, as yet, little about the value of digital literacy in the storymaking process, or you are an accomplished digital player, this book is full of evidence-informed ideas, explanations and inspiration.' Liz Chamberlain, Open University 'At a time when children's reading is increasingly on-screen, many teachers, parents and carers are seeking practical, straightforward guidance on how to support children's engagement with digital books. This volume, written by the leading expert on personalised e-books, is packed with app reviews, suggestions and insights from recent international research, all underpinned by careful

analysis of digital book features and recognition of reading as a social and cultural practice. Providing accessible guidance on finding, choosing, sharing and creating digital books, it will be welcomed by those excited by the possibilities of enthusing children about reading in the digital age.' Cathy Burnett, Professor of Literacy and Education, Sheffield Hallam University

Starting Strong Katrin Blamey, Katherine A. Beauchat, 2023-10-10 **Starting Strong: Evidence-Based Early Literacy Practices** shows teachers how to use four proven instructional approaches—standards based, evidenced based, assessment based, and student based—to improve their teaching practice in all areas of early literacy. Authors Katrin Blamey and Katherine Beauchat draw on their years of experience and early literacy expertise to guide you in figuring out what to teach and how to find the most instructionally sound method to teach it. They help you determine the instructional needs of your classroom and take full advantage of what you know about your students so you can engage them in learning. With chapters on oral language, vocabulary, phonological awareness, word recognition, comprehension, and writing skills, this comprehensive book explains each skill and provides research-based strategies for targeting each area. Supported by evidence-based research and aligned to key tenets of the Common Core, the book also includes classroom-tested activities and children's literature suggestions for each area of literacy. **Starting Strong** is an essential resource that any early literacy teacher or coach using a balanced literacy approach can use to build a solid foundation for their students.

Media Exposure During Infancy and Early Childhood Rachel Barr, Deborah Nichols Linebarger, 2016-11-24 This book discusses the burgeoning world of

young children's exposure to educational media and its myriad implications for research, theory, practice, and policy. Experts across academic disciplines and the media fill knowledge gaps and address concerns regarding apps, eBooks, and other screen-based technologies—which are being used by younger and younger children—and content delivery and design. Current research shows the developmental nuances of the child as learner in home, school, and mobile contexts, and the changes as parenting and pedagogy accommodate the complexities of the new interactive world. The book also covers methods for evaluating the quality of new media and prosocial digital innovations such as video support for separated families and specialized apps for at-risk toddlers. Highlights of the coverage: The role of content and context on learning and development from mobile media. Learning from TV and touchscreens during early childhood Educational preschool programming. How producers craft engaging characters to drive content delivery. The parental media mediation context of young children's media use. Supporting children to find their own agency in learning. Media Exposure During Infancy and Early Childhood is an essential resource for researchers, clinicians and related professionals, and graduate students in diverse fields including infancy and early childhood development, child and school psychology, social work, pediatrics, and educational psychology.

Learning First, Technology Second Liz Kolb, 2017-03-31 Learning First, Technology Second offers teachers a classroom-tested, easy-to-use framework to help them move from arbitrary uses of technology to thoughtful ways of adding value to student learning. Learning with technology doesn't happen because a specific tool "revolutionizes" education. It happens when proven teaching strategies intersect with technology tools, and yet it's not

uncommon for teachers to use a tool because it's "fun" or because the developer promises it will help students learn. This book includes: • An introduction to the Triple E Framework that helps teachers engage students in time-on-task learning, enhance learning experiences beyond traditional means and extend learning opportunities to bridge classroom learning with students' everyday lives. • Effective strategies for using technology to create authentic learning experiences for their students. • Case studies to guide appropriate tech integration. • A lesson planning template to show teachers how to effectively frame technology choices and apply them in instruction. The companion jump start guide based on this book is Engage, Enhance, Extend: Start Creating Authentic Lessons With the Triple E Framework.

Reading in the Digital Age: Young Children's Experiences with E-books Ji Eun Kim, Brenna Hassinger-Das, 2019-07-23 This edited book focuses on affordances and limitations of e-books for early language and literacy, features and design of e-books for early language and literacy, print versus e-books in early language and literacy development, and uses of and guidelines for how to use e-books in school and home literacy practices. Uniquely, this book includes critical reviews of diverse aspects of e-books (e.g., features) and e-book uses (e.g., independent reading) for early literacy as well as multiple examinations of e-books in home and school contexts using a variety of research methods and/or theoretical frames. The studies of children's engagement with diverse types of e-books in different social contexts provide readers with a contemporary and comprehensive understanding of this topic. Research has demonstrated that ever-increasing numbers of children use digital devices as part of their daily routine. Yet, despite children's frequent use of e-books from an early age, there is a limited understanding regarding how those e-books are actually being used at home and school. As more e-books become available, it is important to examine

the educational benefits and limitations of different types of e-books for children. So far, studies on the topic have presented inconsistent findings regarding potential benefits and limitations of e-books for early literacy activities (e.g., independent reading, shared reading). The studies in this book aim to fill such gaps in the literature.
