The Mandate of Heaven S J Marshall, S. J. Marshall, 2015-12-14 The Mandate of Heaven was originally given to King Wen in the 11th century BC. King Wen is credited with founding the Zhou dynasty after he received the Mandate from Heaven to attack and overthrow the Shang dynasty. King Wen is also credited with creating the ancient oracle known as the Yijing or Book of Changes. This book validates King Wen's association with the Changes. It uncovers in the Changes a record of a total solar eclipse that was witnessed at King Wen's capital of Feng by his son King Wu, shortly after King Wen had died (before he had a chance to launch the full invasion). The sense of this eclipse as an actual event has been overlooked for three millennia. It provides an account of the events surrounding the conquest of the Shang and founding of the Zhou dynasty that has never been told. It shows how the earliest layer of the Book of Changes (the Zhouyi) has preserved a hidden history of the Conquest.

I Ching Mathematics for the King Wen Version William Douglas Horden, 2014-09-19 This volume of I Ching Mathematics for the King Wen Version sets forth an entire new science by which to interpret and analyze the inner workings of the sacred technology surrounding the ancient Oracle. The Oracle is that aspect of the numinous that speaks directly to human beings. It is the spiritual half of nature that has, of old, been called the World Soul and, more recently, the Imaginal. It has had numerous incarnations as a divinatory instrument among various cultures but none of those have approached the elegant marriage of complexity and simplicity that marks the system of the I Ching. Nor have any of those other sacred technologies garnered the serious attention and research of so many brilliant men and women across the past three-and-a-half millennia. Times change and with them, the most long-lived relics of human experience. Indeed, change they must if they are to continue being a living part of human experience that extends forward into an increasingly complex future. The essence of such sacred technologies—those systematized mechanisms by which human awareness comes into unmediated contact with the numinous reality of which it is a part—does not, of course, change. What changes is our capacity to understand the ramifications of that essence. In the case of the I Ching, what has changed is our appreciation of the rational-mystical approach to life: Our growing awareness of the holistic and synergistic nature of life has made us realize that reason-without-spirituality is as cynical as spirituality-without-reason is naive. Its core essence is in fact the very model of rational mysticism: The progressive alternation of foundational polarities into symbols applicable to the widest range of human knowledge provides the rational counterpoint to its mystical relationship with the numinous spirit of the Oracle.

Tian Wen Yuan Qu, 1986 Describes the historical background of the poem and poses questions about Chinese mythology and the nature of the universe.

The King's Road Xin Wen, 2023-01-24 An exciting and richly detailed new history of the Silk Road that tells how it became more important as a route for diplomacy than for trade. The King's Road offers a new interpretation of the history of the Silk Road, emphasizing its importance as a diplomatic route, rather than a commercial one. Tracing the arduous journeys of diplomatic envoys, Xin Wen presents a rich social history of long-distance travel that played out in deserts, post stations, palaces, and polo fields. The book tells the story of the everyday lives of diplomatic travelers on the Silk Road—what they ate and drank, the gifts they carried, and the animals that accompanied them—and how they navigated a complex web of geographic, cultural, and linguistic boundaries. It also describes the risks and dangers envoys faced along the way—from financial catastrophe to robbery and murder. Using documents unearthed from the famous Dunhuang “library cave” in Western China, The King's Road paints a detailed picture of the intricate network of trans-Eurasian transportation and communication routes that was established between 850 and 1000 CE. By exploring the motivations of the kings who dispatched envoys along the Silk Road and describing the transformative social and economic effects of their journeys, the book reveals the inner workings of an interstate network distinct from the Sino-centric “tributary” system. In shifting the narrative of the Silk Road from the transport of commodities to the exchange of diplomatic gifts and personnel, The King's Road puts the history of Eastern Eurasia in a new light.

The Key Codes of Fu Hsi & King Wen John C. Compton, 2022-08-19 This book contains a series of research notes and graphical illustrations selected from the author's amazing research work. It shows how:

- The Sixty-Four hexagrams were derived by using combinatory trigrams selected from the Earlier Heaven and Later Heaven trigram cyclic sequences.
- The legendary authors of the I Ching, known as Fu Hsi and King Wen, used Key

Coded Matrices which enabled them to change the hexagrams of the ancient Ma-wang-tui into the Standard Modern edition. · The formulation of the Trigram Order of Completion was derived by using Knight's Chess /binary codes and the manipulation of hexagram identification numbers. · The cyclic sequences and trigram line to line transitions were utilized to formulate the King Wen's hexagram arrangement. · The natural numerical notation for each individual trigram was mathematically derived. · The author's inter-face code was derived and used to determine the mathematical methodology of the Genetic Code. · Trigram lines are manipulated to form the Inner and Outer Nuclear trigrams/ hexagrams. · The Genetic Code was determined from Fu Hsi's diagram of the derivation of the Sixty-Four hexagrams. It also includes the constructional details of an analytical model calculator which can be created from the actual design details shown within this book. This document provides the conclusive evidence that the originator(s) of the I Ching used a mathematical system which encompassed a formalistic natural philosophy that sought to embrace the entire world in a system of number symbolism. It shows the links to the ancient Indian Vedic mathematical system which reveals the relationship between the I Ching and the Binary / Genetic Codes.

*When I Ching Has No Text* Alfred Kee, 2021-04-07 If you are looking for an oracle system that can provide direct, precise, detailed, accurate, and straight to the point, no-nonsense answers. This book will serve you well! We will be discussing different examples (with real-life case studies) of questions that can be answered by WWG, such as employment and career, wealth (from personal to business and investment), health ( From general health to a professional application that not limited to Chinese and Modern Medicine), relationships (in any kind of relationships), property and feng shui, luck (including those that is intangible), and so much more. Wen Wang Gua is another I Ching practice that has a history of more than a thousand years. The accuracy of this system is extremely high. The designed framework of WWG adopts only the yin and yang to read the hexagrams and this makes deciphering so much easier. (i.e, if it wasn't yin, then it must be yang) Hence, there is no need for text during the entire deciphering process. Please be rest assured you will not need to pick up another translation of the I Ching again. This book simply does not copy just from the ancients. In fact, it has not much to do with the ancient texts. Despite saying this, this book is still using the basic and original designed structure, that was built thousands of years ago. It reveals many secret techniques and explains why some theories are not working. For the first time ever, I am revealing all those privately passed down techniques about this little known system of I Ching. I will lead the reader step by step through this fantastic and rewarding oracle from ancient China. To perform divination, it is absolutely not just about throwing coins and using one's intuition. It is a fully analytical system. That is why everyone can learn to read in the future. This book will guide you step by step with lessons (with proper listing and organising) from A to Z. I can assure you that this book is the one that you have been searching for a long time.

**Six Strategies;** 六韜 Liu Tao Jiang Taigong 劉向, The Six Strategies (simplified Chinese: 六韜; traditional Chinese: 六韜; pinyin: Liù Tāo), is a treatise on civil and military strategy traditionally attributed to Lü Shang (Jiang Ziya 姜子牙), a top general of King Wen of Zhou, founder of the Zhou dynasty, at around the eleventh century BC. The whole book is compiled by dialogue between Taigong and King Wen and King Wu. It is written from the perspective of a statesman attempting to overthrow the ruling Shang dynasty. It is a famous Taoist military book in ancient China. As an important part of the classical military cultural heritage of the Han nationality in China, its content is extensive and profound, its thought is exquisite and rich, and its logic is rigorous and rigorous, which is the concentrated embodiment of the essence of the ancient military thought of the Han nationality. There are six volumes in the book, totaling sixty. The content of Six Strategies is very extensive, covering almost all aspects of war and other issues. The best part is its strategy and tactics.

*Writing and the Ancient State* Haicheng Wang, 2014-05-12 Writing and the Ancient State explores the early development of writing and its relationship to the growth of political structures. The first part of the book focuses on the contribution of writing to the state's legitimating project. The second part deals with the state's use of writing in administration, analyzing both textual and archaeological evidence to reconstruct how the state used bookkeeping to allocate land, police its people, and extract taxes from them. The third part focuses on education, the state's system for replenishing its staff of scribe-officials. The first half of each part surveys evidence from Mesopotamia, Egypt, the Maya lowlands, Central Mexico, and the Andes; against this background the second half examines the evidence from China. The chief aim of this book is to shed new light on early China (from the second millennium BC through the end of the Han period, ca. 220 AD) while bringing to bear the lens of cross-cultural analysis on each of the civilizations under discussion.

*A Patterned Past* David Schaberg, 2001 The narratives are so constructed as to demonstrate the truth and indeed the naturalness of these attitudes. Their dominant perspective is that of officials rather than rulers, and the anecdotes represent the efforts of a group of officials and ministers to argue for a moralizing interpretation of the events of Zhou history and for their own value as skilled interpreters of events and advisors to the rulers of the day.--

**Handbook to Ruling the World** J.G. Cheock, 2022-01-01 A 3,000 year old step-by-step guide on how to destroy nations and bring them to the point where Colonizers are welcomed and loved, while making them despise their own land and people. These amazing ancient secret methods to Ruling the World, written by King Wen of the Zhou dynasty, may still be observed in practice today.

**Envisioning Eternal Empire** Yuri Pines,2009-01-01 This ambitious book looks into the reasons for the exceptional durability of the Chinese empire, which lasted for more than two millennia (221 B.C.E.-1911 C.E.). Yuri Pines identifies the roots of the empire's longevity in the activities of thinkers of the Warring States period (453-221 B.C.E.), who, in their search for solutions to an ongoing political crisis, developed ideals, values, and perceptions that would become essential for the future imperial polity. In marked distinction to similar empires worldwide, the Chinese empire was envisioned and to a certain extent preplanned long before it came into being. As a result, it was not only a military and administrative construct, but also an intellectual one. Pines makes the argument that it was precisely its ideological appeal that allowed the survival and regeneration of the empire after repeated periods of turmoil. *Envisioning Eternal Empire* presents a panoptic survey of philosophical and social conflicts in Warring States political culture. By examining the extant corpus of preimperial literature, including transmitted texts and manuscripts uncovered at archaeological sites, Pines locates the common ideas of competing thinkers that underlie their ideological controversies. This bold approach allows him to transcend the once fashionable perspective of competing schools of thought and show that beneath the immense pluralism of Warring States thought one may identify common ideological choices that eventually shaped traditional Chinese political culture

This volume presents the first systematic comparison of the two corpora. Part One analyzes their genesis and their reception, while Part Two discusses their characteristics as poetic creations. The book brings together Chinese and Western sinologists and classicists, and so promotes significant interdisciplinary and intercultural dialogue.
