*A Brief History of Seven Killings* Marlon James,2014-10-02 Winner of the 2015 Man Booker Prize One of Entertainment Weekly's Top 10 Books of the Decade One of the Top 10 Books of 2014 - Michiko Kakutani, The New York Times A "thrilling, ambitious . . . intense" (Los Angeles Times) novel that explores the attempted assassination of Bob Marley in the late 1970s, from the author of *Black Leopard, Red Wolf* In *A Brief History of Seven Killings*, Marlon James combines brilliant storytelling with his unrivaled skills of characterization and meticulous eye for detail to forge an enthralling novel of dazzling ambition and scope. On December 3, 1976, just before the Jamaican general election and two days before Bob Marley was to play the Smile Jamaica Concert to ease political tensions in Kingston, seven gunmen stormed the singer's house, machine guns blazing. The attack wounded Marley, his wife, and his manager, and injured several others. Little was officially released about the gunmen, but much has been whispered, gossiped and sung about in the streets of West Kingston. Rumors abound regarding the assassins' fates, and there are suspicions that the attack was politically motivated. *A Brief History of Seven Killings* delves deep into that dangerous and unstable time in Jamaica's history and beyond. James deftly chronicles the lives of a host of unforgettable characters - gunmen, drug dealers, one-night stands, CIA agents, even ghosts - over the course of thirty years as they roam the streets of 1970s Kingston, dominate the crack houses of 1980s New York, and ultimately reemerge into the radically altered Jamaica of the 1990s. Along the way, they learn that evil does

indeed cast long shadows, that justice and retribution are inextricably linked, and that no one can truly escape his fate. Gripping and inventive, shocking and irresistible, *A Brief History of Seven Killings* is a mesmerizing modern classic of power, mystery, and insight.

Tracing Your Ancestors Using the Census Emma Jolly, 2013-09-19 The Pen & Sword guide to the census is detailed, accessible and authoritative, and it is one of the most comprehensive on the market. It has been written with the family historian in mind, and it is packed with advice on how to explore and get the most from the census records. As well as describing the modern censuses, it provides information on the less-known censuses dating from before 1841, and it covers the records of all the constituent parts of the British Isles. It is an essential introduction and tool for anyone who is researching the life and times of an ancestor. Emma Jolly describes how and why census records came to be created, then looks in detail at how to search the main censuses from 1841 to 1911. Each chapter covers the relevant historical context, compares online and other sources, identifies problems like lost or damaged records, and shows how the specific information in the census concerned can be interpreted effectively. While the censuses of England and Wales, Scotland, Ireland, the Channel Islands and the Isle of Man are all examined, the main focus is on the English and Welsh census, with differences noted for other areas. An extensive appendix and bibliography, which, for ease of access, gathers together all the key resources in one place, is also provided.

**Geospatial Thinking** Marco Painho, Maribel Yasmina Santos, Hardy Pundt, 2010-07-20 For the fourth consecutive year, the Association of Geographic Information Laboratories for Europe (AGILE) promoted the edition of a book with the collection of the scientific papers that were submitted as full-papers to the AGILE annual international conference. Those papers went through a competitive review process. The 13 AGILE conference call for full-papers of original and unpublished fundamental scientific research resulted in 54 submissions, of which 21 were accepted for publication in this volume (acceptance rate of 39%). Published in the Springer Lecture Notes in Geoinformation and Cartography, this book is associated to the 13 AGILE Conference on Geographic Information Science, held in 2010 in Guimarães, Portugal, under the title "Geospatial Thinking". The efficient use of geospatial information and related technologies assumes the knowledge of concepts that are fundamental components of Geospatial Thinking, which is built on reasoning processes, spatial conceptualizations, and representation methods. Geospatial Thinking

is associated with a set of cognitive skills consisting of several forms of knowledge and cognitive operators used to transform, combine or, in any other way, act on that same knowledge. The scientific papers published in this volume cover an important set of topics within Geoinformation Science, including: Representation and Visualisation of Geographic Phenomena; Spatiotemporal Data Analysis; Geo-Collaboration, Participation, and Decision Support; Semantics of Geoinformation and Knowledge Discovery; Spatiotemporal Modelling and Reasoning; and Web Services, Geospatial Systems and Real-time Applications.

**Digital Methods for Social Science** Steven Roberts, Helene Snee, Christine Hine, Yvette Morey, Hayley Watson, 2016-01-26 This timely book inspires researchers to deploy relevant, effective, innovative digital methods. It explores the relationship of such methods to 'mainstream' social science; interdisciplinarity; innovations in digital research tools; the opportunities (and challenges) of digital methods in researching social life; and digital research ethics.

*Ethnography for a data-saturated world* Hannah Knox, Dawn Nafus, 2018-10-03 This edited collection aims to reimagine and extend ethnography for a data-saturated world. The book brings together leading scholars in the social sciences who have been interrogating and collaborating with data scientists working in a range of different settings. It also describes how collaborations between ethnographers and data scientists might lead to new forms of social analysis

**Introducing Urban Anthropology** Rivke Jaffe, Anouk de Koning, 2022-12-30 This book provides an up-to-date introduction to the important field of urban anthropology. This is a critical area of study, as more than half of the world's population now lives in cities and anthropological research is increasingly done in an urban context. Exploring contemporary anthropological approaches to the urban, the authors consider: How can we define urban anthropology? What are the main themes of twenty-first-century urban anthropological research? What are the possible future directions in the field? The chapters cover topics such as urban mobilities, place-making and public space, production and consumption, and politics and governance. These are illustrated by lively case studies drawn from urban settings across the world. Accessible yet theoretically incisive, *Introducing Urban Anthropology* will be a valuable resource for anthropology students and also for those working in urban studies and related disciplines such as sociology and geography. The revised second edition includes updated theoretical discussions and new ethnographic case studies. It features a new chapter on neoliberalism, austerity and solidarity, and engages more extensively with digital transformations of urban life.
