Innovations in Planning Facilities for Sci-Tech Libraries Ellis Mount,2019-12-06 This book, first published in 1986, is a practical resource to planning science and technology libraries. Librarians who have been

through the process offer guidelines, an awareness of problems to anticipate, and solutions to them.

New International Dictionary of Acronyms in Library and Information Science and Related Fields Henryk Sawoniak, Maria Witt, 2011-05-02 This enlarged and expanded edition is designed to be a valuable resource for librarians and users of information sources, clarifying the bewildering number of new acronyms that appear every year in the information science field. Nearly 30,000 acronyms in 35 languages are listed. As libraries are to a large extent interdisciplinary, the dictionary covers language forms used in computers, publishing, printing, archive management, journalism and reprography, as well as in the library and information science fields Acronyms reproduced here represent institutions, library and information systems, pr.

Data Manipulation in Sci-tech Libraries Ellis Mount, 1985

Sci-Tech Libraries Serving Societies and Institutions Ellis Mount, 1987 Here is a readable book on the important role played by libraries and information centers which serve sci-tech societies, associations, and institutions.

The Finnish Case System Minna Jaakola, Tiina Onikki-Rantajääskö, 2023-11-23 The Finnish language is perhaps best known for its rich case system. Depending on the definition of a case, Finnish has at least fourteen,

possibly fifteen or even more cases. This volume is the first comprehensive English-language account of the Finnish case system, focusing primarily on its semantic functions. This collection of articles presents an up-to-date overview of the Finnish case system, analyses central subsystems within it, and offers data-based analyses of the functions of individual cases. The authors approach Finnish cases from different perspectives within the framework of Cognitive Linguistics. The volume also addresses more general topics, such as the notion of case, questions of polysemy, the traditional division of cases into grammatical and semantic, the relationship between inflection and derivation as well as the role of inflection in the structuring of the categories of adpositions and adverbs. The book will be of interest to linguists and students as well as to those readers who are not familiar with cognitive linguistics. The analyses presented here will be relevant to anyone investigating the essence of case and the emergence of linguistic meaning.

Sci-Tech Library Networks Within Organizations Ellis Mount, 1988 This fascinating volume offers thorough descriptions of sci-tech library networks in which their members have a common sponsorship or ownership. Library networks exist in such great quantity and diversity now, that it is not difficult to identify many types of them. Corporate library networks--AT&T, Xerox, and General Electric--and federal government networks--NASA and FEDLINE--are the focus here, as the authors present the history, development,

and activities of these networks. A library network for health sciences libraries that use OCLC is also scrutinized.

Fee-Based Services in Sci-Tech Libraries Ellis Mount,2013-10-18 This timely and important book explores how fee-based services have developed in various types of sci-tech libraries. The authoritative contributors focus on the current changing financial aspects of the sci-tech library operation and clarify for the reader how these changes have brought about conditions in which traditional methods of funding are no longer adequate. What new options are open and how they are best being applied in today's sci-tech libraries is fully and clearly explained and illustrated. Topics explored include cost allocation and cost recovery, fees for computer searching, and the relationship between sci-tech libraries and serials agents.

Weeding of Collections in Sci-Tech Libraries Ellis Mount,2019-12-06 In this book, first published in 1986, experts from the various specialties describe the weeding process in corporate, academic, and university libraries. Factors affecting the weeding of materials - lack of space, a desire to place materials in a more suitable library, changing goals of the library - are explored. Discussions concerning the choices for the disposal of items are insightful and innovative.
