Wave Energy Potential, Behavior and Extraction Hua Li,2020-03-27 Wave energy has a higher potential than most of the available ocean energy resources; however, it fluctuates dramatically depending on geographical and temporal baselines. The complexity of wave energy is only exacerbated by that fact that the cycle of creation, transport, and disappearance of wave energy is influenced by a wide variety of factors. This Special Issue of *Energies* explores the latest developments in wave energy potential, behavior, and extraction. This Special Issue introduces 1) thorough reviews on the status of wave energy development, 2) novel technologies to extract wave energy including wave energy converter design, and 3) latest methodologies applied in analyzing wave energy potentials.

Affects, Interfaces, Events Bodil Marie Stavning Thomsen,Jette Kofoed,Jonas Fritsch,2021-03-01 This book engages with how affective encounters are shaped and conditioned by interfacial events. Together, the chapters explore the implications of this on a micro-perceptual and macro-relational level through an experimental middling of approaches and examples. While broadly departing from a Spinozist and Deleuzian theoretical foundation, the book weaves together a compelling number of conceptual and empirical trajectories. Always attuned to the implications, modulations and tonalities arising in the readings through art, journalism, bodies, an/archives, data and design, *Affects, Interfaces, Events* allows for a truly transdisciplinary resonance driven by theory, technology and practice.

Capacious Gregory J. Seigworth,Mathew Arthur,Wendy J. Truran,Johnny Gainer,2023-06-30 *Capacious: Journal for Emerging Affect Inquiry* is an open access, peer-reviewed international journal. The principal aim of *Capacious* is to ‘make room’ for a wide diversity of approaches and emerging voices to engage with ongoing conversations in and around affect studies. *Capacious* endeavours to promote diverse bloom-spaces for affect’s study over the dulling hum of any specific orthodoxy. Introduction by Chris Ingraham and afterword by Jette Kofoed & Jonas Fritsch. Essays by Alana Brekelmans, Maria-Gemma Brown, Carolien Hermans, Margalit Katz, and Matthew Tomkinson. Book reviews by Alana Brekelmans, Miles Feroli, Desiree Foerster, Edoardo Pelligra, and David Rousell. Interstices (short visual and textual interventions) by Paul Bowman, Max Haiven, Katja Hiltunen, and Lea Muldtofte. With a dialogue between Dominic Pettman and Carla Nappi.

Party Government in 48 Democracies (1945–1998) J.J. Woldendorp,Hans Keman,I. Budge,2013-04-17 Since the 1980s, political scientists have developed a renewed interest in the study of political institutions, based on the assumption that institutions matter -that is, that formal governmental institutions and constitutional-legal rules (as well as informal institutions like parties and interest groups) are crucial determinants of the shape of politics and policy outcomes. In this respect, the new institutionalism resembles the old institutionalism of pre-behaviorist days, but the crucial difference between the two is that the new institutionalists are committed to systematic empirical testing of their hypotheses, at least in principle. In practice, however, especially in comparative analyses, this goal has often been frustrated by the lack of reliable data for a large number of countries. Researchers have therefore usually been limited to testing their hypotheses with modest data sets collected for their own particular purposes. Of all of the political institutions, the executive branch of the government is by far the most important; it can be regarded as the irreducible core of government and the principal embodiment of political authority with specific powers that are not lodged elsewhere in the political system. Almost all countries in the world, and certainly all modern democracies, have an executive body called government, cabinet, or administration (as in the term the Clinton administration) that has the main responsibility for running the country's public affairs.

Handbook of Democratic Government J.J. Woldendorp,Hans Keman,I. Budge,2012-12-06 The *Handbook of Democratic Government* is the first compact and comprehensive data collection for 20 countries which simultaneously provides comparative and complete information on the composition of governments. Parties, ministries, portfolios, ministers and parliamentary support are listed, as well as duration, type of government and reasons for termination. The data are organised in such a manner that every researcher can use them as a basic data set, ready to be transformed according to the particular needs dictated by the research undertaken. Various levels of analysis are possible, both cross-nationally and across time, ranging from individual ministers and separate ministries to specific parties, governments or countries. Given its format, the data set is also a very useful background to the special annual issue of the *European Journal of Political Research: Political Data Yearbook*. It will save researchers in the field of comparative politics valuable time as it can be utilised in connection with, or in addition to other data sources.

Advances in Renewable Energies Offshore Carlos Guedes Soares,2018-10-03 *Advances in Renewable Energies Offshore* is a collection of the papers presented at the 3rd International Conference on Renewable Energies Offshore (RENEW 2018) held in Lisbon, Portugal, on 8-10 October 2018. The 104 contributions were written by a diverse international group of authors and have been reviewed by an International Scientific Committee. The book is organized in the following main subject areas: - Modelling tidal currents - Modelling waves - Tidal energy devices (design, applications and experiments) - Tidal energy arrays - Wave energy devices

(point absorber, multibody, applications, control, experiments, CFD, coastal OWC, OWC and turbines) - Wave energy arrays - Wind energy devices - Wind energy arrays - Maintenance and reliability - Combined platforms - Moorings, and - Flexible materials Advances in Renewable Energies Offshore collects recent developments in these fields, and will be of interest to academics and professionals involved in the above mentioned areas.

The Kidney and Hypertension in Diabetes Mellitus Carl Erik Mogensen,2013-03-09 The first sporadic observations describing renal abnormalities in diabetes were published late in the 19th century, but systematic studies of the kidney in diabetes started only half a century ago after the paper by Cambier in 1934 and the much more famous study by Kimmelstiel and Wilson in 1936. These authors described two distinct features of renal involvement in diabetes: early hyperfiltration and late nephropathy. Diabetic nephropathy is, despite half a century of studies, still a very pertinent problem, renal disease in diabetes now being a very common cause of end-stage renal failure in Europe and North America and probably throughout the world. It is a very important part of the generalized vascular disease found in long-term diabetes as described by Knud Lundbaek in his monograph Long-term Diabetes in 1953, published by Munks gaard, Copenhagen. Surprisingly, there has not been a comprehensive volume describing all aspects of renal involvement in diabetes, and the time is now ripe for such a volume summarizing the very considerable research activity within this field during the last decade and especially during the last few years. This book attempts to cover practically all aspects of renal involvement in diabetes. It is written by colleagues who are themselves active in the many fields of medical research covered in this volume: epidemiology, physiology and pathophysiology, laboratory methodology, and renal pathology. New studies deal with the diagnosis and treatment of both incipient and overt nephropathy by metabolic, antihypertensive, and dietary intervention.

Progress in Renewable Energies Offshore C. Guedes Soares,2016-11-18 Progress in Renewable Energies Offshore includes the papers presented in the 2nd International Conference on Renewable Energies Offshore (RENEW2016, Lisbon, Portugal, 24-26 October 2016). The scope of the book is broad, covering all aspects of renewable energies offshore activities such as resource assessment; wind energy; wave energy; tidal energy; ocean energy devices; multiuse platforms; PTO design; grid connection; economic assessment; installation and maintenance planning. The contents of the present book are organized in these main subject areas corresponding to the sessions in the Conference. The conference reflects the importance of the renewable energies offshore worldwide and is an opportunity to contribute to the exchange of information on the developments and experience obtained in concept development, design and operation of these devices. Progress in Renewable Energies Offshore has as main target academics and professionals working in the related areas of renewable energies.

Walking as Critical Inquiry Alexandra Lasczik,Amy Cutter-Mackenzie-Knowles,David Rousell,2023-06-22 This book is a transdisciplinary, international collection situated within a genealogy of experimental walking practices in the arts, arts-based research, and emergent walking practices in education. It brings together emerging cartographies of relation amongst walking practices ranging across arts-based, ecological, activist, decolonising, queer, critical and posthuman modes of inquiry. Its particular investment is in the proliferation of artful modes of inquiry that open up speculative practices and concepts of walking as an orientation for pedagogy, inquiry, and the everyday, resisting the gaze of privilege and the relentless commodification of human and nonhuman life processes. This is important work for the burgeoning demand for creative methodologies in the social sciences, and more specifically, for arts-based educational research.

Qualitative Research David Silverman,2020-12-02 Written by leaders of qualitative methodology, this book provides up-to-date and interdisciplinary insight into a range of qualitative methods. Bringing together different

perspectives, contributors discuss theoretical underpinnings of these methods before taking readers through the process of each approach and helping them develop skills needed to carry out this type of research autonomously and with confidence. Highlights include: New chapters on multimethod qualitative research, using digital data and video, and addressing social issues in research. More guidance on how to store and manage data appropriately. Advice on how to publish research in journals. Full of practical tips, exercises and summaries, this book continues to be a masterclass in qualitative research for students and researchers across the social sciences and beyond.

Biomag 96 Cheryl J. Aine,Yoshio Okada,Gerhard Stroink,Stephen J. Swithenby,Charles C. Wood,2013-11-11 A modified Linear Estimation Approach was performed to reconstruct current sources within the heart. Based on MRI data sets the Boundary Element Method was used to create tailored multicompartment models of the human thorax which were used to solve the forward problem of magnetocardiography. The ability of the proposed method was demonstrated for the localization of a single current dipole as an example of a focal source. By means of introducing small shiftings to all reconstruction dipoles during linear estimation solution as well as performing a successive focussing strategy ignoring places without significant electrical activity the method could easily be extended to the reconstruction of real 3D sources. Based on a special minimum-norm solution the source volume can be estimated applying a finite element approximation using cube elements. The size of an extended current source can be estimated by superimposing the reconstructed dipoles to an equivalent dipole and comparing the corresponding volume with the sphere which would be related to the equivalent dipole. The deviation of these volumes can be taken as a criterion for non-dipolarity of sources.

The Top Books of the Year Kofoed Thomsen The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels enthralling the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the captivating narratives that have charmed audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Kofoed Thomsen : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Kofoed Thomsen : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
