Reporting Thailand's Southern Conflict Phansasiri

Kularb, 2016-02-12 Since 2004, Thailand's southern border provinces have been plagued by violence. There are a wide array of explanations for this violence, from the revival of Malay nationalist movements and the influence from the global trend of radical Islam, to the power play among the regional underground crime syndicates, politicians, and state authorities. The disparate interpretations signal the dynamic and complex discursive contention of this damaging and enduring conflict, and this book looks at how this is played out in the Thai media, and with what possible consequences. In analysing the southern conflict coverage, the book presents the deficiencies in news coverage, as produced by four news organisations of different natures across a seven-year review period, and discusses the professional practices that hinder journalism from serving as a fair arena for healthy and rational democratic debates. Based on in-depth interviews with news workers, it argues that Thai journalism is not always monolithic and static, as shown in the discursive shifts in news content, the variations of journalistic practices and news workers' disparate stances on the conflict. The book goes on to highlight the less immediately apparent difficulties of political conflict reporting, such as the subtle patterns of intimidation and media manipulation, as well as the challenges of countering socially-prevailing hegemonic beliefs in Thai society. Exploring the political contingencies and socio-cultural influences at play, this book provides an in-depth study of journalism's role in politics in Thailand, and is of interest to students and scholars of Southeast Asian Politics, Media Studies and Peace and Conflict Studies.

Bridging Entrepreneurship and Social Innovations Elmar

Steurer, Emanuel Herrmann, 2021-07-29 This book details how social innovations positively impact on non- or low-profit parts of society, such as education, health and energy, and describes a

variety of methods for the successful implementation of entrepreneurship. The contributions here are based on the experience of authors from emerging countries, and present and explain practical advances in social innovation and transformative business management. Topics covered in this volume include additive manufacturing, the economic impact of such innovations on Japan's aging society, a multi-stakeholder analysis for business founders in Tunisia, and the sustainability of solar technology in Namibia, among others.

Under Beijing's Shadow Murray Hiebert, 2020-08-15 China's rise and stepped-up involvement in Southeast Asia have prompted a blend of anticipation and unease among its smaller neighbors. The stunning growth of China has yanked up the region's economies, but its militarization of the South China Sea and dam building on the Mekong River has nations wary about Beijing's outsized ambitions. Southeast Asians long felt relatively secure, relying on the United States as a security hedge, but that confidence began to slip after the Trump administration launched a trade war with China and questioned the usefulness of traditional alliances. This compelling book provides a snapshot of ten countries in Southeast Asia by exploring their diverse experiences with China and how this impacts their perceptions of Beijing's actions and its long-term political, economic, military, and "soft power" goals in the region.

The US-Thai Alliance and Asian International Relations

Gregory Raymond, John Blaxland, 2021-05-30 Thailand, a long-standing defence partner of the United States and ASEAN's second largest economy, occupies a geostrategically important position as a land bridge between China and maritime Southeast Asia. This book, based on extensive original research, explores the current state of US-Thai relations, paying particular attention to how the United States is perceived by a wide range of people in the Thai defence establishment and highlighting the importance of historical memory. The book outlines how the US-Thai

relationship has been complicated and at times turbulent, discusses how Thailand is deeply embedded in multi-faceted relationships with many Asian states, not just China, and examines how far the United States is blind to the complexities of Asian international relations by focusing too much on China. The book concludes by assessing how US-Thai relations are likely to develop going forward. Additionally, the work contributes to alliance theory by showing how domestic politics shapes memory, which in turn affects perceptions of other states.

Arndt Professor of Southeast Asian Economies, Australian National University

The Political Economy of the Agri-Food System in Thailand Prapimphan Chiengkul, 2017-05-08 The mainstream agri-food system in Thailand has been shaped to aid capital

accumulation by domestic and transnational hegemonic forces, and is currently sustained through hegemonic agri-food production-distribution, governance structures and ideational order. However, sustainable agriculture and land reform movements have to certain extents managed to offer alternatives. This book adopts a neo-Marxist and Gramscian approach to studying the political economy of the agricultural and food system in Thailand (1990-2014). The author argues that hegemonic forces have many measures to co-opt dissent into hegemonic structures, and that counter-hegemony should be seen as an ongoing process over a long period of time where predominantly counter-hegemonic forces, constrained by political economic structural conditions, may at times retain some hegemonic elements. Contrary to what some academic studies suggest, the author argues that localist-inspired social movements in Thailand are not insular and anti-globalisation. Instead, they are selective in fostering collaborations and globalisation based on values such as sustainability, fairness and partnership. Providing new perspectives on polarised politics in Thailand, particularly how cross-class alliances can further or frustrate counter-hegemonic movements, the book points to the importance of analysing social movements in relation to established political authority. It will be of interest to academics in the field of Politics and International Relations, Sociology, Development Studies and Asian Studies.

Opposing Democracy in the Digital Age Aim

Sinpeng, 2021-08-27 *Opposing Democracy in the Digital Age* is about why ordinary people in a democratizing state oppose democracy and how they leverage both traditional and social media to do so. Aim Sinpeng focuses on the people behind popular, large-scale antidemocratic movements that helped bring down democracy in 2006 and 2014 in Thailand. The yellow shirts (PAD—People's Alliance for Democracy) that are the focus of the book are antidemocratic movements grown out of democratic periods in Thailand, but became the catalyst for the country's

democratic breakdown. Why, when, and how supporters of these movements mobilize offline and online to bring down democracy are some of the key questions that Sinpeng answers. While the book primarily uses a qualitative methodological approach, it also uses several quantitative tools to analyze social media data in the later chapters. This is one of few studies in the field of regime transition that focuses on antidemocratic mobilization and takes the role of social media seriously.

Such independent and forward-looking approach suggests the ideas to shaping the global common good in the future human society. Buddhist Public Advocacy and Activism in Thailand

Craig M. Pinkerton,

Knowledge Creation in Community Development Ayano

Hirose Nishihara, Masaei Matsunaga, Ikujiro Nonaka, Kiyotaka Yokomichi, 2017-08-28 This book explores how public organizations and not-for-profit organizations (NPO) can be more collaborative, innovative and effective in solving social issues in both developing and developed countries. "Social innovation," led by social entrepreneurs and/or social enterprises, emerged in the late 1990s, and spread in 2000s. As the West faced management failures, demand increased for corporations to take on more social responsibility. Based on intensive research on social innovation processes at the municipal and the community level in Indonesia, Philippines, Thailand, Vietnam, and Japan, the book analyses the factors that affected the most effective and efficient social innovations.

Buddhist Masculinities Megan Bryson, Kevin

Buckelew, 2023-09-05 While early Buddhists hailed their religion's founder for opening a path to enlightenment, they also exalted him as the paragon of masculinity. According to Buddhist scriptures, the Buddha's body boasts thirty-two physical features, including lionlike jaws, thighs like a royal stag, broad shoulders, and a deep, resonant voice, that distinguish him from ordinary men. As Buddhism spread throughout Asia and around the world, the Buddha remained an exemplary man, but Buddhists in other times and places developed their own understandings of what it meant to be masculine. This transdisciplinary book brings together essays that explore the variety and diversity of Buddhist masculinities, from early India to the contemporary United States and from bodhisattva-kings to martial monks. Buddhist Masculinities adopts the methods of religious studies, anthropology, art history, textual-historical studies, and cultural

studies to explore texts, images, films, media, and embodiments of masculinity across the Buddhist world, past and present. It turns scholarly attention to normative forms of masculinity that usually go unmarked and unstudied precisely because they are “normal,” illuminating the religious and cultural processes that construct Buddhist masculinities. Engaging with contemporary issues of gender identity, intersectionality, and sexual ethics, *Buddhist Masculinities* ushers in a new era for the study of Buddhism and gender.

State and Uncivil Society in Thailand at the Temple of Preah Vihear Puangthong R. Pawakapan, 2013-08-19 Since it began in 2008, the dispute over the temple of Preah Vihear and its adjacent area has envenomed Thai-Cambodian relations. Puangthong R. Pawakapan argues that initially Thai-Cambodian cooperation on the temple had begun within the framework of Thailand’s strategy to become a regional economic centre and leader. It was the first time in Southeast Asia that two formerly antagonistic states were employing cultural methods to settle a territorial dispute and turned it into a symbol of friendship and cooperation between the two countries. But the ultra-nationalist movement derailed this essay in cooperation. Instead, the temple became a symbol of hatred between the two countries. The ultra-nationalists’ success has to be attributed to the support it enjoyed from various civic groups and institutions.

"Good Coup" Gone Bad Pavin Chachavalpongpun, 2014-06-18 What did the 2006 military coup show us? It demonstrated that the crux of the Thai crisis is far more serious and much wider in scope than had previously been thought. The monarchy is surely not a victim in the protracted conflict, but the root cause and continuing factor that has eroded Thai politics. The coup set in motion more prejudicial uses of the lèse-majesté law, and in the process, has led to more political prisoners. It has also shredded the military into several segments, turning generals into desperate royalists who continue to live off the monarchy in order

to survive. Issues of violence in the Thai south and the Thai-Cambodian dispute became greatly intensified in the age of militarized politics. The coup also produced unique colour-coded politics and created crises of legitimacy. This book is a collection of essays that reflect developments in Thai politics in the post-coup period.

National Security, Statecentricity, and Governance in East Asia Brendan Howe, 2017-10-11 This book assesses the extent to which an emphasis on national security and prioritization of state interests has dominated governance policy-making in Northeast and Southeast Asia, at the expense of human security, human development, and human rights. The findings are that in many cases, there are embedded structural obstacles to achieving human-centered governance objectives in the region. These relate to the role of the military, historical authoritarian legacies, and new authoritarian trends. Contributors examine not only the most obvious instances of military domination of governance in the region (North Korea with its “Military First” philosophy, Thailand since the 2014 coup, and Myanmar with its long history of military rule), but also less well known examples of the influence of conflict legacies upon governance in Cambodia, Timor-Leste, and Laos, as well as the emergence of new reservoirs of power and resources for the forces of authoritarianism.
