Balanced Scorecard Ade Asefeso MCIPS MBA, 2013-06-18 The balanced scorecard is a strategic planning and management system that is used extensively in business and industry, government, and non-profit organizations worldwide to align business activities to the vision and strategy of the organization, improve internal and external communications, and monitor organization performance against strategic goals. The key problem identified in business is that many companies tended to manage their businesses based solely on financial measures. While that may have worked well in the past, the pace of business in today's world requires more comprehensive measures. Though financial measures are necessary, they can only report what has happened in the past; where a business has been, but not where it is headed. It is like driving a car by looking in the rear-view mirror.

Performance Measurement with the Balanced Scorecard Stefano Biazzo,Patrizia Garengo,2012-01-05 Do we really know the critical phenomena that are linked to how enterprises function and the dynamics of their relationships with customers, suppliers and competitors? Are their decision-making processes founded upon a set of performance measurements that were accurately designed and systematically elaborated? The above questions are the focus of this book, as is the following premise: enterprises need a system to measure their critical performances so they can be managed effectively; metaphorically speaking, enterprises need a “management dashboard” to serve as a navigational aid. A dashboard to show – with as few distortions as possible – the pattern of key variables that characterizes the specific formula enterprises use to face their competitive and social environment.

Balanced scorecard - Solving all problems of traditional accounting systems? Khanh Pham-Gia,2009-07-24 Research Paper (undergraduate) from the year 2009 in the subject Business economics - Business Management, Corporate Governance, grade: 1,0, University of applied sciences, Munich, language: English, abstract: Balanced Scorecard (BSC) is a modern management tool for performance measurement and was developed in the early 1990s to overcome the limitations of managing only with financial measures. The BSC supports translating organization's strategy into action by defining specific goals and objectives associated with the organization's vision, providing measures, and indicating initiatives to reach those goals. It helps to solve a big problem in the practice, namely the strategy concept is often brilliant but the realizations fail. The aim of this study is to analyze whether the Balanced Scorecard can solve all problems of traditional accounting systems. To answer this question, firstly, typical problems of traditional accounting systems are studied. Afterwards, the basic concept as well as benefits and drawbacks of BSC are viewed into details. Finally, the limits and difficulties of BSC realization in practice and initiatives to avoid the pitfalls are illuminated. It could be stated, that the BSC provides a holistic thinking and a balance between financial and non-financial perspectives: finance, customer, internal business process, as well as learning and growth. It helps organization to implement strategy faster and more effectively. Moreover, BSC supports managers to perform the controlling tasks, namely planning, driving, briefing and monitoring organizational activities. However, the BSC also shows some limitations and

difficulties whereby the pitfalls in the practise are based on design and process failures. To avoid these pitfalls useful initiatives and special features for practical design of BSC should be implemented. Taking into account this rules BSC could be used as a powerful tool for strategic management accounting.

Personal Balanced Scorecard Hubert K. Rampersad, 2006-06-01 The Personal Balanced Scorecard (PBSC) is a journey into the inner self, where values, hopes, dreams and aspirations lie quietly waiting to be discovered. Taking the journey as an individual allows you to view your life objectively and authentically as a whole person and provides a roadmap of your dreams and aspirations translated into manageable and measurable milestones. As a part of the Total Performance Scorecard (TPS) process which I introduced in 2003 in *Total Performance Scorecard: Redefining Management to Achieve Performance with Integrity*, and which has been translated into more than 20 languages, the Personal Balanced Scorecard can also be an effective way for managers to coach others to achieve integrity and alignment between work and life. The benefit comes from changing individual behavior in order to drive organizational effectiveness, enhance performance, and increase self-awareness, personal responsibility and motivation. PBSC is an integral part of this organic and holistic Total Performance Scorecard process, which is an organizational and cultural change tool and a method for ongoing effectiveness. Its uniqueness lies in aligning and a combination of Personal and Organizational goals to result in Individual Performance Plans for each employee. The focus of this book is the PBSC portion, which comprises a search for self-knowledge, self-discovery and self-mastery.
