*Convention Center Follies* Heywood T. Sanders,2014-05-08  
American cities have experienced a remarkable surge in convention center development over the last two decades, with exhibit hall space growing from 40 million square feet in 1990 to 70 million in 2011—an increase of almost 75 percent. Proponents of these projects promised new jobs, new private development, and new tax revenues. Yet even as cities from Boston and Orlando to Phoenix and Seattle have invested in more convention center space, the return on that investment has proven limited and elusive. Why, then, do cities keep building them? Written by one of the nation's foremost urban development experts, *Convention Center Follies* exposes the forces behind convention center

development and the revolution in local government finance that has privileged convention centers over alternative public investments. Through wide-ranging examples from cities across the country as well as in-depth case studies of Chicago, Atlanta, and St. Louis, Heywood T. Sanders examines the genesis of center projects, the dealmaking, and the circular logic of convention center development. Using a robust set of archival resources—including internal minutes of business consultants and the personal papers of big city mayors—Sanders offers a systematic analysis of the consultant forecasts and promises that have sustained center development and the ways those forecasts have been manipulated and proven false. This record reveals that business leaders sought not community-wide economic benefit or growth but, rather, to reshape land values and development opportunities in the downtown core. A probing look at a so-called economic panacea, *Convention Center Follies* dissects the inner workings of America's convention center boom and provides valuable lessons in urban government, local business growth, and civic redevelopment.

**Auditing and Society** Wally Smieliauskas, Minlei Ye, Ping Zhang, 2020-07-30 Auditing has become an essential component in market societies and the need for auditing skills has risen in line with globalization. This textbook provides a comprehensive overview of the role of financial statement auditing in contemporary society, including the auditor's role in evaluating the financial reporting of an auditee—a topic of central concern in the recent comprehensive review of the auditing profession in the Brydon Report (2019). The experienced authors provide insight into auditing research to help readers understand its function, regulation, and role in theory and practice. With focus on private sector financial statement auditing and its regulation, the book includes perspectives on social theory, history, and the importance of professional standards. The thought-provoking final chapter challenges students to consider the effectiveness of auditing in

evaluating increasingly risky and complex accounting estimates involving assumptions about future events. A fundamental approach to auditing theory, this textbook will be useful reading for advanced undergraduate and postgraduate students across business and accounting fields.

In *Current Issues in Convention and Exhibition Facility Development*, you'll find diverse perspectives from experts in a range of disciplines—including public policy, tourism, convention management, and urban planning. As more communities attempt to gain a share of the economically important meetings and exhibition market, this critical resource will aid university faculty, state and city government officials, and convention and visitors' bureaus. *Current Issues in Convention and Exhibition Facility Development* examines the reasons why certain communities should create convention, event, or tourism centers. The strategies and tips presented in this book can help you select the most appropriate course of action for any given community, from locating the best area to build a center, to allocating space for an exhibition center in an already existing public building. This extensive guide addresses the political, economical, and environmental concerns that can prevent a convention center

from ever leaving the drawing board. This book offers you practical advice on a number of concepts, including: linear planning in the first phase—ten questions communities must confront Dedicated Convention Centers (DCC)—the “mother lode” of convention/exhibit tourism capitalizing on the union of two industries—conventions and casinos the definition of “success” in the lifetime of a convention center capturing a share of the market without interfering with local venues the facts behind the illusions—investigating the empirical evidence behind the central myths of the convention and tradeshow industry Current Issues in Convention and Exhibition Facility Development is generously enhanced with figures, tables, models, and case studies to illuminate the facts you need to know to stay competitive.

**Sport, Events, Tourism and Regeneration** Nicholas Wise, John Harris, 2017-02-17 Investments in sport, events and tourism in cities and wider regions are part of nascent regeneration strategies linked to transitioning economic bases and place images. While it is important to consider physical regeneration, there is a range of subsequent benefits and opportunities brought about through regeneration that considers social impacts, communities and how investments and developments influence how people interact in transformed spaces. This book brings together a collection focusing on the diverse range of approaches and perspectives of regeneration. Twelve chapters outline and bring together critical perspectives of regeneration from scholars in different parts of the world. This collection critically assesses some of the key factors impacting upon regeneration initiatives in relation to sport, events and tourism. By doing so, this book assesses if new opportunities have arisen from developments, increasing the demands and needs of locals and tourists, or if transformations result in exclusion - thus

challenging who regeneration is for. This book will be valuable reading for students and academics interested in tourism studies, events planning, sport and leisure studies or development studies, as well as the wider social sciences.

Financial Failures and Scandals Krish Bhaskar, John
