📖 Assessing Aid for Trade Mohammad A Razzaque,Dirk Willem te Velde,2013-11-25 Aid for Trade (AfT) has been an integral part of official development assistance (ODA) since its inception at the World Trade Organization's Hong Kong Ministerial in 2005. While many observers agree that the initiative has generated momentum in securing more trade support, the policy discourse on AfT continues to be vibrant and dynamic. This volume, comprising 16 chapters prepared by 20 renowned experts from a range of international organisations, think tanks and academic institutions, including Commonwealth Secretariat, ODI, ECDPM, DIE, ICTSD, Saana Consulting, WTI Advisors, and Columbia University, provides a comprehensive review of the Aid for Trade initiative. Part I of this volume uses quantitative and qualitative analysis to examine the effectiveness of different components of Aid for Trade and underlying factors affecting the outcomes. Part II provides analyses of current issues, including regional AfT, global value chains, infrastructure for development for agriculture, AfT adjustment and lessons from emerging economies in aiding exports. Part III looks to the future, proposing a range of possible directions including an alternative way to improve trade outcomes for developing countries from Nobel Prize-winning economist Joseph Stiglitz.

📖 Pervasive Powers Sara Angeli Aguiton,Marc-Olivier D'Plaude,Nathalie Jas,Emmanuel Henry,Valentin Thomas,2021-09-23 In an era of systemic crisis and of global critiques of the unsustainable perpetuation of capitalism, Pervasive Powers: The Politics of Corporate Authority critically questions the conditions for the maintenance and expansion of corporate power. The book explores empirical case studies in the realms of finance, urban policies, automobile safety, environmental risk, agriculture, and food in western democracies. It renews understanding of the power of big business, focusing on how the study of temporalities, of multi-sited influence and of sociotechnical tools is crucial to an analysis of the evolution of corporate authority. Drawing on different literatures, ranging from research on business associations and global governance to that on the social production of ignorance or on corporate crime, this book aims at contributing to existing works on the capacity of corporations to rule the world. Unlike approaches focused on economic elites and on the political activities of firms, it goes beyond analysis of the power of corporations to influence policy-making to depict their unprecedented capacity to transform and shape the social world. Operating in numerous social spaces and mobilizing a wide range of strategies, corporate organizations have acquired the pervasive power to act far beyond mere spaces of regulation and government. Based on contributions from historians, science and technology studies scholars, sociologists and political scientists, this book will be of great interest to researchers, academics and students who wish to understand how corporations exert a pervasive influence on public policies, and to NGOs and regulatory agencies.

📖 Infrastructure as Business James McKellar,2023-09-05 Infrastructure as Business brings new emphasis and clarity to the importance of private investment capital in large-scale infrastructure projects, introducing investors, policymakers, and other stakeholders to a key element that is surprisingly absent from the discourse on public-private partnerships. Despite the importance of modernizing infrastructure across the globe, governments often face challenges in securing the necessary capital to meet future need, as well as developing policy to meet these goals. Explaining the structure of the private investment universe and flow of private capital in such projects, this book ambitiously aims to bridge this infrastructure gap by elucidating shared terminology, conceptual frameworks, and an alignment of goals and objectives between public and private sectors—essential to meet increasing environmental, social, and governmental requirements for infrastructure in coming years. Appropriate for graduate-level courses in real estate, public policy, and urban planning that focus on infrastructure, project finance, and procurement and delivery models such as PPPs. Provides a clear understanding of private investment and PPPs to the investment community as well as professionals in real estate, project finance, and related fields, who often learn mostly on-the-job and from colleagues. Equips government officials and policymakers with key terms and concepts needed to sit across the table with private financiers and explore opportunities for private capital investment in early project stages. Outlines communication strategies for both public and private sectors, which will increasingly need to collaborate to address climate change, respond to new technologies, and develop efficient ways to deliver services. Written to engage academic, private investment, and public policy/governance audiences alike, Infrastructure as Business: The Role of Private Investment Capital invites discussion and opens doors to advancing new business models, with international applications, to offer increased value for private investors as well as more efficient, flexible funding for innovative infrastructure development in the future.

📖 Financialising City Statecraft and Infrastructure Andy Pike,Peter O'Brien,Tom Strickland,John Tomaney,2019 Financialising City Statecraft and Infrastructure addresses the struggles of national and local states to fund, finance and govern urban infrastructure. It develops fresh thinking on financialisation and city statecraft to explain the socially and spatially uneven mixing of managerial, entrepreneurial and financialised city governance in austerity and limited decentralisation across England. As urban infrastructure fixes for the London global city-region risk undermining national 'rebalancing' efforts in the UK, city statecraft in the rest of the country is having uneasily to combine speculation, risk-taking and prospective venturing with co-ordination, planning and regulation.

Riad Shams,Evangelos Tsoukatos,2023-11-01 Part of a two-volume work, this book explores how businesses shape, and are shaped by, sustainability forces and phenomena. These evolutionary transformations have driven scholars, practitioners and decision makers to pay increased attention to sustainability as an integral part of business development. Consequently, and congruently, companies, organisations and governments are modifying their philosophy, processes, activities, and communications, at both the micro- and macro-foundational levels, to comply and adapt to the new realities. Reflecting the purpose of the series, both volumes offer a cross-section of multi-disciplinary perspectives within business studies. Volume 1 focuses on strategic and managerial approaches to sustainability in business, including accounts on the historic origins of sustainability and its contemporary corporate sustainable models. Volume 2 explores, more contextually, how business and social sustainability constitute indivisible and inextricable components of the same nexus. Taken together, they offer an original perspective on how businesses can help achieve the SDG goals and targets.

📖 PROCEEDINGS OF THE INTERNATIONAL CONFERENCE THEORY AND APPLICATIONS IN THE KNOWLEDGE ECONOMY TAKE 2017 Blazenka Knezevic,Gaby Neumman ,2017-07-08 FOREWORD A famous Portuguese poet once said around one hundred years ago; “before I was born all the words that should save the humanity had already been written., the only thing that was missing was to save humanity.” Fast forward to the 21st century services led and knowledge based economy, and we have myriads of theoretical study about the decisive assets - namely intangibles. Those analysis are made in several perspectives, namely human resources, knowledge management, intellectual capital, and also many sectorial perspectiveslike trade, economics, logistics, social policy etc. However, today the question about the applicability of all these studies remains unsolved. So, it like, many of the words that will save the knowledge economy have already been written, all we need is to save the knowledge economy...Or is it not? The idea behind TAKE conference was to provide a multidisciplinary forum in which those multiple perspectives will come together. We believe it is a fruitful operation and we intend to continue the exercise in the future. The problem of the relation between theory and practice in the knowledge economy is getting more important and not lessimportant with the development of the BRICS and other nations. TAKE main question will be one of the problems of the 21st century. Following the promising start of TAKE 2016 in Aveiro, Portugal, TAKE 2017 was organized by the Faculty of Economics of Zagreb University, around Prof. Blazenka Knezevic. I would like to thank her and her team for the massive effort in putting TAKE 2017 together. It will be a very nice and memorable conference. I would like also to thank the 5 keynotes, the special sessions and workshop organizes, the authors of the 60 papers and 5 posters, the stream leaders, the reviewers and the sponsors for the efforts. And to the 90 participants from 20 countries: Austria, Bosnia-Herzegovina, Canada, Croatia, Germany, Hong Kong, Hungary, Netherlands, Mexico, Portugal, Poland, Romania, Russia, South Africa, Serbia, Slovakia, Spain, Thailand, United Kingdom, United States. A special word to Prof. Gaby Neumann from Wildau who organized the proceedings. Let us make TAKE 2017 a great occasion and help save the knowledge economy a bit. 📖 NEW THINKING = NEW IRELAND Louise Hodgson,2013-09-13 Have you had enough of politicians’ rhetoric, or of the failure of tired institutions to keep up with our rapidly changing world? Then meet the young, new thinkers of Ireland as they share their vision for the future. Here, twenty-one of our leading creative thinkers and problem-solvers rip up the rule book and start again, presenting a new vision for Ireland. They cover a diverse range of topics that affect all our lives, from art to diaspora, religion to research and banking. These are tomorrow’s leaders, and the future is bright. Some essays propose radical ideas - imagine democratically run companies, three-day working weeks, a Google bank, and safer roads bereft of signs or markings - while others outline simple reforms that can help Ireland become a global leader. In most instances, contributors have looked to the past to inform their vision of the future. In others, they have drawn on contemporary success stories. This is a book about being Irish, about being resilient and, as surprising as it may sound, about overcoming current hardships to stand as a model for other countries to follow.
