The Rise and Development of FinTech Robin Teigland, Shahryar Siri, Anthony Larsson, Alejandro Moreno Puertas, Claire Ingram Bogusz, 2018-02-15 This comprehensive guide serves to illuminate the rise and development of FinTech in Sweden, with the Internet as the key underlying driver. The multiple case studies examine topics such as: the adoption of online banking in Sweden; the identification and classification of different FinTech categories; process innovation developments within the traditional banking industry; and the Venture Capital (VC) landscape in Sweden, as shown through interviews with VC representatives, mainly from Sweden but also from the US and Germany, as well as offering insight into the companies that are currently operating in the FinTech arena in Sweden. The authors address questions such as: How will the regulatory landscape shape the future of FinTech companies? What are the factors that will likely drive the adoption of FinTech services in the future? What is the future role of banks in the context of FinTech and digitalization? What are the policies and government initiatives that aim to support the FinTech ecosystem in Sweden? Complex concepts and ideas are rendered in an easily digestible yet thought-provoking way. The book was initiated by the IIS (the Internet Foundation in Sweden), an independent organization promoting the positive development of the Internet in the country. It is also responsible for the Internet's Swedish top-level domain .se, including the registration of domain names, and the administration and technical maintenance of the national domain name registry. The book illustrates how Sweden acts (or does not act) as a competitive player in the global FinTech arena, and is a vital addition to students and practitioners in the field.

Effective Business Intelligence Systems Robert J. Thierauf, 2001-06-30 One step above knowledge management systems are business intelligence systems. Their purpose is to give decision makers a better understanding of their organization's operations, and thus another way to outmaneuver the

competition, by helping to find and extract the meaningful relationships, trends, and correlations that underlie the organization's operations and ultimately contribute to its success. Thierauf also shows that by tying critical success factors and key performance indicators into business intelligence systems, an organization's most important financial ratios can also be improved. Comprehensive and readable, Thierauf's book will advance the knowledge and skills of all information systems providers and users. It will also be useful as a text in upper-level courses covering a wide range of topics essential to an understanding of executive business systems generally, and specifically their creation and management. The theme underlying Thierauf's unique text is that a thorough understanding of a company's operations is crucial if the company is to be moved to a higher level of competitive advantage. Although data warehousing, data mining, the Internet, the World Wide Web, and other electronic aids have been in place for at least a decade, it is the remarkable and unique capability of business intelligence systems to utilize them that has in turn revolutionized the ability of decision makers to find, accumulate, organize, and access a wider range of information than was ever before possible. Effective business intelligence systems give decision makers a means to keep their fingers on the pulse of their businesses every step of the way. From this it follows that they are thus able to develop new, more workable means to cope with the competition successfully. Comprehensive and readable, Thierauf's book will advance the knowledge and skills of all information systems providers and users. It will also be useful as a text in upper-level courses covering a wide range of topics essential to an understanding of executive business systems generally, and specifically their creation and management.

Understanding a Changing China Howard Davies, Matevž Rašković, 2017-08-23 As China becomes the world's largest economy, so it becomes important to understand the key issues shaping the country's business environment and the behaviour of Chinese businesspeople. This is difficult because those issues are contested. Is China growing at 3% or 8%? Is the Chinese consumer going to save the world? Are state-owned enterprises national champions or zombies? Have we reached the end of Cheap China? Can China innovate? Is business still dominated by personal connections? Are markets or the state in control? Does Chinese culture impede or support organizational effectiveness? Are Chinese dragons at your door? Will the finance and property sectors implode? Is the Chinese model sustainable, or will it end in tears? On all these issues there is ill-informed noise, and an abundance of partisan interpretations. The purpose of this book, therefore, is to provide an even-handed analysis of the key issues that will shape the threats and opportunities arising from China's development in the next decade. It cannot resolve the competing claims made. However, it does provide the reader with the ideas and the sources of evidence needed to understand and to make well thought-out judgments as China continues to evolve.

Comparative Law Yearbook of International Business Volume 43 Christian Campbell, 2021-11-11 The Comparative Law Yearbook of International Business, published under the auspices of the Center for International Legal Studies, in this 43rd volume spans an arc of timely and challenging concerns for business law practitioners and academics alike. It discusses: how arbitrability of intellectual property rights disputes might improve worldwide IPR enforcement; how the "disregard of legal entity" may be used to establish implied consent by a person or entity that is not a signatory to an arbitration agreement; how an effective cross-border insolvency framework under the Indian insolvency and bankruptcy code can borrow from the UNCITRAL Model Law's and other jurisdictions'

approaches to the tension between “universality” and “territoriality”; how a promising new mediation act for Pakistan may help resolve a backlog of millions of cases in a jurisdiction with a patchwork of traditional and modern alternative dispute resolution mechanisms; how the European Union seeks to balance the taxation of digital services; how Brazil is addressing the taxation of offshore indirect transfers; how private equity capital structures in the unique market of professional sports create opportunities as well as risks; how Securities Market Regulation theory plays a role in the organization and development of active securities markets, particularly in emerging markets; and how non-signatories can be bound by arbitration agreements in Brazil through “disregard of legal entity” to ascertain implied consent. The authors are practitioners and academics from Brazil, England, France, India, Pakistan, Singapore, the United States and Uzbekistan. They offer a broad and diverse perspective on some of today’s pressing business law issues in a shrinking world.
