Production Management and Business Development Bohuslava Mihalčová, Petra Szaryszová, Lenka Štofová, Michal Pružinský, Barbora Gontkovičová, 2018-12-07 Trends in economic development rely on increasing human knowledge, which stimulate the development of new, sophisticated technologies. With their utilization production is raised and the intent is to decrease natural resources consumption and protect and save our life environment as much as we can. At the same time, increasing pressure is observed both from competition and customers. The way to be competitive is by improving manufacturing and services offered to the customer. These are the major challenges of contemporary enterprises. Organizations are improving their activities and management processes. This is necessary to manage the seemingly intensifying competitive markets successfully. Enterprises apply business-optimizing solutions to meet new challenges and conditions. This way ensuring effective development for long-term competitiveness in a global environment. This is necessary for the implementation of qualitative changes in the industrial policy. *Process Control and Production Management (MTS 2018)* is a collection of research papers from an international authorship. The authors present case studies and empirical research, which illustrates the progressive trends in business process management and the drive to increase enterprise sustainability development.

New Public Management (NPM) and the Introduction of an Accrual Accounting System Adriana Bruno, 2020-09-22 In recent decades, the dissemination and the adoption of new public management (NPM) have been significant within the new public sector. One key innovation is the adoption of accrual accounting from business enterprise. The unresolved question is, what does accrual accounting mean in practice for government? This book analyzes the initial stage of development of an accrual accounting system in the context of regional government in Italy. It presents the accrual accounting system as a new technology and contributes to understanding of neutral tools involved in a public sector reform.

Management Strategies for Sustainability, New Knowledge Innovation, and Personalized Products and Services Pejic-Bach, Mirjana, Do?ru, Ça?lar, 2022-01-14 In today's changing business environment, managers and employees need essential capabilities such as innovativeness to successfully reach organizational goals. In this digitalized era, it is obvious that undigitized firms and organizations will not survive changing demands unless they can quickly adapt and form new business strategies. The upcoming era necessitates a digital transformation in all institutions from government to the non-profit sector. In such a change-oriented and complex business era, both entrepreneurs and leaders must keep up with the latest developments around them. *Management Strategies for Sustainability, New Knowledge Innovation, and Personalized Products and Services* discusses the emerging topics of digital transformation, new knowledge innovation, sustainability, and personalized products and services and provides a theoretical infrastructure to share the latest empirical research findings within management, knowledge creation, sustainability practices, artificial intelligence, and digital business functions and strategies. Covering a wide range of topics such as Industry 4.0 and user satisfaction, it is ideal for industry professionals, practitioners, consultants, educators, scholars, researchers, academicians, and students.

Sustainability and Management Kıymet Çalıyurt, Ülkü Yüksel, 2017-07-14 In the wake of the 1987 Brundtland Report, sustainable development has become key to the management systems within businesses, and a means by which companies can increase their long-term value. Being a 'sustainable company' increasingly means 'staying alive in business' and has become a necessity for all kinds of enterprises, from the micro-sized to global corporations. In more recent years, many companies, and indeed governments, have looked at sustainability as a means to combat the

multiple challenges of environmental accidents, global warming, resource depletion, energy, poverty and pollution. However, being sustainable or maintaining sustainability is not an easy task for a company's management function. It needs continuous support and engagement from the board, the executive management, staff and other stakeholders alike. Additionally, it brings extra costs to the company in terms of hiring trained staff, organising continuous training in the company, publishing sustainability reports and subscribing to a rating system. Sustainability must be nourished by a company's board as well as by all of its departments, such as accounting, marketing and human resources. By the same token, it is not enough for a company simply to declare itself a 'sustainable business' or rely on past measures and reputation; sustainability is an ongoing activity and one which has to be proved by periodically disclosing sustainability reports, according to international rating systems. In *Sustainability and Management: An International Perspective*, Kıymet Çalıyurt and Ülkü Yüksel bring together international authors from a variety of specialisations to discuss the development, aspects, problems, roadmap, trends and disclosure systems for sustainability in management. The result is a lively, insightful exposition of the field.

Principles of External Auditing Brenda Porter, Jon Simon, David Hatherly, 2014-03-03 Principles of External Auditing has become established as one of the leading textbooks for students studying auditing. Striking a careful balance between theory and practice, the book describes and explains, in non-technical language, the nature of the audit function and the principles of the audit process. The book covers international auditing and accounting standards and relevant statute and case law. It explains the fundamental concepts of auditing and takes the reader through the various stages of the audit process. It also discusses topical aspects of auditing such as legal liability, audit risk, quality control, and the impact of information technology. Brenda Porter is currently visiting Professor at Exeter University and Chulalongkorn University, Bangkok.

Benefits Realization Management Carlos Eduardo Martins Serra, 2016-10-14 Benefits realization management (BRM) is a key part of governance, because it supports the strategic creation of value and provides the correct level of prioritization and executive support to the correct initiatives. Because of its relevance to the governance process, BRM has a strong influence over project success and is a link between strategic planning and strategy execution. This book guides portfolio, program, and project managers through the process of benefits realization management so they can maximize business value. It discusses why and how programs and projects are expected to enable value creation, and it explains the role of BRM in value creation. The book provides a flexible framework for: Translating business strategy drivers into expected benefits and explains the subsequent composition of a program and project portfolio that can realize expected benefits Planning the benefits realization expected from

programs and projects and then making it happen Keeping programs and projects on track Reviewing and evaluating the benefits achieved or expected against the original baselines and the current expectations. To help project, program, and portfolio managers on their BRM journey, as well as to support business managers in executing business strategies, the book identifies key organizational responsibilities and roles involved in BRM practices, and it provides a simple reference that can be mapped against any organizational structure. A detailed and comprehensive case study illustrates each phase of the BRM framework as it links business strategy to project work, benefits, and business value. Each chapter ends with a series questions that provide a BRM self-assessment. The book concludes with a set of templates and detailed instructions to ensure successful deployment of BRM.

Machine Learning Applications for Accounting Disclosure and Fraud Detection Papadakis, Stylianos,Garefalakis, Alexandros,Lemonakis, Christos,Chimonaki, Christiana,Zopounidis, Constantin,2020-10-02 The prediction of the valuation of the “quality” of firm accounting disclosure is an emerging economic problem that has not been adequately analyzed in the relevant economic literature. While there are a plethora of machine learning methods and algorithms that have been implemented in recent years in the field of economics that aim at creating predictive models for detecting business failure, only a small amount of literature is provided towards the prediction of the “actual” financial performance of the business activity. Machine Learning Applications for Accounting Disclosure and Fraud Detection is a crucial reference work that uses machine learning techniques in accounting disclosure and identifies methodological aspects revealing the deployment of fraudulent behavior and fraud detection in the corporate environment. The book applies machine learning models to identify “quality” characteristics in corporate accounting disclosure, proposing specific tools for detecting core business fraud characteristics. Covering topics that include data mining; fraud governance, detection, and prevention; and internal auditing, this book is essential for accountants, auditors, managers, fraud detection experts, forensic accountants, financial accountants, IT specialists, corporate finance experts, business analysts, academicians, researchers, and students.

LEAD: Leadership Effectiveness in Africa and the African Diaspora Terri R. Lituchy,Bella L. Galperin,Betty Jane Punnett,2016-11-02 This book considers the new business environment of modern-day Africa, addressing how management styles must adapt to societal changes across the continent. As investment in the continent grows and African businesses begin to look beyond their own borders, there comes a real need to understand leadership from an Afro-centric perspective. This book explores the similarities and differences across African countries, compares them with other regions, and identifies particular cultural realities that managers must consider in order to be successful in the new business environment of modern Africa. Building on their Leadership Effectiveness in Africa and the African Diaspora (LEAD) research project, the authors provide an empirical understanding of African leadership styles and how businesses can harness these more effectively. Drawing on the African Diaspora’s values, beliefs, and preferences, as well as anecdotal material from African academics and managers, this book grants a realistic view of leadership in various African countries including Egypt, Ghana,

Nigeria, Kenya, Tanzania, Uganda, Ethiopia, and South Africa. It will be invaluable to academics, students, and anyone interested in African and global business leadership from a non-Western perspective.

Cloud Technology: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2014-10-31 As the Web grows and expands into ever more remote parts of the world, the availability of resources over the Internet increases exponentially. Making use of this widely prevalent tool, organizations and individuals can share and store knowledge like never before. *Cloud Technology: Concepts, Methodologies, Tools, and Applications* investigates the latest research in the ubiquitous Web, exploring the use of applications and software that make use of the Internet's anytime, anywhere availability. By bringing together research and ideas from across the globe, this publication will be of use to computer engineers, software developers, and end users in business, education, medicine, and more.

International Dimensions of Sustainable Management René Schmidpeter, Nicholas Capaldi, Samuel O. Idowu, Anika Stürenberg Herrera, 2019-05-21 This book provides a rich collection of essays discussing and showcasing the transformation of businesses around the world towards sustainability and responsibility. Based on a framework of global theoretical approaches, it presents practical examples and cases from a variety of industries, regions and corporate functions. It also highlights the latest insights on how corporations consider sustainability in the governance of their respective organization. Furthermore, the book features a section dedicated to responsible finance, and outlines business and management-driven approaches that contradict the traditionally held belief that a trade-off exists between sustainability, social responsibility and profit.

Expert Systems in Finance Noura Metawa, Mohamed Elhoseny, Aboul Ella Hassanien, M. Kabir Hassan, 2019-05-10 Throughout the industry, financial institutions seek to eliminate cumbersome authentication methods, such as PINs, passwords, and security questions, as these antiquated tactics prove increasingly weak. Thus, many organizations now aim to implement emerging technologies in an effort to validate identities with greater certainty. The near instantaneous nature of online banking, purchases, transactions, and payments puts tremendous pressure on banks to secure their operations and procedures. In order to reduce the risk of human error in financial domains, expert systems are seen to offer a great advantage in big data environments. Besides their efficiency in quantitative analysis such as profitability, banking management, and strategic financial planning, expert systems have successfully treated qualitative issues including financial analysis, investment advisories, and knowledge-based decision support systems. Due to the increase in financial applications' size, complexity, and number of components, it is no longer practical to anticipate and model all possible interactions and data processing in these applications using the traditional data processing model. The emergence of new research areas is clear evidence of the rise of new demands and requirements of modern real-life applications to be more intelligent. This book provides an exhaustive review of the roles of expert systems within the financial sector, with particular reference to big data environments. In addition, it offers a collection of high-quality research that addresses broad challenges in both theoretical and application aspects of intelligent and expert systems in finance. The

book serves to aid the continued efforts of the application of intelligent systems that respond to the problem of big data processing in a smart banking and financial environment.

When Numbers Don't Add Up Faisal Sheikh, 2020-12-02 The author contextualized the phenomenon of accounting fraud using a framework he developed called "Corporate Governance Cosmos." The book contains an extensive literature review including an evaluation of the seminal theory in this area, namely, the Fraud Triangle. There is a comprehensive exploration of the motivations for accounting fraud and a growing realization that Dark Triad (psychopathy, narcissism, and machiavellianism) tendencies may explain why executives engage in accounting fraud. The author expands an established framework entitled Cooks Recipes Incentives Monitoring End results (C R I M E) by Rezaee (2005), to "C R I M E L", where L is the "Learning" from 33 international case studies of accounting fraud. Accountants, auditors, antifraud practitioners, and graduate students will find the case studies of accounting fraud particularly useful as it makes the phenomenon tangible and more understandable. The penultimate chapter is a study of the likely impact of financial technology on accounting fraud. The author concludes by marshalling various insights including a brief discussion of ethics, forwarding his International Code of Ethics for Professional Accountants (IFAC) "Ethical Triangle", his vision for the future accountant, which he refers to as "accounting engineers", and an ancient prescription for the curse of accounting fraud.

Advance Pricing Agreements Michelle Markham, 2012-06-28 Transfer pricing (the pricing of cross-border intra-firm transactions between related parties) is now the top international tax issue faced by multinational enterprises. In an international taxation environment characterized by rigorous enforcement of transfer pricing documentation, disclosure, and audit processes, a need has arisen for multinationals to be cognizant of the impact of their 'tax risk appetite' on their relationship with taxation authorities and to be aware of how best to manage their transfer pricing arrangements. The most promising development has been the growing commitment to Advance Pricing Agreements (APAs) – arrangements made prospectively between a multinational taxpayer and one or more revenue authorities, agreeing on an appropriate set of criteria for the determination of the transfer pricing of the covered transactions over a period of time. This is the first book to offer expert insights on APAs from a practical perspective. By focusing on the United States and Australia, the two countries that were at the forefront of adopting APAs and whose wealth of experience over two decades confirms their APA programs as the global paradigms, the author is able to highlight the advantages and disadvantages of pursuing an APA and to shed light on the powerful efficacy of this strategy for avoiding transfer pricing disputes. In addition, the author enlists the views of revenue authorities, transfer pricing practitioners, and corporate counsel who deal with the realities of transfer pricing assessment and compliance on an ongoing basis, offering acute insight into how APAs really work in a practical way. This book contributes to the body of knowledge on APAs in the context of transfer pricing by providing in-depth scrutiny of the most important issues surrounding this critical area, and by examining innovations in APAs in the United States and in Australia. Its unmatched coverage will be welcomed by tax experts at law firms and multinational companies as well as by revenue officials, policymakers, and scholars

and researchers in international taxation.

Supply Chain Design and Management for Emerging Markets Wojciech Piotrowicz, Richard Cuthbertson, 2015-04-16 This book focuses on supply chain management in emerging markets. The authors present issues relating to supply chain development covering countries such as Brazil, China, the Czech Republic, Russia, Indonesia, Malaysia, Nepal, Turkey, Egypt and South Africa and focuses on the challenges faced when the supply chain is designed and maintained. Such challenges derive from issues to do with risk, security, quality management and infrastructure among others. Case studies and survey results are presented in chapters which explore practical solutions to these issues. The latter will be of interest not only to local and international managers, but also to students who are interested in emerging economies. The book covers manufacturing, retail and food chains at the local and international levels.
