Pathways to Modern Chemical Physics Salvatore Califano, 2012-05-26 In this historical volume Salvatore Califano traces the developments of ideas and theories in physical and theoretical chemistry throughout the 20th century. This seldom-told narrative provides details of topics from thermodynamics to atomic structure, radioactivity and quantum chemistry. Califano's expertise as a physical chemist allows him to judge the historical developments from the point of view of modern chemistry. This detailed and unique historical narrative is fascinating for chemists working in the fields of physical chemistry and is also a useful resource for science historians who will enjoy access to material not previously dealt with in a coherent way.

Popol Vuh Dennis Tedlock, 2013-02 *Popol Vuh*, the Quiché Mayan book of creation is not only the most important text in the native language of the Americas, it is also an extraordinary document of the human imagination. It begins with the deeds of Mayan Gods in the darkness of a primeval sea and ends with the radiant splendor of the Mayan Lords who founded the Quiché Kingdom in the Guatemalan highlands. Originally written in Mayan hieroglyphs, it was translated into the Roman alphabet in the 16th century. The new edition of Dennis Tedlock's unabridged, widely praised translation includes new notes and commentary, newly translated passages, newly deciphered hieroglyphs, and over 40 new illustrations.

The Life, Science and Times of Lev Vasilevich Shubnikov L. J.

Reinders, 2018-02-27 This book describes the life, times and science of the Soviet physicist Lev Vasilevich Shubnikov (1901-1937). From 1926 to 1930 Shubnikov worked in Leiden where he was the co-discoverer of the Shubnikov-De Haas effect. After his return to the Soviet Union he founded in Kharkov in Ukraine the first low-temperature laboratory in the Soviet Union, which in a very short time became the foremost physics institute in the country and among other things led to the discovery of type-II superconductivity. In August 1937 Shubnikov, together with many of his colleagues, was arrested and shot early in November 1937. This gripping story gives deep insights into the pioneering work of Soviet physicists before the Second World War, as well as providing much previously unpublished information about their brutal treatment at the hands of the Stalinist regime.

Corpse Whale dg nanouk okpik, 2012-11-10 A self-proclaimed "vessel in which stories are told from time immemorial," poet dg nanouk okpik seamlessly melds both traditional and contemporary narrative, setting her apart from her peers. The result is a collection of poems that are steeped in the perspective of an Inuit of the twenty-first century—a perspective that is fresh, vibrant, and rarely seen in contemporary poetics. Fearless in her craft, okpik brings an experimental, yet poignant, hybrid aesthetic to her first book, making it truly one of a kind. "It takes all of us seeing, hearing, touching, tasting, and smelling to be one," she says, embodying these words in her work. Every sense is amplified as the poems, carefully arranged, pull the reader into their worlds. While each poem stands on its own, they flow together throughout the collection into a single cohesive body. The book quickly sets up its own rhythms, moving the reader through interior and exterior landscapes, dark and light, and other spaces both ecological and spiritual. These narrative, and often visionary, poems let the lives of animal species and the power of natural processes weave into the human psyche, and vice versa. Okpik's descriptive rhythms ground the reader in movement and music that transcend everyday logic and open up our hearts to the richness of meaning available in the interior and exterior worlds.

Last Chapter Ernie Pyle, 2015-11-06 "No man in this war has so well told the story of the American fighting man as American fighting men wanted it told," wrote Harry Truman. "He deserves the gratitude of all his countrymen." THIS is the final book of Ernie Pyle's war reporting. After Africa, Italy, and D-Day on the European continent, Pyle took it the hard way again. There was still the Pacific war to win, and where the fighting was Ernie had to go, soul-sick though he was with the thousands of scenes of death and destruction he had already witnessed. He was attached to the Navy early in 1945. In the Marianas first and then living with the boys who flew the B-29s over the Japanese homeland, Pyle was experiencing a side of the war that was new to him. Next he joined an aircraft carrier on the invasion of Okinawa. He made the landing with the Marines and saw Okinawa secured. Then his luck ran out. A Japanese bullet killed Ernie Pyle on April 17th, 1945 on Ie Shima, and Americans lost their greatest and best-loved correspondent. Millions mourned the going of this modest man who wrote of the war with all honesty and no pretensions, and whose writings will stand as one of the most vital records of the struggle. LAST CHAPTER is a brief, brave little book to complete that record permanently. There is a sixteen-page picture section and an index of names and places.

Spinal Catastrophism Thomas Moynihan, 2019-12-03 The historical continuity of spinal catastrophism, traced across multiform encounters between philosophy, psychology, biology, and geology. Drawing on cryptic intimations in the work of J. G. Ballard, Georges Bataille, William Burroughs, André Leroi-Gourhan, Elaine Morgan, and Friedrich Nietzsche, in the late twentieth century Daniel Barker formulated the axioms of spinal catastrophism: If human morphology, upright posture, and the possibility of language are the ramified accidents of natural history, then psychic ailments are ultimately afflictions of the spine, which itself is a scale model of biogenetic trauma, a portable map of the catastrophic events that shaped that atrocity exhibition of evolutionary traumata, the sick orthograde talking mammal. Tracing its provenance through the biological notions of phylogeny and "organic memory" that fueled early psychoanalysis, back into idealism, nature philosophy, and romanticism, and across multiform encounters between philosophy, psychology, biology, and geology, Thomas Moynihan reveals the historical continuity of spinal catastrophism. From psychoanalysis and myth to geology and neuroanatomy, from bioanalysis to chronopathy, from spinal colonies of proto-minds to the retroparasitism of the CNS, from "railway spine" to Elizabeth Taylor's lost gill-slits, this extravagantly comprehensive philosophical adventure uses the spinal cord as a guiding thread to rediscover forgotten pathways in modern thought. Moynihan demonstrates that, far from being a fanciful notion rendered obsolete by advances in biology, spinal catastrophism dramatizes fundamental philosophical problematics of time, identity, continuity, and the transcendental that remain central to any attempt to reconcile human experience with natural history.

Shetani's Sister Iceberg Slim, 2015-08-04 From the multi-million copy master of vernacular black literature and pioneer of hip hop culture, a masterpiece of crime fiction set in Los Angeles' meanest, toughest streets. Here is the newly discovered novel by Iceberg Slim, the creator and undisputed master of African-American street literature, a man who profoundly influenced hip hop and rap culture and probably has sold more books than any other black American author of the twentieth century (not that he saw the royalties from those sales). In many ways Iceberg Slim's most mature fictional work, Shetani's Sister relates, in taut, evocative vernacular torn straight from the street corner, the deadly duel between two complex antiheroes: Sergeant Russell Rucker, an LAPD vice detective attempting to clean up street

prostitution and police corruption, and Shetani (Swahili for Satan), a veteran master pimp who controls his stable of whores with violence and daily doses of heroin.

The Five Percenter Michael Muhammad Knight, 2013-10-01 From Malcom X to the Wu Tang Clan, the first in-depth account of this fascinating black power movement With a cast of characters ranging from Malcolm X to 50 Cent, Knight's compelling work is the first detailed account of the movement inextricably linked with black empowerment, Islam, New York, and hip-hop. Whether discussing the stars of Five Percenter rap or 1980s crack empires, this fast-paced investigation uncovers the community's icons and heritage, and examines its growing influence in urban American youth culture.

Selfish Women Lisa Downing, 2019-05-24 This book proceeds from a single and very simple observation: throughout history, and up to the present, women have received a clear message that we are not supposed to prioritize ourselves. Indeed, the whole question of self is a problem for women - and a problem that issues from a wide range of locations, including, in some cases, feminism itself. When women espouse discourses of self-interest, self-regard, and selfishness, they become illegible. This is complicated by the commodification of the self in the recent Western mode of economic and political organization known as neoliberalism, which encourages a focus on self-fashioning that may not be identical with self-regard or self-interest. Drawing on figures from French, US, and UK contexts, including Rachilde, Ayn Rand, Margaret Thatcher, and Lionel Shriver, and examining discourses from psychiatry, media, and feminism with the aim of reading against the grain of multiple orthodoxies, this book asks how revisiting the words and works of selfish women of modernity can assist us in understanding our fraught individual and collective identities as women in contemporary culture. And can women with politics that are contrary to the interests of the collective teach us anything about the value of rethinking the role of the individual? This book is an essential read for those with interests in cultural theory, feminist theory, and gender politics.

The Phantom Blooper Gustav Hasford, 1990 Another major novel of the Vietnam experience from one of its most startling able chroniclers- and its predecessor. (book jacket.).

White Churches of the Plains Robert Adams, 1970

Navy V-12 Henry C. Herge, 1996-06-01 A history of the Navy V-12 Program during World War II. The Program provided opportunities for young men whose families had suffered during the difficult times of the Great Depression. These high school graduates were offered the golden opportunity to attend colleges and universities. At the end of the program, more than 60,000 U.S. Navy and USMC officers had entered the armed forces for the war. Many, also entered the U.S. Naval Reserve in the post-war period, and served in Korea and Vietnam. With photos -- 80+ pages of biographies of individual members of the program. Many include photos then and now.

Aberration in the Heartland of the Real Wendy S. Painting, 2016-04-19 Presenting startling new biographical details about Timothy McVeigh and exposing stark contradictions and errors contained in previous depictions of the All-American Terrorist, this book traces McVeigh's life from childhood to the Army, throughout the plot to bomb the Alfred P. Murrah Federal Building and the period after his 1995 arrest until his 2001 execution. McVeigh's life, as Dr. Wendy Painting describes it, offers a backdrop for her discussion of not only several intimate and previously unknown details about him, but a number of episodes and circumstances in American History as well. In *Aberration in the Heartland*, Painting explores Cold War popular culture, all-American apocalyptic fervor, organized racism, contentious politics, militarism, warfare, conspiracy theories, bioethical controversies, mind control, the media's construction of villains and demons, and institutional secrecy and cover-ups. All these stories are examined, compared, and tested in *Aberration in the Heartland of the Real*, making this book a much closer

examination into the personality and life of Timothy McVeigh than has been provided by any other biographical work about him
