Sweet Bloody Salty Clean Francesca Kritikos, 2023-08 A body minimizes and maximizes itself, the flavors are oversaturated and nonexistent, citizens are famished and gorged, cash is king, virtue weighs nothing. Characters contained: shepherds, little girls, baby elephants, Venus flytraps, grocery stores, famine, God, meat, and money.

Exercise in Desire Francesca Kritikos, 2022-02-11 I am completely enthralled by Francesca Kritikos' poetry. In *Exercise in Desire*, each poem is like a fishbone that has been picked clean, leaving behind only what is most essential, what is most true, with a piercing discernment that will steal your breath away. Kritikos is a genius at structure and provides the reader nowhere to hide. Her poems force us to acknowledge and live inside those degraded parts of ourselves, each of the untitled poems in this collection effortlessly building upon the previous one, ultimately culminating in the holy/unholy creation of an animal that is at once afraid, and in awe of, what it is capable of getting away with. What else can I say except-I devoured this book and immediately hungered for more.-Meghann Boltz, author of *Cautionary Tale* Francesca Kritikos' spare and severe poems in *Exercise in Desire* outline a female subject in all her discomforts and wants. One-part lover's discourse, one-part dark comedy, the sullen and yielding speaker in *Exercise in Desire* appeals to the side of me that enjoys Ingmar Bergman or Michael Haneke, Elfriede Jelinek or Ariana Reines. One thinks of a submissive animal, or how one's own suffering becomes timeless and universal. Kritikos is correct to understand that looking at pictures of the ocean is a more attractive idea than leaving the house, ever. *Exercise in Desire* is merciful and controlled, with an alluring vision and voice that is sure to win over lots of readers.-Ben Fama, author of *Deathwish*

EU Policy-Making on GMOs Mihalis Kritikos, 2017-11-02 This book examines the development and implementation of the EU's legislative framework on the commercial release of GMO products as a case study of social regulation operating within a predominantly technical framework. The analysis and findings are based on an extensive documentary analysis and interviews with regulators, risk assessors, public interest groups and biotechnology experts at the national and European levels. It argues that in the case of the EU biotechnology framework, the particular institutional settings created for the formulation and interpretation of its provisions have been of decisive importance in elaborating a proceduralised 'science-based' prior authorization scheme as the preferred framework for granting commercial permits. This interdisciplinary work will appeal to EU lawyers, decision-makers and risk managers as well as academics working in the fields of EU studies, politics, law, risk governance sociology of science/risk and technology assessment. The book is based on a PhD thesis that was awarded with the 2008 UACES Prize for the Best Thesis in European Studies in Europe and with the EPEES 1st Prize for the Best Thesis written by a Greek Researcher between 2004 and 2008.

Special Education Assessment Effie P. Kritikos, 2010 Making clear connections between assessment and instruction that so many similar texts lack, this first edition special education assessment textbook uses current research and standards-based assessment material grounded in field-based case studies to highlight the contemporary issues affecting students in classrooms today. With a strong emphasis on diversity, this robust and practical book offers current teachers and pre-service teachers alike an eye-opening and clear exploration of current formal and informal assessment tool analysis with respect to accommodations, modifications, legal and technology matters.

Real-life case studies are incorporated into each chapter, helping readers to hone their decision-making skills and to understand how the chapter material relates to practical applications. At the same time, break point practices, illustrations of assessment tools, and website references provide students with multiple opportunities for self-assessment, higher-level analysis and classroom applications.

Embodiment in Psychotherapy Gernot Hauke, Ada Kritikos, 2018-12-08 This groundbreaking clinical guide explores the theory behind embodiment in psychotherapy, the science that underlies its methods, and how this knowledge can offer greater depth to clinical practice. Experts across the cognitive and behavioral sciences analyze the complex roles of the body in helping create the self and convey agency, and the essential cognitive, emotional, and behavioral processes expressed in movement, gestures, and facial expressions. Diverse techniques are shown bridging gaps between emotional and bodily awareness and verbal and nonverbal communication to reinforce self-regulation, navigate social relationships, and support the therapeutic bond. These practical guidelines demonstrate the versatility of embodiment work in use with individuals, couples, and groups in addressing a wide range of emotional, interpersonal, and somatic concerns. Among the topics covered: · Embodiment as an organizing principle. · Generating body focus: the gate to embodied work and emotional awareness. · Embodiment of social interaction: our place in the world around us. · Resource activation: bringing values into the flesh. · Therapeutic alliance: grounding interaction in space. · The power of embodying values in work place teams. Expanding on while strengthening traditional theory and methods, Embodiment in Psychotherapy brings new directions in healing to researchers, clinicians, and psychotherapists of all schools in psychiatry, counseling, coaching, and social work, as well as psychology students, trainers, managers, and supervisors.

Lectures on Number Theory Adolf Hurwitz, 2012-12-06 During the academic year 1916-1917 I had the good fortune to be a student of the great mathematician and distinguished teacher Adolf Hurwitz, and to attend his lectures on the Theory of Functions at the Polytechnic Institute of Zurich. After his death in 1919 there fell into my hands a set of notes on the Theory of numbers, which he had delivered at the Polytechnic Institute. This set of notes I revised and gave to Mrs. Ferentinou-Nicolacopoulou with a request that she read it and make relevant observations. This she did willingly and effectively. I now take advantage of these few lines to express to her my warmest thanks. Athens, November 1984 N. Kritikos About the Authors ADOLF HURWITZ was born in 1859 at Hildesheim, Germany, where he attended the Gymnasium. He studied Mathematics at the Munich Technical University and at the University of Berlin, where he took courses from Kummer, Weierstrass and Kronecker. Taking his Ph. D. under Felix Klein in Leipzig in 1880 with a thesis on modular functions, he became Privatdozent at Göttingen in 1882 and became an extraordinary Professor at the University of Königsberg, where he became acquainted with D. Hilbert and H. Minkowski, who remained lifelong friends. He was at Königsberg until 1892 when he accepted Frobenius' chair at the Polytechnic Institute in Zürich (E. T. H.) where he remained the rest of his life.

The Law of Prosperity Sia Kritikos, 2013-12 The Law of Prosperity will teach you the basic elements of achieving prosperity. This book will explain the basic nature of prosperity; including how to achieve it, developing the proper mind for it, and steps to take to harness its many powers. To attain prosperity, it must first be conceived and then realized. This book will serve as a blueprint and is just one step toward unlocking the secrets of prosperity. "Part 1: Renewed in the Mind" talks about prosperity as first being conceived in the mind. Our thoughts contain the ingredients of prosperity. Positive thinking is essential, and depression is one's own choice. Recognizing problems is essential, and maintaining that one will be prosperous is important. The mind needs to be disciplined and honed to begin the journey to prosperity. One has to believe they are successful in order to thrive. Minds have to be set higher in life. Negativity is an impediment to success, and one must remove it from the psyche. This book explores the nature of competition as well. "Part 2: Resources" explains the different elements or resources that you can harness to achieve prosperity. This includes resourcefulness, focus, and emotion. Emotion is the ultimate resource of prosperity. We will explore how to define and shape our emotional focus to breed prosperity. Our needs must be fulfilled, and one you need a driving force to achieve a goal. How we perceive ourselves factors in our success. "Part 3: Prosperity" talks about the way prosperity is achieved. You must alter your thoughts to achieve prosperity. This book discusses creating the mindset and setting the stage for a prosperity-based reality to flourish with emphasis on realigning one's own self-image.

Recent Advances in Electromagnetic Theory H.N. Kritikos, Dwight L.

Jaggard,2012-12-06 The contributions of this book represent only a small sample of the work of the many researcher electromagneticians who have had the pleasure of being associated with Professor Papas, either as students or as colleagues. Many of us continue to work in the many and diverse areas that modern electro magnetism encompasses. There is, however, a common thread that was derived from our association with Professor Papas that has greatly influenced our thinking and technical style of expression. Professor Papas, from his studies at Harvard, brought with him to Pasadena a very fundamental and classical point of view that was instilled in all those who were associated with him. He saw research problems as a combination of fundamental physical and mathematical principles and the electromagnetic reality. He searched and demanded clarity and often, in the rather involved and engaging discussions which took place in his office, he demanded that the baby picture be clearly drawn on the blackboard. This requirement, certainly for some of us who were working in widely varied subjects ranging from relativistic plasmas to almost periodic media, has forced us to reexamine the fundamentals. The clear and lucid marriage of fundamental concepts to applications has been the trademark of Professor Papas's intellectual tradition, and has greatly influenced the thinking of all of those who have associated with him.
