📖 **ADVENTURES IN TORNADO ALLEY** Mike Hollingshead, Eric Nguyen, 2008-03-25 From surreal skyscapes to wholesale destruction: the most dramatic scenes from the natural world. The destructive power of nature has always been a source of fear and fascination, and never more so than now, when climate change and extreme weather conditions are constantly in the news. Across the central United States, the infamous storms of Tornado Alley are fueled by the collision of cold fronts from Canada and warm fronts from the Gulf of Mexico. People have been chasing these storms for decades in pursuit of thrilling experiences, but now a new generation of storm chasers is combining scientific knowledge with powerful images. This book follows Mike Hollingshead and Eric Nguyen on seventeen chases through Colorado, Iowa, Kansas, Nebraska, New Mexico, Oklahoma, and South Dakota, illustrating the unfolding events with sequential shots and a running commentary by the chasers themselves. These spectacular storm portfolios are expanded with special features on weather phenomena like hail and mammatus clouds plus insights into forecasting and research.

📖 **ATOMIC LOVE** Jennie Fields, 2021-11-30 A novel of science, love, espionage, beautiful writing, and a heroine who carves a strong path in the world of men. As far as I'm concerned there is nothing left to want.--Ann Patchett, author *The Dutch House* A highly-charged love story that reveals the dangerous energy at the heart of every real connection...Riveting.--Delia Owens, author of *Where the Crawdads Sing* Love. Desire. Betrayal. Her choice could save a nation. Chicago, 1950. Rosalind Porter has always defied expectations--in her work as a physicist on the Manhattan Project and in her passionate love affair with colleague Thomas Weaver. Five years after the end of both, her guilt over the bomb and her heartbreak over Weaver are intertwined. She desperately misses her work in the lab, yet has almost resigned herself to a more conventional life. Then Weaver gets back in touch--and so does the FBI. Special Agent Charlie Szydlo wants Roz to spy on Weaver, whom the FBI suspects of passing nuclear secrets to the enemy. Roz helped to develop these secrets and knows better than anyone the devastating power such knowledge holds. But can she spy on a man she still loves, despite her better instincts? At the same time, something about Charlie draws her in. He's a former prisoner of war haunted by his past, just as her past haunts her. As Rosalind's feelings for each man deepen, so too does the danger she finds herself in. She will have to choose: the man who taught her how to love . . . or the man her love might save?
