Designing Mobile Payment Experiences Skip Allums, 2014-08-13 Now that consumer purchases with mobile phones are on the rise, how do you design a payment app that's safe, easy to use, and compelling? With this practical book, interaction and product designer Skip Allums provides UX best practices and recommendations to help you create familiar, friendly, and trustworthy experiences. Consumers want mobile transactions to be as fast and reliable as cash or bank cards. This book shows designers, developers, and product managers—from startups to financial institutions—how to design mobile payments that not only safeguard identity and financial data, but also provide value-added features that exceed customer expectations. Learn about the major mobile payment frameworks: NFC, cloud, and closed loop Examine the pros and cons of Google Wallet, Isis, Square, PayPal, and other payment apps Provide walkthroughs, demos, and easy registration to quickly gain a new user's trust Design efficient point-of-sale interactions, using NFC, QR, barcodes, or geolocation Add peripheral services such as points, coupons and offers, and money management

Hip to be Square Sarit Markovich, 2017 Founded in San Francisco in 2009, Square finished 2012 as the darling of Silicon Valley; flush with more than \$340 million in funding, the firm had grown to several hundred employees in just three short years. It processed more than \$10 billion annually in credit and debit card payments from small business owners that used Square's smartphone-enabled card swipe device wherever cellular or wireless Internet service was available. However, Square's success had attracted new entrants into the mobile payments processing space, both in the United States and abroad, threatening to derail the company's remarkable trajectory. With its latest financing round valuing the company in excess of \$3.4 billion, management and investors were considering which strategies would continue--even accelerate--the company's growth Square presents an opportunity for classes in strategy and technology management to contemplate the following: -How can a startup disrupt an established set of incumbents without provoking a harsh competitive response? -How can a growth company in a rapidly changing industry expand beyond the core competency that fueled its initial growth? -Which growth platforms make the most sense for a company in a complicated ecosystem with many players offering divergent solutions?

Sistemas de Información en la empresa Luis Iovanes, 2015-03-10 Este libro fue escrito como un libro de texto para carreras

critical judgment when assessing results reported by others. Throughout the text, a lively writing style and numerous illustrative examples, often using real research data, facilitate an easy understanding of basic concepts and methods. Information ranges from an entertaining account of the origins of epidemiology, through advice on how to overcome some of the limitations of survival analysis, to a checklist of questions to ask when considering sources of bias. Although statistical concepts and formulae are presented, the emphasis is consistently on the interpretation of the data rather than on the actual calculations. The text has 18 chapters. The first six introduce the basic principles of epidemiology and statistics. Chapters 7-13 deal in more depth with each of the study designs and interpretation of their findings. Two chapters, concerned with the problems of confounding and study size, cover more complex statistical concepts and are included for advanced study. A chapter on methodological issues in cancer prevention gives examples of epidemiology's contribution to primary prevention, screening and other activities for early detection, and tertiary prevention. The concluding chapters review the role of cancer registries and discuss practical considerations that should be taken into account in the design, planning, and conduct of any type of epidemiological research.

Buying a Fishing Rod for My Grandfather Gao Xingjian, 2009-10-13 "Precisely detailed and delicately suggestive: the best work of Gao's yet to appear in English translation."—Kirkus Reviews A collection of six exquisite short stories from Gao Xingjian, the first Chinese writer to win the Nobel Prize in Literature. These beautifully translated stories take as their themes the fragility of love and life, and the haunting power of memory. In "The Temple," the narrator's acute and mysterious anxiety overshadows the delirious happiness of an outing with his new wife on their honeymoon. In "The Cramp" a man narrowly escapes drowning in the sea, only to find that no one even noticed his absence. In the title story the narrator attempts to relieve his homesickness only to find that he is lost in a labyrinth of childhood memories. Everywhere in this collection are powerful psychological portraits of characters whose unarticulated hopes and fears betray the never-ending presence of the past in their present lives.

Vegetarianism in the Political Debate Ezequiel Martn Arrieta, Nicols Grobisa, 2014-09-12 An in-depth analysis of the different and significant impacts of the livestock sector on the environment and health, gives us an idea about the great responsibility of animal production in the degradation of land, soil and water, biodiversity reduction, climate change, deforestation and the exponential growth of so-called "modern diseases" resulting from the consumption of animal products. Due to the magnitude of its impacts, livestock is one of the two or three sectors with the most severe impacts on key environmental issues at all levels, from local to global. An approach to this issue requires urgent attention, as mentioned by numerous reports of institutions of world renown. "Vegetarianism in political

debate” tries to bring evidence-based information to the general public on the urge for a serious debate with valid arguments about the unsustainability of the current system of production of animal products and the chance to obtain environmental and health benefits arising from the adoption of a vegetarian diet. Inciting skepticism, it is intended that the reader critically ponders over his eating habits which had been imposed on them since childhood. Recognizing these as a cultural pattern that must be modified in order to get a better life quality and a reduced economic and environmental impact caused by meat consumption.
