The Cash Dividend Marito Garcia, Charity G. Moore, Charity M. T. Moore, 2012-02-21 The Cash Dividend: The Rise of Cash Transfer Programs in Sub-Saharan Africa assimilates results of a thorough review of the recent use of cash transfer programs in Sub-Saharan Africa. Drawing from sources including program documentation, policy papers, peer-reviewed publications, and interviews, it paints a picture of the evolution and current state of cash transfers, which include unconditional and conditional cash transfers and emergency- and development-focused transfers. It presents analysis from data collected and describes broad trends in design features and implementation, including objectives, targeting, benefits, payment mechanisms, conditions, monitoring, evaluation, institutional location, program costs, and more. It also addresses political economy issues relevant to cash transfer programs, discusses the challenges to implementing cash transfer programs in Sub-Saharan Africa, and highlights lessons learned from existing African cash transfer programs. The comprehensive nature of the review, and its thorough analysis of previously unassimilated data, fills a gap in knowledge related to cash transfer programs in the region. The book is expected to benefit the donor community and domestic policymakers involved in cash transfers in Sub-Saharan Africa, guiding both program design and future research. It will help shift the debate on cash transfers in Africa from whether they are possible to how they can best be implemented.

Affective Health and Masculinities in South Africa Hans Reihling, 2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.
