Tin Soldiers Michael Farmer, 2003-06-03 A military thriller ripped from tomorrow's headlines, Michael Farmer's debut is a powder keg of desert warfare expertise, cutting edge military technology, and an unforgettable

cast of flesh and blood troops sent into the Persian Gulf to face a nightmare reborn. An alliance with Iran reinvigorates the Iraqi military and fuels its aggressive agenda. To prevent a total conquest of the region, Captain Patrick Dillon and a U.S. Army Heavy Brigade must stand against the Iraqi's greater numbers and updated technology—all while the locals are hell-bent on grinding the small American force into the ancient desert sand. Against impossible odds, this brigade of American M1 Abrams tanks, Bradleys, and Apaches are left with only one option. They must do the impossible.

In Strange Company Roland J. Tiso,2024-01-15 “Colonel Tiso’s experience with operational planning and combat service with multinational forces in Iraq provides an exceptional background for this riveting, exciting, and most interesting book that superbly captures the challenges of Coalition Warfare.” – Lieutenant General (Retired) Joseph W. Kinzer, USA The decision to not deploy reoriented, trained Iraqi divisions and other allied forces in numbers significant enough to adequately stabilize the situation in Iraq in 2003-04 resulted in significant shortages of manpower and equipment that eventually led to a less-than-satisfactory ending to the campaign, and significantly challenged the entire Coalition effort in the first year of Operation Iraqi Freedom. The roles and missions assumed by allies were vitally important in the under-resourced effort to bring order to the chaos of Iraq but would remain relatively unheralded throughout most of the campaign. Colonel Tiso’s account of this time offers unique insights into the challenges of planning the Iraqi campaign and the intricacies and challenges of multinational service through the lens of his assignments as a war planner at U.S. Central Command, Senior Military Adviser of the Arab Peninsula Shield Force and the

Polish-led Multinational Division (Central-South), and Chief of Staff and Deputy Chief of Staff for Operations (C-3) of the Coalition Military Assistance Training Team tasked to develop the New Iraqi Army. His observations cast significant light on the missions these units undertook and the challenges they confronted. His firsthand account of operational planning for war in Iraq captures the concerns of the military planners and senior commanders to liberate and stabilize the country, enabling the reader to better understand the challenges of operational war planning, coalition warfare, the difficulty of stabilizing Iraq after the fall of Baghdad, the development of the New Iraqi Army, and ultimately a deeper understanding of America's "long war" in Iraq.

Ecology of Communication David L. Altheide, 2020-03-11 Altheide's new book advances the argument set in motion some years ago with *Media Logic* and continued in *Media Worlds in the Postjournalism Era*: that in our age, information technology and the communication environments it posits have affected the private and the social spheres of all our power relationships, redefining the ground rules for social life and concepts such as freedom and justice., Articulated through an interactionist and non-deterministic focus, *An Ecology of Communication* offers a distinctive perspective for understanding the impact of information technology, communication formats, and social activities in the new electronic environment.

Pioneering Female Foreign Correspondents obtain 20th Century Pulitzer Prizes Heinz-Dietrich Fischer, This volume presents biographical information and award-winning works by American women journalists earning the coveted Pulitzer Prize for International Reporting. It took about two decades after the establishment of the awards that the first female was decorated with this

honor. Based on the jury reports of the prize-giving committees, it is documented in this book how the discussions within the judges went until decisions about winners were reached.

Controlling Broadcasting Meryl Aldridge, Nicholas Hewitt, 1994 This text assesses the transformation of broadcasting currently taking place in Europe, where deregulation, coupled with advances in satellite, cable and video technology, promises consumer choice on an American scale.

Lonesome George Jorge Sotirios, 2012-02-15 *Lonesome George* is a comic odyssey that combines travel adventure and comedy in a journey of epic proportions. Author Jorge Sotirios illuminates the beauty of the South American landscape, interweaving its history, culture and people, in his mock heroic quest. Beginning with the writer lured to South American by an Argentine beauty, his journey commences across the equator, through the Amazon jungle and climaxes in the austere Galapagos Islands. Incorporating angels in Argentina to sham Peruvian shaman. From Amazombies appearing on midnight boats, to visiting the lost city of Fordlandia. Accompanying ecowarriors to far-flung villages where jaguars roam, the writer ultimately finds the site of the legendary Amazon warrior women, gliding over the Mirror of the Moon Lake where everything is doubled. The alluring pink dolphin in the Amazon River, said to charm whoever encounters it, is a constant presence. Missionaries and Tarzans coexist with the cult of Che Guevara, with serious topics such as oil exploitation, deforestation and drought. *Lonesome George* is South America as seen from street and river level and a life-affirming portrayal of people and human emotion as Sotirios' confronts his doppelganger, *Lonesome George*, the last surviving tortoise of his species.

The Letter and the Scroll Robin Currie, Stephen Garrison Hyslop, 2009

Down City Leah Carroll, 2017-03-07 Like James Ellroy's, *My Dark Places*, *DOWN CITY* is a gripping narrative built of memory and reportage, and Leah Carroll's portrait of Rhode Island is sure to take a place next Mary Karr's portrayal of her childhood in East Texas and David Simon's gritty Baltimore. Leah Carroll's mother, a gifted amateur photographer, was murdered by two drug dealers with Mafia connections when Leah was four years old. Her father, a charming alcoholic who hurtled between depression and mania, was dead by the time she was eighteen. Why did her mother have to die? Why did the man who killed her receive such a light sentence? What darkness did Leah inherit from her parents? Leah was left to put together her own future and, now in her memoir, she explores the mystery of her parents' lives, through interviews, photos, and police records. *DOWN CITY* is a raw, wrenching memoir of a broken family and an indelible portrait of Rhode Island- a tiny state where the ghosts of mafia kingpins live alongside the feisty, stubborn people working hard just to get by. Heartbreaking, and mesmerizing, it's the story of a resilient young woman's determination to discover the truth about a mother she never knew and the deeply troubled father who raised her-a man who was, Leah writes, both my greatest champion and biggest obstacle.

Reports from Middle East Conflict Regions Heinz-Dietrich Fischer, 2017 This volume presents eleven chapters of main political developments in several Middle East countries as told by Pulitzer Prize-winning journalists. and the terror system of the so-called Islamic State of Iraq and Syria.

The History of Cartography, Volume 6 Mark Monmonier, 2015-05-18 For more than thirty years, the History of Cartography Project has charted the course for scholarship on cartography, bringing together research from a variety of disciplines on the creation, dissemination, and use of maps. Volume 6, *Cartography in the Twentieth Century*, continues this tradition with a groundbreaking survey of the century just ended and a new full-color, encyclopedic format. The twentieth century is a pivotal period in map history. The transition from paper to digital formats led to previously unimaginable dynamic and interactive maps. Geographic information systems radically altered cartographic institutions and reduced the skill required to create maps. Satellite positioning and mobile communications revolutionized wayfinding. Mapping evolved as an important tool for coping with complexity, organizing knowledge, and influencing public opinion in all parts of the globe and at all levels of society. Volume 6 covers these changes comprehensively, while thoroughly demonstrating the far-reaching effects of maps on science, technology, and society—and vice versa. The lavishly produced volume includes more than five hundred articles accompanied by more than a thousand images. Hundreds of expert contributors provide both original research, often based on their own participation in the developments they

describe, and interpretations of larger trends in cartography. Designed for use by both scholars and the general public, this definitive volume is a reference work of first resort for all who study and love maps.
