Online Brand Communities Francisco J. Martínez-López, Rafael Anaya, Rocío Aguilar, Sebastián Molinillo, 2015-12-11 This book presents and analyzes the concept of online brand communities, an emerging and exciting topic in marketing and eCommerce. First, it lays out the foundations like the evolution of the Web and the so-called Social Web, its utility for users and businesses, and the evolution of the marketing mind-set to adapt the Social Web. On this basis, the book then presents a detailed analysis of online brand communities, examining the concept of virtual community with a specific focus on virtual brand communities. In this context the book also explores recent trends related to branding and brand management. Next, it proposes a classification system for online brand communities, taking into account questions like the motivating factors for consumers to join, participate and stay in a community. The process of value creation in communities is examined from both business and consumer perspectives. The book draws to a close with a brief presentation of the process broadly accepted for the successful development of online brand communities.

Multiple Voices in Academic and Professional Discourse Sergio Maruenda Bataller, 2011-05-25 The demands of today's society for greater specialization have brought about a profound transformation in the humanities, which are not immune to the competitive pressure to meet new challenges that are present in other sectors. Thus, lecturers and researchers in modern languages and applied linguistics departments have made great efforts to design syllabi and materials more attuned to the competences and requirements of potential working environments. At the same time, linguists have attempted to apply their expertise in wider areas, creating research institutes that focus on applying language and linguistics in different contexts and offering linguistic services to society as a whole. This book attempts to provide a global view of the multiple voices involved in interdisciplinary research and innovative proposals in teaching specialized languages while offering contributions that attempt to fill the demands of a varied scope of disciplines such as the sciences, professions, or educational settings. The chapters in this book are made up of current research on these themes: discourse analysis in academic and professional genres, specialized translation, lexicology and terminology, and ICT research and teaching of specialized languages.

El Emprendimiento en América Latina Daniel Lederman, Julian Messina, Samuel Pienknagura, Jamele Rigolini, 2014-07-01 El emprendimiento es un determinante fundamental del crecimiento y la creación de empleo. Pese a que los emprendedores abundan en América Latina y el Caribe, las empresas de la región son más pequeñas y menos propensas a crecer e innovar que las de otras regiones. El crecimiento de la productividad lleva décadas siendo mediocre y el reciente periodo de auge de las materias primas no ha supuesto una excepción. Así pues, la presencia de emprendedores dinámicos será necesaria para impulsar la creación de puestos de trabajo de calidad y la aceleración del crecimiento de la productividad en la región. En *El emprendimiento en América Latina*: muchas empresas y poca innovación se estudia el panorama del emprendimiento en América Latina y el Caribe. El libro recurre a nuevas bases de datos que abordan cuestiones como la creación de empresas, las dinámicas empresariales, las decisiones de exportar y el comportamiento de las

corporaciones multinacionales y sintetiza los resultados de un análisis exhaustivo del estatus, las perspectivas y los retos del emprendimiento en la región. Asimismo, el libro suministra herramientas útiles e información para ayudar a los profesionales y responsables de las políticas a identificar los ámbitos de las mismas que los gobiernos pueden explorar para impulsar la innovación e incentivar el emprendimiento transformador con potencial de crecimiento elevado.
