

La Metro Bus

Ethan N. Elkind

Railtown Ethan N. Elkind,2014-01-22 The modern Los Angeles Metro Rail system resulted from the sustained efforts of local leaders, particularly with the election of Tom Bradley as mayor in 1973. Political compromises and funding pressures, however, severely weakened the effectiveness of the subway and light rail lines. Railtown presents this history by drawing on archival documents, contemporary news accounts, and interviews with many of the key players in the story to provide critical behind-the-scenes accounts of the people and forces that shaped the system. Although Metro Rail is growing in ridership and political importance, with expansions in the pipeline, Railtown argues that local leaders will need to reform the rail planning and implementation process to avoid repeating past mistakes and to ensure that Metro Rail supports a burgeoning demand for transit-oriented neighborhoods in Los Angeles--

Transport of Delight Jonathan Richmond,2005 Transport of Delight is a true interdisciplinary work, and includes a thorough analytical assessment of the Los Angeles rail program, with a focus on the Long Beach Blue Line light rail-the first of the new projects to go ahead. En route, it shows that ridership forecasting for this project was not only biased and statistically invalid, but in fact done to justify decisions made on other grounds. This unusual book develops a novel theory of myth to explain the construction of rail passenger transit in Los Angeles when it had little to offer the needs of a dispersed autopolis, whose urgent but dispersed public transportation needs could have been better served by developing the regional bus system. The author conducted interviews and performed the detective work necessary to reveal an unlikely logic that held together a network of symbols, images, and metaphors that together present powerful mythical beliefs in the guise of truth. A political analysis shows how consensus was reached to proceed with the light rail to Long Beach, but political explanations are ultimately found lacking, because they cannot explain why decision-makers would want to put the rail in place. It is only when provocative metaphors-of the need to connect communities and to restore a mythical balance to a dysfunctional transportation system-and symbols-of escape from the pressure cooker of poverty, of urban success, power and, indeed sexual acumen-are surfaced, that we realize that Los Angeles' Transport of Delight is the result of the very human need to transcend complexity by providing mythical creations that appear to offer easy answers to society's deepest problems.

Hidden History of Transportation in Los Angeles Charles P. Hobbs,2014-11-04 Los Angeles transportation's epic scale--its iconic freeways, Union Station, Los Angeles International Airport and the giant ports of its shores--has obscured many offbeat transit stories of moxie and eccentricity. Triumphs such as the Vincent Thomas Bridge and Mac Barnes's Ground Link buspool have existed alongside such flops as the Santa Monica Freeway Diamond Lane and the Oxnard-Los Angeles Caltrain commuter rail. The City of Angels lacks a propeller-driven monorail and a freeway in the paved bed of the Los Angeles River, but not for a lack of public promoters. Horace Dobbins built the elevated California Cycleway in Pasadena, and Mike Kadletz deployed the Pink Buses for Orange County kids hitchhiking to the beach. Join Charles P. Hobbs as he recalls these and other lost episodes of LA-area transportation lore.

Additional nearby points of interest are also indicated on these mini-area-walking maps. An ultra-large official map of the Los Angeles Metro is also provided. Michael Brein's Guide to Los Angeles is part of the world's first and only travel guide series specifically designed to show travelers how to sightsee the top 50 visitor attractions by public transportation in a variety of the world's most visited cities.

Trains, Buses, People Christof Spieler,2018-10-23 What are the best transit cities in the US? The best Bus Rapid Transit lines? The most useless rail transit lines? The missed opportunities? In the US, the 25 largest metropolitan areas and many smaller cities have fixed guideway transit—rail or bus rapid transit. Nearly all of them are talking about expanding. Yet discussions about transit are still remarkably unsophisticated. To build good transit, the discussion needs to focus on what matters—quality of service (not the technology that delivers it), all kinds of transit riders, the role of buildings, streets and sidewalks, and, above all, getting transit in the right places. Christof Spieler has spent over a decade advocating for transit as a writer, community leader, urban planner, transit board member, and enthusiast. He strongly believes that just about anyone—regardless of training or experience—can identify what makes good transit with the right information. In the fun and accessible *Trains, Buses, People: An Opinionated Atlas of US Transit*, Spieler shows how cities can build successful transit. He profiles the 47 metropolitan areas in the US that have rail transit or BRT, using data, photos, and maps for easy comparison. The best and worst systems are ranked and Spieler offers analysis of how geography, politics, and history complicate transit planning. He shows how the unique circumstances of every city have resulted in very different transit systems. Using appealing visuals, *Trains, Buses, People* is intended for non-experts—it will help any citizen, professional, or policymaker with a vested interest evaluate a transit proposal and understand what makes transit effective. While the book is built on data, it has a strong point of view. Spieler takes an honest look at what makes good and bad transit and is not afraid to look at what went wrong. He explains broad concepts, but recognizes all of the technical, geographical, and political difficulties of building transit in the real world. In the end,*Trains, Buses, People* shows that it is possible with the right tools to build good transit.

No. 91/92 Lauren Elkin,2021-09-14 A love letter to Paris and a meditation on how it has changed in two decades, evolving from the twentieth century into the twenty-first, from analog to digital. Your telephone is precious. It may be envied. We recommend vigilance when using it in public. --Paris bus public notice In fall 2014 Lauren Elkin began keeping a diary of her bus commutes in the Notes app on her iPhone 5c, writing down the interesting things and people she saw in a Perecquian homage to Bus Lines 91 and 92, which she took from her apartment in the 5th Arrondissement to her teaching job in the 7th. Reading the notice, she decided to be vigilant when using her phone: she would carry out a public transport vigil, using it to take in the world around her and notice all the things she would miss if she continued using it the way she had been, the way everyone does--to surf the web, check social media, maintain her daily sense of self through digital interaction. Her goal became to observe the world through the screen of her phone, rather than using her phone to distract from the world. During the course of that academic year, the Charlie Hebdo attacks occurred and Elkin had an ectopic pregnancy, requiring emergency surgery. At that point, her diary of dailiness became a study of the counterpoint between the everyday and the Event, mediated through early twenty-first century technology, and observed from the height of a bus seat. No. 91/92 is a love letter to Paris, and a meditation on how it has changed in the two decades the author has lived there, evolving from the twentieth century into the twenty-first, from analog to digital.

Street Level: Los Angeles in the Twenty-First Century Dr Rob Sullivan,2014-02-28 In the latter part of the C20th, a series of seminal books were written which examined Los Angeles by the likes of Reyner Banham, Mike Davis, Edward Soja, Allen Scott, Michael Dear, Frederick Jameson, Umberto Eco,

Bernard-Henri Levy, and Jean Baudrillard which have been hugely influential in thinking about cities more broadly. The debates which were generated by these works have tended to be very heated and either defensive or offensive in approach. A sufficient amount of time has since passed that a more measured approach to evaluating this work can now be taken. The first section of this book, 'Contra This and Contra That', provides such a critique of the various theories applied to Los Angeles during the last century, balancing the positive with the negative. The second part of the book is an investigation of L.A. as it exists on the ground today. While political, the theoretical stance taken in this investigation is not mounted as a platform from which to advocate a particular ideology. Instead, it encompasses cultural as well as economic issues to put forth a view of L.A. which is coherent and cogent while at the same time considering its multi-layered, complex and ever-changing qualities. It concludes by arguing that sectorized off and 'totalizing' visions of the city will not do as instruments of urban analysis and that only a theory as mobile as its target will do: one that replicates the polymer nature of this place. It proposes that, extending that theory to the world beyond this particular city, only a theory that models itself on the mobile and polymer nature of the world, while still retaining a sense of the actual and the real, will do as an instrument with which to comprehend the world. In doing so, this book is not only a model by which to think through Los Angeles, but as a model by which to think through other world cities.

Better Buses, Better Cities Steven Higashide, 2019-10-10 Imagine a bus system that is fast, frequent, and reliable--what would that change about your city? Buses can and should be the cornerstone of urban transportation. They offer affordable mobility and can connect citizens with every aspect of their lives. But in the US, they have long been an afterthought in budgeting and planning. Transit expert Steven Higashide uses real-world stories of reform to show us what a successful bus system looks like. Higashide explains how to marshal the public in support of better buses and argues that better bus systems will create better cities for all citizens. With a compelling narrative and actionable steps, *Better Buses, Better Cities* describes how decision-makers, philanthropists, activists, and public agency leaders can work together to make the bus a win in any city.

The New Geography Joel Kotkin, 2002-01-29 In the blink of an eye, vast economic forces have created new types of communities and reinvented old ones. In *The New Geography*, acclaimed forecaster Joel Kotkin decodes the changes, and provides the first clear road map for where Americans will live and work in the decades to come, and why. He examines the new role of cities in America and takes us into the new American neighborhood. *The New Geography* is a brilliant and indispensable guidebook to a fundamentally new landscape.

The Lines That Make Us Nathan Vass, 2021-07-16 Nathan Vass has been driving a Seattle city bus at night for the last decade. He began writing a popular blog, *The View from Nathan's Bus*, about his encounters with the riders of the No. 7 bus, which cuts through the heart of the city's Rainier Valley, one of the most racially and ethnically diverse zip codes in the US. Nathan's blog entries grew into this book. His stories and photography illuminate an overlooked part of urban life and highlight the simple connections people make on a daily basis. His depictions of interactions on the city bus range from heartbreaking to hilarious to inspiring.

The Affordable City Shane Phillips, 2020-09-15 From Los Angeles to Boston and Chicago to Miami, US cities are struggling to address the twin crises of high

housing costs and household instability. Debates over the appropriate course of action have been defined by two poles: building more housing or enacting stronger tenant protections. These options are often treated as mutually exclusive, with support for one implying opposition to the other. Shane Phillips believes that effectively tackling the housing crisis requires that cities support both tenant protections and housing abundance. He offers readers more than 50 policy recommendations, beginning with a set of principles and general recommendations that should apply to all housing policy. The remaining recommendations are organized by what he calls the Three S's of Supply, Stability, and Subsidy. Phillips makes a moral and economic case for why each is essential and recommendations for making them work together. There is no single solution to the housing crisis—it will require a comprehensive approach backed by strong, diverse coalitions. The Affordable City is an essential tool for professionals and advocates working to improve affordability and increase community resilience through local action.

Weathering Dr. Arline T Geronimus,2023-03-28 Fusing science and social justice, renowned public health researcher Dr. Arline T. Geronimus offers an urgent, monumental book (Ibram X. Kendi, author of *Stamped from the Beginning*) exploring the ways in which systemic injustice erodes the health of marginalized people. America has woken up to what many of its citizens have known for centuries and to what public health statistics have evidenced for decades: systemic injustice takes a physical, too often deadly, toll on Black, brown, working class and poor communities, and any group who experiences systemic cultural oppression or economic exploitation. Marginalized Americans are disproportionately more likely to suffer from chronic diseases and to die at much younger ages than their middle- and upper-class white counterparts. Black mothers die during childbirth at a rate three times higher than white mothers. White kids in high-poverty Appalachian regions have a healthy life expectancy of 50 years old, while the vast majority of US youth can expect to both survive and be able-bodied at 50, with decades of healthy life expectancy ahead of them. In the face of such clear inequity, we must ask ourselves why this is, and what we can we do. Dr. Arline T. Geronimus coined the term “weathering” to describe the effects of systemic oppression—including racism and classism—on the body. In *Weathering*, based on more than 30 years of research, she argues that health and aging have more to do with how society treats us than how well we take care of ourselves. She explains what happens to human bodies as they attempt to withstand and overcome the challenges and insults that society leverages at them, and details how this process ravages their health. And she proposes solutions. Until now, there has been little discussion about the insidious effects of social injustice on the body. *Weathering* shifts the paradigm, shining a light on the topic and offering a roadmap for hope.
