Handbook of South American Archaeology Helaine Silverman,William Isbell,2008-04-04 Perhaps the contributions of South American archaeology to the larger field of world archaeology have been inadequately recognized. If so, this is probably because there have been relatively few archaeologists working in South America outside of Peru and recent advances in knowledge in other parts of the continent are only beginning to enter larger archaeological discourse. Many ideas of and about South American archaeology held by scholars from outside the area are going to change irrevocably with the appearance of the present volume. Not only does the Handbook of South American Archaeology (HSAA) provide immense and broad information about ancient South America, the volume also showcases the contributions made by South Americans to social theory. Moreover, one of the merits of this volume is that about half the authors (30) are South Americans, and the bibliographies in their chapters will be especially useful guides to Spanish and Portuguese literature as well as to the latest research. It is inevitable that the HSAA will be compared with the multi-volume Handbook of South American Indians (HSAI), with its detailed descriptions of indigenous peoples of South America, that was organized and edited by Julian Steward. Although there are heroic archaeological essays in the HSAI, by the likes of Junius Bird, Gordon Willey, John Rowe, and John Murra, Steward states frankly in his introduction to Volume Two that “arch- ology is included by way of background” to the ethnographic chapters.

The Sustainable City X C.A. Brebbia,W.F. Florez-Escobar,2015-09-01 Containing the proceedings of the 10th International Conference on Urban Regeneration and Sustainability this book addresses the multidisciplinary aspects of urban planning; a result of the increasing size of cities; the amount of resources and services required and the complexity of modern society. Most of earth’s population now lives in cities and the process of urbanisation continues generating many problems deriving from the drift of the population towards them. These problems can be resolved by cities becoming efficient habitats, saving resources in a way that improves the quality and standard of living. The process, however, faces a number of major challenges, related to reducing pollution, improving main transportation and infrastructure systems. New urban solutions are required to optimise the use of space and energy resources leading to improvements in the environment, i.e. reduction in air, water and soil pollution as well as efficient ways to deal with waste generation. These challenges contribute to the development of social and economic imbalances and require the development of new solutions. Large cities are probably the most complex mechanisms to manage. However, despite such complexity they represent a fertile ground for architects, engineers, city planners, social and political scientists, and other professionals able to conceive new ideas and time them according to technological advances and human requirements. The challenge of planning sustainable cities lies in considering their dynamics, the exchange of energy and matter, and the function and maintenance of ordered structures directly or indirectly, supplied and maintained by natural systems. Topics covered include: Urban Strategies; Planning, Development and Management; Urban Conservation and Regeneration; The Community and the City; Eco-town Planning; Landscape Planning and Design; Environmental Management; Sustainable Energy and the City; Transportation; Quality of Life; Architectural Issues; Cultural Heritage Issues; Intelligent Environment and Emerging Technologies; Planning for Risk; Disaster and Emergency Response; Safety and Security; Waste Management; Infrastructure and Society; Urban Metabolism.

Coup Linda, Farthing,Thomas Becker,2021-11-30 In three dramatic weeks in October and November 2019, the fourteen years of progressive change that Evo Morales’ pink tide government had worked to implement in Bolivia and beyond came to a screeching halt. President Morales was forced to resign after protests against his re-election to a fourth term in allegedly fraudulent elections erupted among the urban middle classes, anti-indigenous racists, and prominent conservative politicians. The country’s far right used the ensuing crisis to orchestrate a successful coup, with military and police backing, paving the way for a repressive “transition” government led by Jeanine Áñez to take power. The Áñez government quelled popular protests with lethal force, shut down critical media outlets, and targeted members of Morales’ political party, the Movimiento al Socialismo (MAS). Despite postponing elections three times, the Áñez government was eventually forced to call elections in October 2020. The MAS swept back into power, winning elections with 55% of the vote and returning democracy to the country. This book tells the story of this year of upheaval in Bolivia, providing a critical analysis of the 14 years of the MAS government that preceded it as well as the MAS return to power in 2020. It includes personal stories and commentary from women and men on the streets, leaders in social movements, members of the MAS party and government, survivors of Áñez’s abuses, and intellectuals.

Superintendent of Documents, Crime and Punishment in Latin America Ricardo D. Salvatore,Carlos Aguirre,Gilbert M. Joseph,2001-09-20 Crowning a decade of innovative efforts in the historical study of law and legal phenomena in the region, Crime and Punishment in Latin America offers a collection of essays that deal with the multiple aspects of the relationship between ordinary people and the law. Building on a variety of methodological and theoretical trends—cultural history, subaltern studies, new political history, and others—the contributors share the conviction that law and legal phenomena are crucial elements in the formation and functioning of modern Latin American societies and, as such, need to be brought to the forefront of scholarly debates about the region’s past and present. While disassociating law from a strictly legalist approach, the volume showcases a number of highly original studies on topics such as the role of law in processes of state formation and social and political conflict, the resonance between legal and cultural phenomena, and the contested nature of law-enforcing discourses and practices. Treating law as an ambiguous and malleable arena of struggle, the contributors to this volume—scholars from North and Latin America who represent the new wave in legal history that has emerged in recent years-- demonstrate that law not only produces and reformulates culture, but also shapes and is shaped by larger processes of political, social, economic, and cultural change. In addition, they offer valuable insights about the ways in which legal systems and cultures in Latin America compare to those in England, Western Europe, and the United States. This volume will appeal to scholars in Latin American studies and to those interested in the social, cultural, and comparative history of law and legal phenomena. Contributors. Carlos Aguirre, Dain Borges, Lila Caimari, Arlene J. Díaz, Luis A. Gonzalez, Donna J. Guy, Douglas Hay, Gilbert M. Bibliographic Guide to Government Publications New York Public Library. Research Libraries,1999 *The Fight Against Poverty and the Right to Development* Mads Andenas,Jeremy Perelman,Christian Scharling,2020-12-04 This book conducts a comparative legal study from two analytical points of view. First, it accounts for the legal dimensions of the fight against poverty and the right to development as seen from the perspective of domestic legal law. It examines the domestic legal tools, such as constitutional law, that aim to contribute to the fight against poverty and the right to development. Second, the book accounts for the domestic contributions to the international legal framework and examines cross-cutting themes of the contemporary state-of-play on the fight against poverty more broadly and of the right to development. The book consists of several national and thematic reports, which look at these issues from either a national or a thematic perspective. Its first chapter is a general report, which draws on the national and thematic reports to compare, systematize and question the contemporary features at play within the field of the fight against poverty and the right to development. *Guía turística e histórica de La Paz* Philipp Schauer,2013
