The Force of Nonviolence Judith Butler, 2021-02-09

“The most creative and courageous social theorist working today” examines the ethical binds that emerge within the force field of violence (Cornel West). “. . . nonviolence is often seen as passive and resolutely individual. Butler’s philosophical inquiry argues that it is in fact a shrewd and even aggressive collective political tactic.” —New York Times Judith Butler shows how an ethic of nonviolence must be connected to a broader political struggle for social equality. While many think of nonviolence as passive or individualist, Butler argues nonviolence is an ethical position found in the midst of the political field. She champions an ‘aggressive’ nonviolence, which accepts hostility as part of our psychic constitution—but values ambivalence as a way of checking the conversion of aggression into violence. Some challengers say a politics of nonviolence is subjective: What qualifies as violence versus nonviolence? This distinction is often mobilized in the service of ratifying the state’s monopoly on violence. Considering nonviolence as an ethical problem within a political philosophy requires two things: a critique of individualism and an understanding of the psychosocial dimensions of violence. Butler draws upon Foucault, Fanon, Freud, and Benjamin to consider how the interdiction against violence fails to include lives regarded as ‘ungrievable’. By considering how “racial phantasms” inform justifications of state and administrative violence, Butler tracks how violence is often attributed to those who are most severely exposed to its lethal effects. Ultimately, the struggle for nonviolence is found in modes of resistance and social movements that separate aggression from its destructive aims to affirm the living potentials of radical egalitarian politics.

Human Terrain Teams Christopher J. Lamb, James Douglas Orton, Michael C. Davies, 2013-06 This study explains the performance of Human Terrain Teams, why the large majority of commanders found them useful, and why collectively they did not ameliorate-much less reverse-growing cross-cultural tensions between U.S. forces and Afghans. It examines the tremendous challenges the Human Terrain Team program faced in starting and rapidly expanding a non-traditional military capability, and why some challenges were met successfully while others were not. First, a historical analysis explains how external forces and management decisions affected team performance. An organizational analysis then explains the variations in team performance by examining the teams with variables substantiated by previous studies of small cross-functional teams. Finally, all available commander observations on Human Terrain Team performance are analyzed to better determine why commanders were satisfied or dissatisfied with their teams. The insights from the three analyses-historical, organizational and commander assessments-are then integrated. The results demonstrate that Human Terrain Teams had to overcome numerous organizational limitations to perform well, but that they were able to meet the expectations of commanders who did not fully appreciate the optimum role the teams could play in an integrated counterinsurgency strategy.

The Tender Soldier Vanessa M. Gezari, 2013-08-13 Part of the Pentagon's most daring and controversial attempt since Vietnam to bring social science to the Afghanistan battlefield, three tough-minded American civilians find their humanity tested and their lives forever changed by this little-known mission.

Military Anthropology Montgomery McFate, 2018-05-01 In almost every military intervention in

its history, the US has made cultural mistakes that hindered attainment of its policy goals. From the strategic bombing of Vietnam to the accidental burning of the Koran in Afghanistan, it has blundered around with little consideration of local cultural beliefs and for the long-term effects on the host nation's society. Cultural anthropology--the so-called handmaiden of colonialism--has historically served as an intellectual bridge between Western powers and local nationals. What light can it shed on the intersection of the US military and foreign societies today? This book tells the story of anthropologists who worked directly for the military, such as Ursula Graham Bower, the only woman to hold a British combat command during WWII. Each faced challenges including the negative outcomes of exporting Western political models and errors of perception. Ranging from the British colonial era in Africa to the recent wars in Iraq and Afghanistan, Military Anthropology illustrates the conceptual, cultural and practical barriers encountered by military organisations operating in societies vastly different from their own.

Anthropological Intelligence David H.

Price, 2008-06-09 By the time the United States officially entered World War II, more than half of American anthropologists were using their professional knowledge and skills to advance the war effort. The range of their war-related work was extraordinary. They helped gather military intelligence, pinpointed possible social weaknesses in enemy nations, and contributed to the army's regional Pocket Guide booklets. They worked for dozens of government agencies, including the Office of Strategic Services (OSS) and the Office of War Information. At a moment when social scientists are once again being asked to assist in military and intelligence work, David H. Price examines anthropologists' little-known contributions to the

Second World War. Anthropological Intelligence is based on interviews with anthropologists as well as extensive archival research involving many Freedom of Information Act requests. Price looks at the role played by the two primary U.S. anthropological organizations, the American Anthropological Association and the Society for Applied Anthropology (which was formed in 1941), in facilitating the application of anthropological methods to the problems of war. He chronicles specific projects undertaken on behalf of government agencies, including an analysis of the social effects of postwar migration, the design and implementation of OSS counterinsurgency campaigns, and the study of Japanese social structures to help tailor American propaganda efforts. Price discusses anthropologists' work in internment camps, their collection of intelligence in Central and South America for the FBI's Special Intelligence Service, and their help forming foreign language programs to assist soldiers and intelligence agents. Evaluating the ethical implications of anthropological contributions to World War II, Price suggests that by the time the Cold War began, the profession had set a dangerous precedent regarding what it would be willing to do on behalf of the U.S. government.

The U.S. Army/Marine Corps Counterinsurgency Field Manual John A. United States Army, United States Marine Corps, 2008-09-15 When the U.S. military invaded Iraq, it lacked a common understanding of the problems inherent in counterinsurgency campaigns. It had neither studied them, nor developed doctrine and tactics to deal with them. It is fair to say that in 2003, most Army officers knew more about the U.S. Civil War than they did about counterinsurgency. The U.S. Army / Marine Corps Counterinsurgency Field Manual was written to fill that void. The result of unprecedented collaboration among top

U.S. military experts, scholars, and practitioners in the field, the manual espouses an approach to combat that emphasizes constant adaptation and learning, the importance of decentralized decision-making, the need to understand local politics and customs, and the key role of intelligence in winning the support of the population. The manual also emphasizes the paradoxical and often counterintuitive nature of counterinsurgency operations: sometimes the more you protect your forces, the less secure you are; sometimes the more force you use, the less effective it is; sometimes doing nothing is the best reaction. An new introduction by Sarah Sewall, director of the Carr Center for Human Rights Policy at Harvard's Kennedy School of Government, places the manual in critical and historical perspective, explaining the significance and potential impact of this revolutionary challenge to conventional U.S. military doctrine. An attempt by our military to redefine itself in the aftermath of 9/11 and the new world of international terrorism, The U.S. Army / Marine Corps Counterinsurgency Field Manual will play a vital role in American military campaigns for years to come. The University of Chicago Press will donate a portion of the proceeds from this book to the Fisher House Foundation, a private-public partnership that supports the families of America's injured servicemen. Anthropology and the United States Military P.

Frese, M. Harrell, 2003-10-03 An edited collection of ethnographic research that seeks to provide visions of and for US military culture from a solid anthropological base. The volume explores several important but relatively unknown cultural variations in the defense community through a variety of lenses. A strong list of contributors

highlight important issues such as: anthrax vaccines, the 'Golden Age' culture of the military, gender roles among army spouses, weight control and physical readiness, the military advisor, and the United States Naval Academy.

Anthropology Goes to War Eric Wakin, 1992 In 1970 a coalition of student activists opposing the Vietnam War circulated documents revealing the involvement of several prominent social scientists in U.S. counterinsurgency activities in Thailand--activities that could cause harm to the people who were the subject of the scholars' research. The disclosure of these materials, which detailed meetings with the Agency for International Development and the Defense Department, prompted two members of the Ethics Committee of the American Anthropological Association to issue an unauthorized rebuke of the accused. Over the next two years, the AAA agonized over the allegations and the appropriate response to them. Within an academic community already polarized by the war, political and professional acrimony reached unprecedented levels. Although the association ultimately passed a code of ethics, the key issues raised in the process were never fully resolved. Now back in print, Eric Wakin's *Anthropology Goes to War* is the first comprehensive study of what became known as the Thailand Controversy--and a timely reminder of a debate whose echoes may be heard in our own time.

The Oxford Handbook of Military Psychology Janice H. Laurence, Michael D. Matthews, 2012-02-24 The Oxford Handbook of Military Psychology describes the critical link between psychology and military activity. The extensive coverage includes topics in of clinical, industrial/organizational, experimental, engineering, and social psychology. The contributors are leading international experts in military psychology.

Irregular Enemies and the Essence of Strategy Colin S. Gray, 2006 The author offers a detailed comparison between the character of irregular warfare, insurgency in particular, and the principal enduring features of the American way. He concludes that there is a serious mismatch between that way and the kind of behavior that is most effective in countering irregular foes. The author poses the question, Can the American way of war adapt to a strategic threat context dominated by irregular enemies? He suggests that the answer is perhaps, but only with difficulty.

Crossing the Wire AnnaMaria Cardinalli, 2013-05-21 In a harrowing memoir, the military journalist discusses her explosive report on sexual practices in Afghanistan and her experience in the War on Terror. When AnnaMaria Cardinalli's explosive United States military report on the topic of sexuality in southern Afghanistan was leaked to mainstream American media, it generated a firestorm of attention and reaction. While some of the findings regarding Afghan sexual practices are simply of cultural interest, other findings raise grave humanitarian issues, such as the cyclical abuse of young boys, perpetuated over countless generations. In *Crossing the Wire*, Cardinalli invites readers to share her rare experiences working on the farthest front of the War on Terror as a female member of one of the Pentagon's Human Terrain System teams in the Pashtun-inhabited southern region. Cardinalli opens an intimate window into the fascinating and almost surreal difficulty of our military's job in that country, and the indispensable place of a woman's hand in the world of war. From women's rights to Afghanistan's economic development and security to the recruitment for and development of terrorism worldwide, Afghan sexuality has profound and disturbing consequences on many aspects of

life. Cultural sexism is not simply the province of Central Asians; it's also present in our own politico-military culture. This book goes far beneath the headlines of our seemingly endless war in Afghanistan to inform us of the exact situation with the opposition, in more important ways than one. It is a must-read for every citizen concerned with our—or the Afghan people's—progress henceforth in that region.

In My Father's Country Saima Wahab, 2012 Relates the author's decision, years after her father was taken away by the KGB, to relocate to her uncle's home in America, where she pursued an education and worked as an interpreter before becoming a cultural adviser for the U.S. Army.

The Rise and Decline of U.S. Military Culture Programs, 2004-20 Kerry B. Fosher, Lauren Mackenzie, 2021 Though the priorities of senior military leaders inevitably change over time, the pressing need for American Service personnel to accommodate the human dimension for success in their ongoing military operations has not diminished. That capability now may be even more important than ever. Almost inevitably, the requirement will reach a critical stage in some future crisis. This book compiles the insights and findings of some of the most determined and resourceful scientists, scholars, and practitioners engaged in the military's culture programs to inculcate the new capabilities in the early twenty-first century. The authors do not gloss over failures and dead ends. Rather, their expectation is that by presenting the bad with the good, they can help future generations engaged in the same task avoid their pitfalls and build on their work. More importantly, the authors hope that their writing might reach those who are still engaged in building cultural capabilities and that they will find encouragement

to continue this essential work--

From Sputnik to Minerva Sean Kay, 2009 Rather than focusing primarily on traditional professional military educ., this analysis examines how educ. has been used as a tool of American power. Four major moments of transformation in the international system are surveyed to illustrate a link between 'strategic educational capacity,' defined as the application of attained knowledge and skills, and national power. An important educational capacity is emerging in the new Minerva program in the DoD and other transformational educational concepts with security applications. Educ. is gaining an increasing interest among American decisionmakers as a strategic component of American power and an essential asset for successful military operations in the new global security environment.

Under Construction Kerry B. Foshier, 2010-07-15 In the aftermath of the 9/11 terrorist attacks, security became the paramount concern of virtually everyone involved in governing the United States. While the public's most enduring memories of that time involved the actions of the Bush administration or Congress, the day-to-day reality of homeland security was worked out at the local level. Kerry B. Foshier, having begun an anthropological study of counterterrorism in Boston a few months prior to the attacks, thus found herself in a unique position to observe the formation of an immensely important area of government practice. Under Construction goes behind the headlines and beyond official policy to describe the human activities, emotions, relationships, and decisions that shaped the way most Americans experienced homeland security. Foshier's two years of fieldwork focused on how responders and planners actually worked, illuminating the unofficial strategies that allowed them to resolve conflicts and get things done in the absence of a functioning

bureaucracy. Given her unprecedented access, Fosher's account is an exceptional opportunity to see how seemingly monolithic institutions are constructed, maintained, and potentially transformed by a community of people.

Social Science Goes to War Montgomery

McFate, Janice H. Laurence, 2015-01-11 The Human Terrain System (HTS) was catapulted into existence in 2006 by the US military's urgent need for knowledge of the human dimension of the battlespace in Iraq and Afghanistan. Its centrepiece was embedded groups of mixed military and civilian personnel, known as Human Terrain Teams (HTTs), whose mission was to conduct social science research and analysis and to advise military commanders about the local population. Bringing social science - and actual social scientists - to the wars in Iraq and Afghanistan was bold and challenging. Despite the controversy over HTS among scholars, there is little good, reliable source material written by those with experience of HTS or about the actual work carried out by teams in theatre. This volume goes beyond the anecdotes, snippets and blogs to provide a comprehensive, objective and detailed view of HTS. The contributors put the program in historical context, discuss the obstacles it faced, analyse its successes, and detail the work of the teams downrange. Most importantly, they capture some of the diverse lived experience of HTS scholars and practitioners drawn from an eclectic array of the social sciences.

HUMAN TERRAIN SYSTEM: OPERATIONALLY RELEVANT SOCIAL SCIENCE RESEARCH IN IRAQ AND AFGHANISTAN. Christopher J. Sims, 2022

Cold War Anthropology David H. Price, 2016-04-01 In Cold War Anthropology, David H. Price offers a provocative account of the profound influence that the American security state has had on the field of anthropology since

the Second World War. Using a wealth of information unearthed in CIA, FBI, and military records, he maps out the intricate connections between academia and the intelligence community and the strategic use of anthropological research to further the goals of the American military complex. The rise of area studies programs, funded both openly and covertly by government agencies, encouraged anthropologists to produce work that had intellectual value within the field while also shaping global counterinsurgency and development programs that furthered America's Cold War objectives. Ultimately, the moral issues raised by these activities prompted the American Anthropological Association to establish its first ethics code. Price concludes by comparing Cold War-era anthropology to the anthropological expertise deployed by the military in the post-9/11 era.

The Counter-counterinsurgency Manual Network of Concerned Anthropologists. Steering Committee, 2009 At a moment when the U.S. military decided it needed cultural expertise as much as smart bombs to prevail in Iraq and Afghanistan, the Pentagon's Counterinsurgency Field Manual offered a blueprint for mobilizing anthropologists for war. The Counter-Counterinsurgency Manual critiques that strategy and offers a blueprint for resistance. Written by the founders of the Network of Concerned Anthropologists, the Counter-Counterinsurgency Manual explores the ethical and intellectual conflicts of the Pentagon's Human Terrain System; argues that there are flaws in the Counterinsurgency Field Manual (ranging from plagiarism to a misunderstanding of anthropology); probes the increasing militarization of academic knowledge since World War II; identifies the next frontiers for the Pentagon's culture warriors; and suggests strategies for resisting the

deformation and exploitation of anthropological knowledge by the military. This is compulsory reading for anyone concerned that the human sciences are losing their way in an age of empire.

Militarization Roberto J. González, Hugh Gusterson, Gustaaf Houtman, 2019-12-06 *Militarization: A Reader* offers a range of critical perspectives on the dynamics of militarization as a social, economic, political, cultural, and environmental phenomenon. It portrays militarism as the condition in which military values and frameworks come to dominate state structures and public culture both in foreign relations and in the domestic sphere. Featuring short, readable essays by anthropologists, historians, political scientists, cultural theorists, and media commentators, the Reader probes militarism's ideologies, including those that valorize warriors, armed conflict, and weaponry. Outlining contemporary militarization processes at work around the world, the Reader offers a wide-ranging examination of a phenomenon that touches the lives of billions of people. In collaboration with Catherine Besteman, Andrew Bickford, Catherine Lutz, Katherine T. McCaffrey, Austin Miller, David H. Price, David Vine
