Secret Science María M. Portuondo,2009-08-01 The discovery of the New World raised many questions for early modern scientists: What did these lands contain? Where did they lie in relation to Europe? Who lived there, and what were their inhabitants like? Imperial expansion necessitated changes in the way scientific knowledge was gathered, and Spanish cosmographers in particular were charged with turning their observations of the New World into a body of knowledge that could be used for governing the largest empire the world had ever known. As María M. Portuondo here shows, this cosmographic knowledge had considerable strategic, defensive, and monetary value that royal scientists were charged with safeguarding from foreign and internal enemies. Cosmography was thus a secret science, but despite the limited dissemination of this body of knowledge, royal cosmographers applied alternative epistemologies and new methodologies that changed the discipline, and, in the process, how Europeans understood the natural world.

**Xicoténcatl** Guillermo Castillo-Feliú,2010-06-29 As Spain's New World colonies fought for their independence in the early nineteenth century, an anonymous author looked back on the earlier struggle of native Americans against the Spanish conquistadores and penned this novel, Xicoténcatl. Writing from a decidedly anti-Spanish perspective, the author describes the historical events that led to the march on Tenochtitlán and eventual conquest of the Aztec empire in 1519 by Hernán Cortés and his Indian allies, the Tlaxcalans. Xicoténcatl stands out as a beautiful exposition of an idealized New World about to undergo the tremendous changes wrought by the Spanish Conquest. It was published in Philadelphia in 1826. In his introduction to this first English translation, Guillermo I. Castillo-Feliú discusses why the novel was published outside Latin America, its probable author, and his attitudes toward his Spanish and Indian characters, his debt to Spanish literature and culture, and the parallels that he draws between past and present struggles against Spanish domination in the Americas.

**Oeil et Maladies systémiques** SÈVE Pascal, KODJIKIAN Laurent,2013-11-25 Les maladies systémiques regroupent un cadre hétérogène de maladies (connectivites, vascularites, granulomatoses...) dont la pathogénie est caractérisée par une atteinte de plusieurs organes. Bien qu'il s'agisse pour la plupart de maladies orphelines, ces pathologies sont susceptibles d'intéresser tous les médecins du fait de leur polymorphisme clinique. L'atteinte ophtalmologique est fréquente dans bon nombre de ces maladies, principalement en rapport avec une atteinte inflammatoire ou vasculaire. Elle constitue souvent une clé pour le diagnostic et peut mettre en jeu le pronostic fonctionnel en raison du risque de cécité. La sémiologie oculaire des maladies systémiques et les moyens d'explorations ophtalmologiques sont souvent mal connus des internistes ou des spécialistes d'organes. Inversement, les maladies systémiques sont l'objet de nombreuses interrogations de la part des ophtalmologistes. De ce constat est né Œil et Maladies systémiques qui présente, en 50 chapitres : • les principaux syndromes ophtalmologiques et les moyens d'explorations, destinés principalement aux non-ophtalmologistes • l'expression ophtalmologique des maladies systémiques (connectivites et vascularites, certaines maladies infectieuses et autres affections multiviscérales) ainsi que les aspects diagnostiques, pronostiques et thérapeutiques. Le professeur Pascal Sève, interniste, et le professeur Laurent Kodjikian, ophtalmologiste, tous deux rattachés à hôpital de la Croix-Rousse à Lyon, ont coordonné l'ouvrage dont les rédacteurs sont issus des diverses spécialités concernées : ophtalmologistes et internistes bien sûr, mais également spécialistes d'organes tels que dermatologues, néphrologues, neurologues, etc., tous référents reconnus dans leur domaine d'expertise. Ce livre apporte des réponses utiles et précises aux praticiens confrontés aux atteintes ophtalmologiques des maladies systémiques. Il intéressera donc les ophtalmologistes, internistes, rhumatologues, neurologues, pneumologues et autres spécialistes d'organes.

Fashion and Modernity Christopher Breward,Caroline Evans,2005 What is the relationship between fashion and modernity, and how is this unique relationship manifested in the material world? This book considers how the relationship between fashion and modernity tests the very definition of modernity and enhances our understanding of the role of fashion in the modern world.

**Moral Questions** R. Rhees,1999-08-12 Rush Rhees questions the viability of moral theories and the general claims they make in ethics. He shows how one can both be concerned with knowing what one ought to do while recognising that one's answer is a personal one. These insights, arrived at in a distinctive style, characteristic of Rhees, are then applied to issues of life and death, human sexuality and our relations to animals. To recognise why philosophy cannot answer such questions for us is an affirmation, not a denial, of their importance.

*Identity Before Identity Politics* Linda Nicholson,2008-11-20 In the late 1960s identity politics emerged on the political landscape and challenged

prevailing ideas about social justice. These politics brought forth a new attention to social identity, an attention that continues to divide people today. While previous studies have focused on the political movements of this period, they have neglected the conceptual prehistory of this political turn. Linda Nicholson's engaging book situates this critical moment in its historical framework, analyzing the concepts and traditions of racial and gender identity that can be traced back to late eighteenth-century Europe and America. She examines how changing ideas about social identity over the last several centuries both helped and hindered successive social movements, and explores the consequences of this historical legacy for the women's and black movements of the 1960s. This insightful study will be of particular interest to students and scholars of political history, identity politics and US history.
