Range Rover First Generation James Taylor, 2018-04-23 The Range Rover's designers intended it to be a more comfortable and road-friendly passenger-carrying Land Rover, but customers quickly saw something much more in it. During the 1970s, while its immense practicality and capability were appreciated and acknowledged, a Range Rover became a sought-after and prestigious possession. It went on to change the face of Land Rover for ever. *Range Rover First Generation - The Complete Story* delves into the real story of the Range Rover, examining what lay behind the multiple changes in its twenty-six years of production. The book covers the full development story; custom and utility conversions; Range Rovers for the US market; full technical specifications and Range Rovers assembled overseas. If ever a car deserved the over-used epithet 'iconic', the first-generation Range Rover is it. The book provides an insight into the little-known difficulties and problems that were so well concealed by the Range Rover's makers and is a must read for all Range Rover and Land Rover enthusiasts. Superbly illustrated with 223 colour and 97 black & white photographs.

Range Rover Second Generation James Taylor, 2018-09-23 The second generation Range Rover was arguably Land Rover's first model designed as a luxury vehicle. It was a major leap for the company, but a very successful one as well. Despite controversy over its looks, and some initial teething problems, it became a worthy successor to the much-loved original. *Range Rover Second Generation The Complete Story* draws on the memories of designers and engineers as well as on a wide variety of factory sources to provide the most authoritative history of the mode yet. The book covers the full development history; the changes during eight years of production; Range Rovers for the North American market; full technical specifications and finally Range Rovers and the emergency services. A companion volume to the author's *Range Rover First Generation - The Complete Story* (Crowood 2018).

Land Rover Defender Mike Gould, 2016-10-01 Known around the globe as an icon of British engineering, the Land Rover Defender is the ultimate off-roader that has delighted owners for generations. Combining military utility with classic and distinctive design, the Defender had been a ubiquitous presence on the automobile scene since its release more than half a century ago. But 68 years since the first model came on the market, the production line came to a halt in January 2016. This presents the perfect opportunity to look back over the Land Rover's history, from its first iteration as a utility vehicle in 1948, to the 21st Century special editions. Landy fans and petrol-heads alike will love Land Rover Defender, a highly illustrated collection of classic and limited edition models, filled with specs, stats, and images of Defenders both at home and abroad. From its reputation as the essential go-anywhere vehicle, the Defender has even won some famous fans, and owners can include the Queen, Sir Winston Churchill and actor Steve McQueen amongst their numbers. In recent years, the Defender has gained a second life as a city vehicle, and proves itself to be just as at home bombing around the streets of London as it always has been in the West Country mud or on the African savannah. The last model came off the production line in February 2016, and Land Rover Defender will be a treasure trove for car lovers and Landy owners alike.

Land Rover Series III Maurice Thurman, 2018-08-07 The Series III Land Rover further developed the successive refinements of the Series I, II and IIA models, yet remained true to its original design as a utility vehicle for farmers; one that could be repaired and maintained with the minimum of specialist tools. First Overland Tim Slessor, 2016-03-07 Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys – half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were 'just too many rivers and too few roads'. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work – wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore – to flash bulbs and champagne. Now, fifty years on, their book, 'First Overland', is republished – with a foreword by Sir David Attenborough. After all, it was he who gave them that film.

Jue 477 Martin Port, 2020-09 Revealed to the world in 1948, the Land-Rover

not only revived the Rover Company's fortunes in an austerity-riddled post-war period, but galvanized its future, thanks to the model's almost immediate success. With the manufacture of an initial 48 'pre-production' examples coming to a close, the first official production models were assembled - starting with chassis 860001. As original factory records prove, this pivotal vehicle was destined for His Royal Highness King George VI, but the decision was made to postpone the presentation and instead, 'number one' was retained by the factory until 1950, when it was registered JUE 477 before leaving Rover Company ownership. After decades left out in the cold and exposed to the elements, 860001 had certainly seen better days, but thanks to the determination of Sir Jim Ratcliffe, founder and Chairman of INEOS, the future of JUE 477 was secured in 2017. Over the next two years, a dedicated team of experts, led by chief restorer, Julian Shoolheifer set about restoring the vehicle while retaining as much of its original DNA as was physically, and safely, possible and making sure that this remarkable vehicle's history and past life was still worn with pride.
