Performance Lighting Design Nick Moran,2014-12-30 Really does enable anyone from first year student to the established lighting designer to learn more and improve Focus, the Journal of the Association of Lighting Designers New technologies have made lighting more prominent in live performances of all kinds, not just stage theatre, and in many courses lighting has been subsumed into 'performance lighting'. Performance Lighting Design is a practical guide to the art and technique of lighting for the stage, concerts, and live events. The book will also cover the use of projected images in performance including projected scenery on the West End stage, in fringe shows, and on the stadium rock stage, as well as the use of images from live camera and from other sources as performers. The book will serve students of lighting design and will also be accessible to anyone with an awareness of technical theatre. Practical knowledge is combined with aesthetic and theoretical considerations. The book will also address the difficult area of getting inspiration and evolving design ideas through a broad range of performance genre. The author will discuss the pros and cons of several computer based techniques, and incorporate 25 years of his own professional experience in the UK and Europe.

Sedimentologic Analysis of Cores from the Upper Triassic Chinle Formation and the Lower Permian Cutler Formation, Lisbon Valley, Utah Russell F. Dubiel,Janet L. Brown,1993 Five uranium exploration cores from Lisbon Valley in the Paradox Basin of southeastern Utah provide examples of sedimentary structures and lithofacies from the Lower Permian Cutler Formation and the overlying Moss Back Member of the Upper Triassic Chinle Formation. The Cutler Formation consists of reddish-brown to purple, arkosic sandstone, siltstone, and mudstone of fluvial and floodplain origin interbedded with reddish-orange sandstone and mud-stone deposited in sabkha, eolian dune, and sand-sheet settings. The colors are indicative of the respective depositional settings. An erosional nonconformity separates the top of the Cutler from the overlying Moss Back Member of the Chinle Formation. The Moss Back consists of greenish- to bluish-gray limestone-nodule conglomerate, siliciclastic sandstone, and siltstone deposited in high-energy fluvial channels and crevasse splays and on adjacent levees and floodplains. The drab colors of the Moss Back reflect the high organic-carbon content of strata deposited and preserved below the water table. These five cores record eolian and fluvial sedimentary structures and lithofacies sequences not well preserved in outcrops, they provide the basis for interpretation and comparison of depositional environments from lithofacies analysis in core and outcrop studies, and they establish the sedimentologic background for future petrographic and geochemical research on cores and outcrops from the Lisbon Valley area.

The VNR Concise Encyclopedia of Mathematics W. Gellert,2012-12-06 It is commonplace that in our time science and technology cannot be mastered without the tools of mathematics; but the same applies to an ever growing extent to many domains of everyday life, not least owing to the spread of cybernetic methods and arguments. As a consequence, there is a wide demand for a survey of the results of mathematics, for an unconventional approach that would also make it possible to fill gaps in one's knowledge. We do not think that a mere juxtaposition of theorems or a collection of formulae would be suitable for this purpose, because this would over emphasize the symbolic language of signs and letters rather than the mathematical idea, the only thing that really matters. Our task was to describe mathematical interrelations as briefly and precisely as possible. In view of the overwhelming amount of material it goes without saying that we did not just compile details from the numerous text-books for individual

branches: what we were aiming at is to smooth out the access to the specialist literature for as many readers as possible. Since well over 700000 copies of the German edition of this book have been sold, we hope to have achieved our difficult goal. Colours are used extensively to help the reader. Important definitions and groups of formulae are on a yellow background, examples on blue, and theorems on red.

advanced very high resolution radiometer AVHRR Arthur P. Cracknell,1997-04-23 Since the launch of the first of the Advanced Very High Resolution Radiometers (AVHRRs) in 1978, the data from these instruments has used for a wide range of non-meteorological applications. In this book, the author describes satellite system, AVHRRs, control of the spacecraft, and data- recovery arrangements. The book covers processing of the data to extract useful environmental information. The applications of the data to marine problems, based primarily on the study of sea-surface temperatures from the thermal-infrared channels of the instrument, are considered, as well as the study of vegetation and a whole variety of other land-based and hydrological applications.

Annual Report - Geological Survey of Western Australia Geological Survey of Western Australia,1972

Sedimentary Basin Tectonics from the Black Sea and Caucasus to the Arabian Platform Marc Sosson,2010 This wide area of the Alpine-Himalayan belt evolved through a series of tectonic events related to the opening and closure of the Tethys Ocean. In doing so it produced the largest mountain belt of the world, which extends from the Atlantic to the Pacific oceans. The basins associated with this belt contain invaluable information related to mountain building processes and are the locus of rich hydrocarbon accumulations. However, knowledge about the geological evolution of the region is limited compared to what they offer.
