Nuclear Power or a Promise Lost Edward T. Burns,2020-05-01 This book captures the status of current electrical energy markets including the

principal forces affecting decisions on selecting an energy source. It represents a seminal work that lays out the electrical energy decision tree for selecting an energy source in a world that is on the verge of catastrophic global warming because of the choices that have been made in the name of cheap energy. The impetus for this book includes the dire need to mitigate continued anthropogenic causes of global warming by turning to carbon free energy sources. Nuclear energy represents such a carbon-free energy source and could be a partial solution to the existential threat facing future society---the threat of a warming planet and its consequential, catastrophic effects on future generations. The world is at a crossroads in human interaction with their environment. The effects of radiation and the relationship of nuclear power to nuclear weapons are both discussed in an understandable and compelling manner. Nuclear energy is contrasted with other energy sources including fossil fuels and renewable energy sources regarding the risks and benefits imposed by each. Important personalities and world events that shaped nuclear power's development are recounted. The historical origins of nuclear power are outlined and the continued impetus to include nuclear power as part of the electric grid energy mix is assessed exposing the obstacles and road blocks to the continued use of nuclear power. Specific attention is paid to revealing the causes and lessons learned from the three severe accidents in commercial nuclear plants: TMI-2, Chernobyl, and Fukushima. An extensive discussion of nuclear waste disposal is provided as

part of the decision tree for energy selection. The context for the future of nuclear power as a viable energy source is illuminated by the current battle between economic growth and the harm created by burning fossil fuels. The status of the world's climate and projections for the disruptive effects of global warming on future populations, migration, economics, and world strife are debated against the backdrop of an increasing world population and the drive by developing nations to achieve economic parity with the industrialized nations. Within the context of increased world strife, the quest by nations to obtain nuclear weapons is also discussed. The steps taken by the world to limit nuclear weapons proliferation are examined with emphasis on potential links between nuclear power generation and access to nuclear weapons. The final chapter discusses the moral responsibility of current generations with respect to future generations, specifically, the applicability of intergenerational equity in political and social decision-making regarding the actions that add to global warming and those risk averse actions that can be taken to minimize global warming.

Saving Arcadia Heather Shumaker,2017-04-01 *Saving Arcadia: A Story of Conservation and Community in the Great Lakes* is a suspenseful and intimate land conservation adventure story set in the Great Lakes heartland. The story spans more than forty years, following the fate of a magnificent sand dune on Lake Michigan and the people who care about it. Author and narrator Heather Shumaker shares the remarkable untold stories behind protecting land and creating new nature preserves. Written in a compelling narrative style, the book is intended in part as a case study for landscape-level conservation and documents the challenges of integrating economic livelihoods into conservation and what it really means to “preserve” land over time. This is the story of a small band of determined townspeople and how far they went to save beloved land and endangered species from the grip of a powerful corporation. *Saving Arcadia* is a narrative with roots as deep as the trees the community is trying to save; something set in motion before the author was even born. And yet, Shumaker gives a human face to the changing nature of land conservation in the twenty-first century. Throughout this chronicle we meet people like Elaine, a nineteen-year-old farm wife; Dori, a lakeside innkeeper; and Glen, the director of the local land trust. Together with

hundreds of others they cross cultural barriers and learn to help one another in an effort to win back the six-thousand-acre landscape taken over by Consumers Power that is now facing grave devastation. The result is a triumph of community that includes working farms, local businesses, summer visitors, year-round residents, and a network of land stewards. A work of creative nonfiction, *Saving Arcadia* is the adventurous tale of everyday people fighting to reclaim the land that has been in their family for generations. It explores ideas about nature and community, and anyone from scholars of ecology and conservation biology to readers of naturalist writing can gain from *Arcadia's* story.
