**Combustion 2e** Irvin Glassman, 2012-12-02 Combustion, Second Edition focuses on the underlying principles of combustion and covers topics ranging from chemical thermodynamics and flame temperatures to chemical kinetics, detonation, ignition, and oxidation characteristics of fuels. Diffusion flames, flame phenomena in premixed combustible gases, and combustion of nonvolatile fuels are also discussed. This book consists of nine chapters and begins by introducing the reader to heats of reaction and formation, free energy and the equilibrium constants, and flame temperature calculations. The next chapter explores the rates of reactions and their temperature dependency; simultaneous interdependent and chain reactions; pseudo-first-order reactions; the partial equilibrium assumption; and pressure effect in fractional conversion. The chain branching reactions and criteria for explosion are then considered, along with the limits and oxidation characteristics of fuels such as hydrogen, carbon monoxide, and hydrocarbons. The remaining chapters look at the laminar flame speed and stability limits of laminar flames; deflagration and detonation; burning in convective atmospheres; and the theory of thermal ignition. The final chapter is devoted to the burning of nonvolatile fuels such as coal. This monograph will be a valuable resource for students and teachers of physics.

**Law and Enforcement in Ptolemaic Egypt** John Bauschatz, 2013-10-14 This book examines the activities of a broad array of police officers in Ptolemaic Egypt (323-30 BC) and argues that Ptolemaic police officials enjoyed great autonomy, providing assistance to even the lowest levels of society when crimes were committed. Throughout the nearly 300 years of Ptolemaic rule, victims of crime in all areas of the Egyptian countryside called on local police officials to investigate crimes; hold trials; and arrest, question and sometimes even imprison wrongdoers. Drawing on a large body of textual evidence for the cultural, social and economic interactions between state and citizen, John Bauschatz demonstrates that the police system was efficient, effective, and largely independent of central government controls. No other law enforcement organization exhibiting such a degree of autonomy and flexibility appears in extant evidence from the rest of the Greco-Roman world.

**Studies of Arianism** Henry M. Gwatkin, 2005-05-16 Henry Melvill Gwatkin (1844-1916), theologian and church historian, spent the whole of his working life at Cambridge. Appointed lecturer at St. John's College in 1874, he succeeded Mandrel Creighton as Dixie Professor of Ecclesiastical History in 1891. He was Gifford lecturer in 1903. Gwatkin was a man of wide and deep learning, with an exceptional knowledge of original sources and a singularly keen eye for vital facts and tendencies in difficult and perplexing periods. As a teacher, despite bad sight and a poor delivery, he was outstanding. He was a clear, witty, and stimulating lecturer, but in the opinion of some of his pupils he was at his best in the Greek Testament readings he conducted in succession to F. J. A. Hort. Gwatkin easily stood at the head of the Cambridge lecturers whom I regularly heard wrote T. R. Glover, one of his former pupils. His subject was Church History and he knew it in and out, back and forth, root and branch - the original

authorities and secondary.

**Completion, Volume 2/** Jindrich Toman,2013-01-01 Roman Jakobson's writings range over the entire field of general linguistics, as well as embracing Slavic linguistics and literature theory. Jakobson has had a tremendous influence on the development of linguistic theory. He was a founder of and prime mover in the Prague Linguistic Circle. On the basis of the new structuralist concepts, he set forth bold theories of general linguistics and illustrated them with brilliant demonstrations based on Slavic and other languages. Taking a leading role in the elucidation of the structural linguistic field of phonology, Jakobson used these insights to develop new trends in historical phonology. Altogether, his linguistics appears to incorporate the technical design of modern theoretical concepts, but at the same time transcends purely formal modeling through its interdisciplinary focus upon historical and poetic matters. Jakobson was enormously successful in presenting innovative theoretical insights and relating them to possible practical applications. Specifically, his work on the general processes of language acquisition and loss, on child language and aphasia, opened up entirely new methods for linguists and doctors alike. The series *Selected Writings* represents the whole range of Roman Jakobson's field of research.
