*Introduction to Rocket Technology* V. I. Feodosiev,G. B. Siniarev,2014-05-12 Introduction to Rocket Technology focuses on the dynamics, technologies, aerodynamics, ballistics, theory of servomechanisms, principles of navigation instruments, and electronics involved in rocket technology. The publication first takes a look at the basic relationships in the theory of reactive motion; types of jet propelled aircraft and their basic construction; and types of reaction motors and their construction. Discussions focus on air breathing motors, anti-aircraft rockets, long range bombardment rockets, surface to surface, short range bombardment missiles, thrust of a rocket motor, and operating efficiency of a rocket motor. The text then examines rocket motor fuels and processes in the combustion chamber of a rocket motor. The manuscript ponders on the flow of combustion products through the nozzle of a rocket motor and forces and moments acting on the rocket in flight. Topics include stabilizing and damping moments, steering forces, aerodynamic forces, properties of supersonic nozzle, gas flow in a supersonic nozzle, cooling of liquid rocket motors, and basic laws of gas flow. The book then elaborates on rocket flight trajectory, basic principles of stabilization and steering, and ground equipment and launching devices. The publication is a valuable source of information for engineers and researchers interested in rocket technology.

*Books and Plays in Films, 1896-1915* Denis Gifford,1991 This is the world's first catalogue of cinematograph films adapted from literary, artistic and other media sources for the period 1896 through 1915: the first twenty years of motion pictures. It includes novels, plays, non-fiction books, short stories, biographies, poems, operas, songs, cartoons and comic strips. The main arrangement is by author/creator, whose 861 names are arranged alphabetically, under which the film adaptations are listed chronologically. This book relates only to silent pictures, of course, and as production and distribution was global at the time, films are included from the United States, the United Kingdom, France, Germany, Italy, Australia, Canada, Scandinavia, Japan and other countries. A checklist of the 239 film companies included will be found as an appendix in the back of the book.

*Celestial scenery* Thomas Dick,1840

**The Man in the Moone** Francis Godwin,2009-08-14 Arguably the first work of science fiction in English, Francis Godwin's *The Man in the Moone* was published in 1638, pseudonymously and posthumously. The novel, which tells the story of Domingo Gonsales, a Spaniard who flies to the moon by geese power and encounters an advanced lunar civilization, had an enormous impact on the European imagination for centuries after its initial publication. With

its discussion of advanced ideas about astronomy and cosmology, the novel is an important example of both popular fiction and scientific speculation. This Broadview Edition includes a critical introduction that places the text in its scientific and historical contexts. The rich selection of appendices includes related writings by Godwin and his predecessors and contemporaries on magnetism, human flight, voyages to real and unreal lands, and the possibility of extra-terrestrial life.

**Secret of the Ages** Brinsley Le Poer Trench (Lord Clancarty), 1976

*A Bomb in the Heart* Wajdi Mouawad, 2012 This new play from internationally-acclaimed playwright Wajdi Mouawad explores the understanding of the voice deep within.

*Conversations on the Plurality of Worlds* M. de Fontenelle (Bernard Le Bovier), 1803

**Anquetil, Alone** Paul Fournel, 2017-09-07 Shortlisted for the Sports Book Awards 2018 for Biography of the Year and Cycling Book of the Year There are things he does alone, and things that he alone does. Jacques Anquetil was a cyclist with an aristocratic demeanor and a relaxed attitude to rules and morals. His womanising and frank admissions of doping appalled 1960s French society, even as his five Tour de France wins enthralled it. Paul Fournel was besotted with him from the start (Too young to understand, I was nevertheless old enough to admire) and followed Anquetil's career with the passion of a fan and the eye of a poet. In this stunningly original biography of a complex and divisive character, Fournel – author of the seminal *Vlo* (or *Need for the Bike*) – blends the story of Anquetil's life with scenes from his own, to create a classic of cycling literature.

*Other Worlds Than Ours* Richard Anthony Proctor, 1894

Oswald Wirth Tarot Deck Oswald Wirth, 2003-06 The Major Arcana cards contain Hebrew letters originally attributed to each card by Eliphas Levi.

Star Charles Ischir Defontenay, P. J. Sokolowski, 2007-06-01 Eleven years before Jules Verne took his readers to the Moon, 40 years before Wells devised the Time Machine, nearly a century before Tolkien published *Lord Of The Rings*, Charles Defontenay wrote the imaginary history of an entire star system located in the far off constellation of Cassiopeia. Long before science fiction writers dreamed of interstellar travels, alien races and the colonization of other planets, in 1854, on the eve of the Crimean War, Charles Defontenay penned the first modern space opera. STAR is a treasure chest of alien lore, the history of a world and its varied species, their rise and fall, triumphs and failures. It includes samples of their literature, arts and moral codes. Above all, it is a visionary work without precedent in the history of science fiction.

**The Empire of a Thousand Planets** Pierre Christin, 2011 Exploring Syrté, the capital planet of a system of one thousand worlds, agents Valerian and Laureline must decide whether this decaying empire poses any danger to Earth.

*The Flying Saucers Have Landed* George Adamski, Desmond Leslie, 2017-11-06 If Adamski and the six companions who

swore an affidavit to his Space Man encounter are not trying to pull off a gigantic hoax, then this is quite possibly the greatest story ever. That was what the Daily Sketch wrote about Flying Saucers Have Landed. For, in the second part of this book, Adamski swears that he saw a space ship land in the desert in California and that he made contact with one of its occupants. More, he provides considerable testimony to support his claims. Desmond Leslie, who contributes the first part of the book, goes even further, asserting that flying saucers have been landing on earth for thousands of years, and gives records of their arrivals
