Helping Library Users with Legal Questions Deborah A. Hamilton, 2021-07-07 Learn how to assist library patrons, including self-represented litigants, through legal research instruction, programming, and outreach. According to the National Center for State Courts, in 76 percent of civil cases in the United States at least one of the parties represents themselves. As more people represent themselves in court, more are coming to the library to seek answers to legal questions. Do you ever feel panicked when someone asks you a legal reference question? Are you are not sure where to look for information or how much information you can provide? What can libraries do to assist self-represented litigants? Deborah Hamilton began her career as a law librarian with no formal legal training. Now, not only does she help people with legal reference questions, but she also provides legal

programming and outreach to the community. Learn the difference between legal information and legal advice as well as how to connect with community groups who provide legal services. In this book, Hamilton teaches librarians how to teach themselves about legal research and resources, as well as offering practical ideas for types of legal programs and outreach that they can proactively offer patrons.

Law Library Collection Development in the Digital Age

Gordon Russell, Michael Chiorazzi, 2018-10-24 While the digital revolution has touched every aspect of law librarianship, perhaps nowhere has the effect been more profound than in the area of collection development. Many of the materials law libraries traditionally collected in print form are now available in electronic format. Digital technology has affected the way we select, order, and process legal materials. The World Wide Web has created an explosion of both commercial and private online publishing. The cost of electronic publishing has caused many traditional law book publishers to sell their companies rather than invest in the needed technologies to compete in the 21st century. Small publishers and book jobbers have been forced to reinvent themselves. The amount of legal information available and its costs continue to soar. *Law Library Collection Development in the Digital Age* deals with these and other issues related to law library collection development. Chapters range from the theoretical to the practical. Inspired by Penny Hazleton's seminal paper "How Much of Your Print Collection is Really on Lexis or Westlaw?" the editors and chapter authors of *Law Library Collection Development in the Digital Age* endeavor to expand on professor Hazleton's work, with examinations of: the role of law libraries in strategic planning for distance learning Web mirror sites trust vs. antitrust issues access vs. ownership issues how law libraries deal with electronic court records, dockets, and filings the growth of e-journals as they relate to legal publishing how the Hein Greenslips and Blackwell North America's Bookservice cover legal materials past, present, and

future roles of specialized book jobbers and more! Anyone interested in law librarianship or the information industry will find this book informative and useful. Make it a part of your professional collection today.
