The Best of LCD Dave the Spazz,2007-10-04 Named the best radio station in America by Rolling Stone magazine four years running, WFMU is considered the alternative radio station. LCD (Lowest Common Denominator), the station's program guide—begun in 1986 as a visual counterpart to WFMU's oddball programming—was a wicked cocktail of satire, cultural news, alternative history, and provocative artwork that has earned its own devoted cult followers. It ceased publication in 1998 and its back issues have become treasured—and valuable—collector's items. Dave the Spazz has spent the past twenty years hosting a weekly radio show on WFMU, self-publishing, freelance writing, making artwork, singing in punk-rock bands, and holding down one crummy job after another.

Backyard Bug Battle Scott Nickel,2006 Buzz spills an invention of his Dad's super-fast grow juice, and creates gigantic insects and flowers. Written in graphic-novel format.

Blue Water Navy Vietnam Veterans and Agent Orange Exposure Institute of Medicine,Board on the Health of Select Populations,Committee on Blue Water Navy Vietnam Veterans and Agent Orange Exposure,2011-07-01 Over 3 million U.S. military personnel were sent to Southeast Asia to fight in the Vietnam War. Since the end of the Vietnam War, veterans have reported numerous health effects. Herbicides used in Vietnam, in particular Agent Orange have been associated with a variety of cancers and other long term health problems from Parkinson's disease and type 2 diabetes to heart disease. Prior to 1997 laws safeguarded all service men and women deployed to Vietnam including members of the Blue Navy. Since then, the Department of Veteran Affairs (VA) has established that Vietnam veterans are automatically eligible for disability benefits should they develop any disease associated with Agent Orange exposure, however, veterans who served on deep sea vessels in Vietnam are not included. These Blue Water Navy veterans must prove they were exposed to Agent Orange before they can claim benefits. At the request of the VA, the Institute of Medicine (IOM) examined whether Blue Water Navy veterans had similar exposures to Agent Orange as other Vietnam veterans. *Blue Water Navy Vietnam Veterans and Agent Orange Exposure* comprehensively examines whether Vietnam veterans in the Blue Water Navy experienced exposures to herbicides and their contaminants by reviewing historical reports, relevant legislation, key personnel insights, and chemical analysis to resolve current debate on this issue.

Bottom of the Ninth John McNally,2003 Skillfully edited by John McNally, *Bottom of the Ninth: Great Contemporary Baseball Short Stories* collects nineteen contemporary baseball short stories from a successful mix of well-established writers, lesser-knowns, and a few up-and-comers. These stories are characterized by the same dramatic elements that draw people to the sport itself--the mythologizing of players, the obsessions and romance of the game, the bonds between players and fans, parents and children. From a key play, a missed catch, a chance lost, these are tales of characters facing high stakes and calls to action, metaphorically and literally, in the bottom of the ninth.

Channeling the Future Lincoln Geraghty,2009-04-02 Though science fiction certainly existed prior to the surge of television in the 1950s, the genre quickly established roots in the new medium and flourished in subsequent decades. In *Channeling the Future: Essays on Science Fiction and Fantasy Television*, Lincoln Geraghty has assembled a collection of essays that focuses on the disparate visions of the past, present, and future offered by science fiction and fantasy television since the 1950s and that continue into the present day. These essays not only shine new light on often overlooked and forgotten series but also examine the 'look' of science fiction and fantasy television, determining how iconography, location and landscape, special effects, set design, props, and costumes contribute to the creation of future and alternate worlds. Contributors to this volume analyze such classic programs as *The Twilight Zone*, *Voyage to the Bottom of the Sea*, and *The Man from U.N.C.L.E.*, as well as contemporary programs, including *Star Trek: The Next Generation*, *Angel*, *Firefly*, *Futurama*, and the new *Battlestar Galactica*. These essays provide a much needed look at how science fiction television has had a significant impact on history, culture, and society for the last sixty years.

New Masters of Poster Design, Volume 2 John Foster,2012-02-01 This second edition of *New Masters of Poster Design* features the best poster designers currently working all over the world. This book brings back a handmade aesthetic that was really never lost, but is celebrating a resurgence among designers who are creating limited-edition prints and pieces for themselves and others that become keepsakes or pieces of art vs. the mass-generated designs we've all become accustomed to—and you won't see this collection of posters anywhere else. Strong visuals accompanied by captions and profiles capture the essence of these collectible prints.

Racing the Beam Nick Montfort,Ian Bogost,2020-02-25 A study of the relationship between platform and creative expression in the Atari VCS, the gaming system for popular games like Pac-Man and Star Wars: The Empire Strikes

Back. The Atari Video Computer System dominated the home video game market so completely that “Atari” became the generic term for a video game console. The Atari VCS was affordable and offered the flexibility of changeable cartridges. Nearly a thousand of these were created, the most significant of which established new techniques, mechanics, and even entire genres. This book offers a detailed and accessible study of this influential video game console from both computational and cultural perspectives. Studies of digital media have rarely investigated platforms—the systems underlying computing. This book, the first in a series of Platform Studies, does so, developing a critical approach that examines the relationship between platforms and creative expression. Nick Montfort and Ian Bogost discuss the Atari VCS itself and examine in detail six game cartridges: Combat, Adventure, Pac-Man, Yars' Revenge, Pitfall!, and Star Wars: The Empire Strikes Back. They describe the technical constraints and affordances of the system and track developments in programming, gameplay, interface, and aesthetics. Adventure, for example, was the first game to represent a virtual space larger than the screen (anticipating the boundless virtual spaces of such later games as World of Warcraft and Grand Theft Auto), by allowing the player to walk off one side into another space; and Star Wars: The Empire Strikes Back was an early instance of interaction between media properties and video games. Montfort and Bogost show that the Atari VCS—often considered merely a retro fetish object—is an essential part of the history of video games.

The Long Land War Jo Guldi,2022-04-19 A definitive history of ideas about land redistribution, allied political movements, and their varied consequences around the world “An epic work of breathtaking scope and moral power, The Long Land War offers the definitive account of the rise and fall of land rights around the world over the last 150 years.” —Matthew Desmond, Pulitzer Prize-winning author of Evicted: Poverty and Profit in the American City Jo Guldi tells the story of a global struggle to bring food, water, and shelter to all. Land is shown to be a central motor of politics in the twentieth century: the basis of movements for giving reparations to formerly colonized people, protests to limit the rent paid by urban tenants, intellectual battles among development analysts, and the capture of land by squatters taking matters into their own hands. The book describes the results of state-engineered “land reform” policies beginning in Ireland in 1881 until U.S.-led interests and the World Bank effectively killed them off in 1974. The Long Land War provides a definitive narrative of land redistribution alongside an unflinching critique of its failures, set against the background of the rise and fall of nationalism, communism, internationalism, information technology, and free-market economics. In considering how we could make the earth livable for all, she works out the important relationship between property ownership and justice on a changing planet.
