**Disease Control Priorities, Third Edition (Volume 8)** Donald A. P. Bundy, Nilanthi de Silva, Susan Horton, Dean T. Jamison, 2017-11-20 More children born today will survive to adulthood than at any time in history. It is now time to emphasize health and development in middle childhood and adolescence--developmental phases that are critical to health in adulthood and the next generation. *Child and Adolescent Health and Development* explores the benefits that accrue from sustained and targeted interventions across the first two decades of life. The volume outlines the investment case for effective, costed, and scalable interventions for low-resource settings, emphasizing the cross-sectoral role of education. This evidence base can guide policy makers in prioritizing actions to promote survival, health, cognition, and physical growth throughout childhood and adolescence.

**Global Monitoring Report 2014/2015** World Bank; International Monetary Fund, 2014-10-21 The Global Monitoring Report 2014/2015: Ending Poverty and Sharing Prosperity was written jointly by the World Bank Group (WBG) and the International Monetary Fund, with substantive inputs from the Organisation for Economic Co-operation and Development. This year's report details, for the first time, progress toward the WBG's twin goals of ending extreme poverty by 2030 and promoting shared prosperity and assesses the state of policies and institutions that are important for achieving them. The report continues to monitor progress on the Millennium Development Goals (MDGs). Also for the first time, the report includes information about high-income countries. It finds that while gaps in living standards have been closing in many countries, the well-being of households in the bottom 40 percent, as measured by the non-income MDGs such as access to education and health services, remains below that of households in the top 60 percent. The focus of this year's report is on three elements needed to make growth more inclusive and sustainable: investment in human capital that favors the poor, the best use of safety nets, and steps to ensure the environmental sustainability of economic growth. These three elements are imperative to all countries' development strategies, and are also fundamental to global efforts to achieve the twin goals, the MDGs, and the Sustainable Development Goals that will succeed the MDGs. Global Monitoring Report 2014/2015 was prepared in collaboration with regional development banks and other multilateral partners.

*Global Health and the Future Role of the United States* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Global Health, Committee on Global Health and the Future of the United States, 2017-09-05 While much progress has been made on achieving the Millennium Development Goals over the last decade, the number and complexity of global health challenges has persisted. Growing forces for globalization have increased the interconnectedness of the world and our interdependency on other countries, economies, and cultures. Monumental growth in international travel and trade have brought improved access to goods and services for many, but also carry ongoing and ever-present threats of zoonotic spillover and infectious disease outbreaks that threaten all. *Global Health and the Future Role of the United States* identifies global health priorities in light of current and emerging world threats. This report assesses the current global health landscape and how challenges, actions, and players have evolved over the last decade across a wide range of issues, and provides recommendations on how to increase responsiveness, coordination, and efficiency â€ both within the U.S. government and across the global health field.

**Orphan Lung Diseases** Vincent Cottin, Luca Richeldi, Kevin Brown, Francis X. McCormack, 2023-04-11 The second edition comprehensively reviews the wide field of rare pulmonary diseases. Issues such as less common diseases affecting the airways, systematic disorders with lung involvement, interstitial lung diseases, and many other orphan conditions of the lungs are explored in this book. The progress and advances made in the field and the limited number of patients presenting each condition makes it very difficult for clinicians to be up-to-date in this field. Readers will discover how to diagnose and manage these rare orphan diseases. *Orphan Lung Diseases: A Clinical Guide to Rare Lung Disease* is a practical, informative book written by a team of international authors with much experience in rare pulmonary diseases. *Orphan Lung Diseases: A Clinical Guide to Rare Lung Disease*, second edition provides synthesized and easily accessible information about the main orphan lung diseases, to aid clinicians in charge of patients with rare disease, or who consider the diagnosis of a rare disease in their patient. It is a practical, informative guide written by a team of international experienced authors in rare pulmonary diseases.

**The Practice of Surgical Pathology** Diana Weedman Molavi, 2017-08-24 In pathology education within North America, there exists a wide gap in the pedagogy between medical school and residency. As a result, the pathology intern often comes into residency unprepared. Completely illustrated in color, this book lays the foundation of practical pathology and provides a scaffold on which to build a knowledge base. It includes basic introductory material and progresses through each organ system. Within each chapter, there is a brief review of salient normal histology, a discussion of typical specimen types, a strategic approach to the specimen, and a discussion of how the multitude of different diagnoses relate to each other.

Mutagenic Impurities Andrew Teasdale, 2022-02-15 Learn to implement effective control measures for mutagenic impurities in pharmaceutical development In *Mutagenic Impurities: Strategies for Identification and Control*, distinguished chemist Andrew Teasdale delivers a thorough examination of mutagenic impurities and their impact on the pharmaceutical industry. The book incorporates the adoption of the ICH M7 guideline and focuses on mutagenic impurities from both a toxicological and analytical perspective. Readers will also benefit from the inclusion of: A thorough introduction to the development of regulatory guidelines for mutagenic and genotoxic impurities, including a historical perspective on the development of the EMEA guidelines and the ICH M7 guideline An exploration of in silico assessment of mutagenicity, including use of structure activity relationship evaluation as a tool in the evaluation of the genotoxic potential of impurities A discussion of a toxicological perspective on mutagenic impurities, including the assessment of mutagenicity and examining the mutagenic and carcinogenic potential of common synthetic reagents Perfect for

chemists, analysts, and regulatory professionals, *Mutagenic Impurities: Strategies for Identification and Control* will also earn a place in the libraries of toxicologists and clinical safety scientists seeking a one-stop reference on the subject of mutagenic impurity identification and control.

**Mass Mobilization in the Democratic Republic of Vietnam, 1945–1960** Alec Holcombe, 2020-08-31 Immediately after its founding by Hồ Chí Minh in September 1945, the Democratic Republic of Vietnam (DRV) faced challenges from rival Vietnamese political organizations and from a France determined to rebuild her empire after the humiliations of WWII. Hồ, with strategic genius, courageous maneuver, and good fortune, was able to delay full-scale war with France for sixteen months in the northern half of the country. This was enough time for his Communist Party, under the cover of its Vietminh front organization, to neutralize domestic rivals and install the rough framework of an independent state. That fledgling state became a weapon of war when the DRV and France finally came to blows in Hanoi during December of 1946, marking the official beginning of the First Indochina War. With few economic resources at their disposal, Hồ and his comrades needed to mobilize an enormous and free contribution in manpower and rice from DRV-controlled regions. Extracting that contribution during the war's early days was primarily a matter of patriotic exhortation. By the early 1950s, however, the infusion of weapons from the United States, the Soviet Union, and China had turned the Indochina conflict into a "total war." Hunger, exhaustion, and violence, along with the conflict's growing political complexity, challenged the DRV leaders' mobilization efforts, forcing patriotic appeals to be supplemented with coercion and terror. This trend reached its revolutionary climax in late 1952 when Hồ, under strong pressure from Stalin and Mao, agreed to carry out radical land reform in DRV-controlled areas of northern Vietnam. The regime's 1954 victory over the French at Điện Biên Phủ, the return of peace, and the division of the country into North and South did not slow this process of socialist transformation. Over the next six years (1954–1960), the DRV's Communist leaders raced through land reform and agricultural collectivization with a relentless sense of urgency. *Mass Mobilization in the Democratic Republic of Vietnam, 1945–1960* explores the way the exigencies of war, the dreams of Marxist-Leninist ideology, and the pressures of the Cold War environment combined with pride and patriotism to drive totalitarian state formation in northern Vietnam.

**Early Childhood Education and Development in Indonesia** Amina Denboba, Amer Hasan, Quentin Wodon, 2015-08-06 Since the early 2000s, Indonesia has taken a number of steps to prioritize early childhood development - ranging from the inclusion of Early Childhood Development (ECD) in the National Education System Law No. 20 in 2003 to a Presidential Declaration on Holistic and Integrated ECD and the launch of the country's first ever ECD Census in 2011. These policy milestones have occurred in parallel with sustained progress on outcomes included in the Millennium Development Goals, including for child malnutrition, child mortality and universal basic education. Additional progress could be achieved by strengthening ECD policies further. This report presents findings from an assessment of ECD policies and programs in Indonesia based on two World Bank tools: the ECD module of the Systems Approach for Better Education Results (SABER) and a guide on essential interventions for investing in young children. Results from the application of both tools to Indonesia are used to suggest a number of policy options for consideration.

**Dermatotoxicology Methods** Francis N. Marzulli, Howard I. Maibach, 2019-05-07 This work presents and evaluates methods employed to identify the potential of certain types of chemicals to adversely affect the skin. A variety of test methods are included such as tests for skin penetration, metabolism, irritation, the skin immune system, photo effects, skin cancer, and topical effects of retinoids and depigmenting chemicals. Tests for chemicals that affect the reproductive and nervous system are also included. Both animal and human tests that have been standardised and tests that are under development and employ animal alternatives are addressed in this book. Besides different testing methods, a rationale for accepting non-animal models and a review of some regulatory agency discussions about animal alternative tests are included.

**Skin Aging, Free Radicals, and Antioxidants** Borut Poljsak, 2012 This book describes mechanisms of skin damage generation and examines the potential impact of free radicals, reactive oxygen species (ROS) and oxidative damage on the skin ageing process. It also evaluates methods to decrease skin oxidative stress, oxidative damage, and skin ageing. The identification of free radical reactions as promoters of the skin ageing process implies that interventions aimed at limiting or inhibiting free radical reactions should be able to reduce the rate of formation of ageing-related changes with a consequent reduction of the ageing rate. This book highlights how ageing of the skin happens, as well as what are the causes and the best ways to prevent and treat it.
