The Oxford Handbook of Music and Advertising James Deaville, Siu-Lan Tan, Ron Rodman, 2021-01-18 The Oxford Handbook of Music and Advertising is an essential guide to the crucial role that music plays in relation to the audio or audiovisual advertising message, from the perspectives of its creation, interpretation, and reception. The book's unique three-part organization reflects this life cycle of an advertisement, from industry inception to mass-mediated text to consumer behaviour. Experts well versed in the practice, analysis, and empirical studies of the commercial message have contributed to the collection's forty-two chapters, which collectively represent the most ambitious and comprehensive attempt to date to address the important intersections of music and advertising. Handbook chapters are self-contained yet share borders with other contributions within a given section and across the major sections of the book, so readers can either study one topic of particular interest or read through to gain an understanding of the broader issues at stake. Within the book's Introduction, each editor has provided an overview of the unifying themes for the section for which they were responsible, with brief summaries of individual contributions at the beginnings of the sections. The lists of recommended readings at the end of chapters are intended to assist readers in finding further literature about the topic. An overview of industry practices by a music insider is provided in the Appendix, giving context for the three parts of the book.

Why Customers Would Rather Have a Smartphone than a Car Cor Molenaar, 2016-03-03 Why Customers Would Rather Have a Smartphone than a Car explores some of the fundamental changes in consumer behaviour: Why do we buy less in shops and more on the internet? Why do we spend more on gadgets, smartphones and apps and not more on food, holidays or clothing? Why do most business people only look at symptoms and not the causes of changing customer behaviour? The new generation buys differently from the baby boomers; they have different priorities and preferences. The internet has changed us in the way we think, act and communicate. Whilst many retailers now understand the need for change, few of them have established convincing or sustainable models for the future. Cor Molenaar argues that by understanding the drivers behind these new consumer behaviours, retailers can identify the opportunities this represents and adapt their offering accordingly. The kind of relationship retailing he advocates involves the way the retailer interacts with their customer; the new environment that they need to sustain along with their ability to relate customer data, technology and new services. The author interweaves examples from traditional and virtual retailing with his research on consumer psychology and buying behaviour to offer a sophisticated and at times challenging guide for all those involved in retailing, as well as those responsible for planning and designing social and retail space.

66 Square Feet Marie Viljoen, 2013-09-03 "With lush photographs and spare prose" a Brooklyn blogger shares recipes and "records her life as a gardener, a cook and an urban forager." (The New York Times) Marie Viljoen's beautiful first book draws the reader into a world of unfolding seasons, seen from the perspective of an expert gardener, cook and photographer. Each chapter is a month, divided into three parts: New York City, the author's garden, and her kitchen, each setting the stage for a lavish seasonal menu with recipes drawn from farmers markets, wild-foraged ingredients, and produce grown on her city terrace and roof farm. Named for the size of her tiny Brooklyn terrace, and the blog it inspired, Viljoen's book is a unique perspective of the concrete jungle, where the month is known by the flowers in bloom, the vegetable in season, and the migrating birds crossing a Brooklyn sky. Set against a backdrop of growing up in South Africa and moving to the United States, meeting her French husband, and finding a culinary and emotional home in Brooklyn, Viljoen's book is a love letter to living seasonally in the most famous city on the planet. "If you don't think of this city as a living ecosystem, Marie Viljoen will change your perspective forever." —Edible Brooklyn "Offer[s] visions of growing, cooking and sharing fresh food as central to living a good life." —Seattle Times

The Missing Scotland Willie Sullivan, 2014-10-15 The only reason to vote is if the vote represents power or change. I don't think it does. I fervently believe that we deserve more from our democratic system than the few derisory tit-bits tossed from the carousel of the mighty. RUSSELL BRAND From national and local elections to the debate on the independence referendum, a large part of Scotland is missing from our political and public debates. This book directly gives voice to the missing people of Scotland as Willie Sullivan (in association with the Electoral Reform Society) investigates why this part of Scotland is lost, asking the missing electorate

to articulate why they find themselves so politically disengaged, what their take of mainstream Scotland is and what they feel is lacking, and finally exploring what they feel must be done in order change this for the better. A large part of Scotland is missing from our political and public debates, what kind of changes are needed for them to engage? GERRY HASSAN, Open Scotland Series Editor A lot of people in Scotland have no daily contact with democracy; they have no contact in their immediate personal environment with democracy. That is not just a jigsaw piece that is missing in Scottish democracy; it is a founding stone of democracy that is missing in Scotland. DEMOCRACY MAX Report

Generation Smartphone Milan Freudenberg,2016-06-20 Seit seiner Einführung im Jahre 1983 hat sich das Mobiltelefon vom Prestigeobjekt des Managements rasant zum multifunktionalen Alleskönner für die breite Masse entwickelt, das sowohl im Berufsleben als auch in der Freizeit ein unverzichtbarer Begleiter geworden ist. Während das Handy in seinen Anfangszeiten lediglich zum Telefonieren (und später zum Schreiben von SMS) genutzt wurde, dient es heute unter anderem zur Terminplanung, als Wecker, zu Preisvergleichen, als Bezahlfunktion oder als Multimediagerät. Neben der Entwicklung des Handys hin zum Multimedia-Smartphone hat sich auch der Handel mit Hilfe der Digitalisierung weiterentwickelt. So ist es seit Mitte der neunziger Jahre möglich, via Internet einzukaufen. Mit der Einführung des mobilen Internets und des Smartphones spielen Zeit und Raum keine wesentliche Rolle mehr, der Online-Einkauf ist bequem 24 Stunden, sieben Tage die Woche möglich. Dies führt auch zu einem gewandelten Konsumentenverhalten. Aufgrund dessen beschäftigt sich die vorliegende Arbeit mit der Digitalisierung des stationären Handels mittels Smartphone. Im ersten Schritt wird dabei der Generationenbegriff erläutert, abgegrenzt und definiert, um die wesentlichen Charakteristika der Generation Smartphone herauszuarbeiten und um im Anschluss daran das geänderte Medienverhalten der oben besagten Generation zu analysieren. Daran anknüpfend wird die Smartphone - Nutzung im stationären Handel thematisiert, indem vorab der Begriff des stationären Handels näher erläutert und sowohl auf die Funktionen als auch auf die gegenwärtigen Herausforderungen der stationären Handelsunternehmen eingegangen wird. Zur Veranschaulichung werden vier Praxisbeispiele dargestellt, die die aktuellen Chancen in Bezug zur Smartphone - Nutzung im Handel und die Möglichkeiten einer Einbindung darlegen. Da sich der Kaufentscheidungsprozess der Konsumenten weiterentwickelt hat, wird dieser ebenfalls detailliert durchleuchtet. Angrenzend dazu wird das Thema Mobile Commerce, basierend auf den Grundlagen des E-Commerce aufgegriffen und dargestellt.
