Leading in Sync Jill Harrison Berg,2018-08-15 Teacher leadership holds great promise for improving the quality of teaching and ensuring student success. But for co-performance of leadership to be effective, teachers and principals need to lead in sync.Leadership coach Jill Harrison Berg guides educators through the process of creating a shared vision for student success and effective teaching, developing a mutual understanding of each person's role in achieving that vision, establishing a schoolwide culture of teacher leadership, and building the trust needed to bring it all together. Leading In Sync: Teacher Leaders and Principals Working Together for Student Learning provides principals, assistant principals, coaches, department leaders, grade-level and content team leaders, mentors, professional development leaders, and in fact all teachers with the strategies and tools needed to: * Examine their own thinking about what constitutes quality teaching. * Tap faculty members who are already leading. * Identify who has the knowledge, skills, and dispositions required for particular leadership roles. * Support leadership collaboration through efficient, effective communication. * Develop trust within the school community. Berg offers thought-provoking context and reflection questions so that educators can examine their own unique settings; real-world examples of teachers and principals co-performing leadership to improve student success; and dozens of strategies, tools, and templates to facilitate leading in sync.

Sync & Swim! Jack Tesmer,2014-12-16 Sync and Swim is the book you SHOULD HAVE READ in your MBA program. The dynamics revealed here are the most important factors in developing a competitive business. All companies must develop a strategy around them to succeed, especially in today's markets. Jack Tesmer describes the most critical organizing factors for success. Identifying the kind of competitive environment in which a business takes place and the appropriate organizational culture and structure is a major part of business strategy. We overlook these dimensions at our peril as they often are the difference between success and failure in the marketplace. Sync & Swim acquaints you with the four kinds of competitive markets and the organizational pattern that best supports business done in those markets. Reading this book will not only acquaint you with these market types but also lead you through an examination of your marketplace position and the viability of success that you can expect from engaging in business within it. These are dynamic market positions, constantly changing, often putting the business at risk. This risk gets even greater if the organization is not formed specifically to engage in that kind of competition. You will learn about the four organizational environments and evaluate your company's organizational viability in that market. In other words, are you in the right formation to compete in that market? The ideas here are simple and easy to understand. 25 years of use has eliminated the complexity, and made it possible to examine companies rather quickly and find out more than what first seems apparent. As you read the book, think of your organization, profit or non-profit, and about those you do business or compete with. You may discover another major advantage in the marketplace.

Sync Your Relationship, Save Your Marriage Peter Fraenkel, Ph.D.,2011-03-15 Award-winning couples therapist Peter Fraenkel argues that most relationship problems can be traced to partners being out of sync on the powerful but mostly hidden dimension of time. Differences in daily rhythms, personal pace, punctuality, time perspective, and priorities about how time is allocated can all lead to couple conflict. Yet the fascinating fact is that these polarizing time differences play a potent role in attracting lovers in the first place. In this trailblazing new book, he draws on his original research to show how a clearer understanding of these forces can improve the health of your relationship and even rescue a failing one.

ADR and Post-Sync Dialogue R.J. Kizer,2024-04-08 Written by industry expert, R.J. Kizer, this is the first book to provide a comprehensive overview of post-sync dialogue replacement, popularly known as ADR. It explores how this seldom recognised, but essential, technology is used in motion pictures and in fictional narrative television programs, with many examples from past and recent movies to explain approaches and techniques. It is intended primarily as an intuitive book, allowing readers to develop their own interpretation of ADR application, with both historical and procedural background provided throughout. It identifies the many different procedures and mechanical systems invented and used to accomplish the task of ADR, some from as long ago as the early 1920s. The text also details the many different steps, tasks, and routines that must be followed to identify (spot), program, record, edit, and mix the ADR lines into the final sound track of a show. Intended for the sound professional, it is also suitable for students and entry-level editors wishing to master audio dialogue replacement. Film historians and theorists will also find it both informative and enlightening by illustrating the many avenues used to affect and manipulate the recorded spoken word in motion pictures.

Human-Harmonized Information Technology, Volume 1 Toyooki Nishida,2016-01-06 Going from the philosophy and concepts to the implementation and user study, this book presents an excellent overview of Japan's contemporary technical challenges in the field of human-computer interaction. The next information era will be one in which information is used to cultivate human and social potential. Driven by this vision, the outcomes provided in this work were accomplished as challenges to establish basic technologies for achieving harmony between human beings and the information environment by integrating element technologies including real-space communication, human interfaces, and media processing. Ranging from the neuro-cognitive level to the field trial, the research activities integrated novel perceptual technologies that even exceed human ability to sense, capture, and affect the real world. This book grew out of one of the CREST research areas funded by the Japan Science and Technology Agency. The theme of the project is “the creation of human-harmonized information technology for convivial society”, where 17 research teams aimed at a common goal. The project promotes a trans-disciplinary approach featuring (1) recognition and comprehension of human behaviors and real-space contexts by utilizing sensor networks and ubiquitous computing, (2) technologies for facilitating man-machine communication by utilizing robots and ubiquitous networks, and (3) content technologies for analyzing, mining, integrating, and structuring multimedia data including those in text, voice, music, and images. This is the first of two volumes, which is contributed by nine team leaders. Besides describing the technical challenges, each contribution lays much weight on discussing the philosophy, concepts, and the implications underlying the project. This work will provide researchers and practitioners in the related areas with an excellent opportunity to find interesting new developments and to think about the relationship between human and information technology.

Sync My World: Thief's Honor GA SK (Hardcover Edition) Rodney St. Michael,2009-10 This is chapter two to ten of a three-part series discussing the astrophysical cause of mental and biological conditions such as schizophrenia, bipolar disorder, MPD syndrome, autism, homosexuality, personality, gender, race and so forth. It also analyzes the correspondence of these conditions to humanity in general and concludes that all the activities of people stem from astrophysically-caused gender elements that conduct people's lives from their socio-physiological behavior, to their security, spiritual and political needs. It also observes the convergence of these elements that lead to relative peace.

Out of Sync & Out of Work Joel Burges,2018-06-27 Out of Sync & Out of Work explores the representation of obsolescence, particularly of labor, in film and literature during a historical moment in which automation has intensified in capitalist economies. Joel Burges analyzes texts such as The Invention of Hugo Cabret, Wreck-It Ralph, Fantastic Mr. Fox, and Iron Council, and examines their “means” of production. Those means include a range of subjects and narrative techniques, including the “residual means” of including classic film stills in a text, the “obstinate means” of depicting machine breaking, the “dated means” of employing the largely defunct technique of stop-motion animation, and the “obsolete” means of celebrating a labor strike. In every case, the novels and films that Burges scrutinizes call on these means to activate the reader's/viewer's awareness of historical time. Out of Sync & Out of Work advances its readers' grasp of the complexities of historical time in contemporary culture, moving the study of temporality forward in film and media studies, literary studies, critical theory, and cultural critique.

Sync Or Swarm David Borgo,2005-12-12 Provides a study of musical improvisation, using theories from cultural and cognitive studies. The author presents a systemic view, with chapters funneling outward in scope from the perspective of a solo improviser to that of a group interacting in performance, to the long-term dynamics of an improvising group from formation to dissolution.

Sync or Swarm, Revised Edition David Borgo,2022-02-10 The revised edition of Sync or Swarm promotes an ecological view of musicking, moving us from a subject-centered to a system-centered view of improvisation. It explores cycles of organismic self-regulation, cycles of sensorimotor coupling between organism and environment, and cycles of intersubjective interaction mediated via socio-technological networks. Chapters funnel outward, from the solo improviser (Evan Parker), to nonlinear group dynamics (Sam Rivers trio), to networks that comprise improvisational communities, to pedagogical dynamics that affect how individuals learn, completing the hermeneutic circle. Winner of the Society for Ethnomusicology's Alan Merriam prize in its first edition, the revised edition features new sections that highlight electro-acoustic and transcultural improvisation, and concomitant issues of human-machine interaction and postcolonial studies.
