The Relationship Between Chaotic Events and Credit Union Leadership Practices Dr. Paul Withey,2015-06-01 Organizational crises, in modern society, requires an immediate response. Chaotic stages occur during organizational changes resulting in emotional experiences for leaders who develop intense feelings of anger, shock, and frustration. Leaders who are not prepared will be overwhelmed by the need for an aggressive response to change. The ability to solve problems successfully will increase movement of the organization through the chaos stage. Building a foundation of preparation for a leader, prior to the organizational change stage, will decrease levels of dysfunction the organization may experience. It is time for a new approach to managing organizational chaos. The research in this book provides original contributions to leadership studies by applying general systems and chaos theory to leadership behaviors in times of crisis. Chaos theory offers different perspectives that will allow leaders to develop capacities for changing their existing approaches to chaotic events. Results from the research in this study are valuable to credit union leaders, and also all business leaders, who need new models that recognize external factors influencing the sustainability of the organization. This adaptability is one of the most effective leadership skills a leader can display (Higgs & Rowland, 2005). Introducing general systems and chaos theory into organizational leadership has become a new approach to leadership psychology and philosophy, promising to influence leadership and management theories (Bums, 2002). The significance of chaos theory for leadership studies lies in its heuristic power. If the challenges to normal events are observed through the lens of chaos theory, organizational leaders may make better-informed decisions in times of uncertainty.

Iconic Leaders in Higher Education Roger L. Geiger,2017-07-05 Iconic leaders are those who have become symbols of their institutions. This volume of historical studies portrays a collection of college and university presidents who acquired iconic qualities that transcend mere identification with their institution. The volume begins with Roger L. Geiger's observation that creating and controlling one's image requires managing publicity. Andrea Turpin describes how Mount Holyoke Seminar's evolution into a modern women's college required reshaping the image of Mary Lyon, its founder. Roger L. Geiger and Nathan M. Sorber show how College of Philadelphia provost William Smith's partisan politics and patronage tainted the college he symbolized. Joby Topper reveals how presidents Seth Low of Columbia and Francis Patton of Princeton mastered the modern art of publicity. Katherine Chaddock explains how John Erskine the Columbia University English professor responsible for the first Great Books program and his unusual career inverted the normal route to iconic status. In contrast, Christian Anderson's analysis of John G. Bowman, chancellor of the University of Pittsburgh, shows how he substituted architectural vision for academic leadership. James Capshew explores the background that made Herman Wells a revered leader of Indiana University. Nancy Diamond details how building Brandeis University involved a challenging series of decisions successfully navigated by founding president Abram Sachar. Finally, Ethan Schrum depicts how Clark Kerr's controversial understanding of the role of contemporary universities was formed by his earlier career in industrial relations. This study of iconic leaders probes new dimensions of leadership and the construction of institutional images.

Cases in Leadership W. Glenn Rowe,Laura Guerrero,2012-04-04 Cases in Leadership, Third Edition is a unique collection of 32 real-world leadership cases from Ivey Publishing plus 16 practitioner readings from the Ivey Business Journal. The updated casebook helps business students gain a better understanding of leadership and enables them to be more effective leaders through their careers. Each of the selected cases are about complex leadership issues that require the attention of the decision maker. This casebook provides an invaluable supplement to any standard leadership text by connecting theory to actual cases. However, it has been organized to work especially well in conjunction with the Sixth Edition of Peter Northouse's Leadership: Theory and Practice.

Leaders Eat Last Simon Sinek,2017-05-23 Finally in paperback: the New York Times bestseller by the acclaimed, bestselling author of Start With Why and Together is Better. Now with an expanded chapter and appendix on leading millennials, based on Simon Sinek's viral video Millennials in the workplace (150+ million views). Imagine a world where almost everyone wakes up inspired to go to work, feels trusted and valued during the day, then returns home feeling fulfilled. This is not a crazy, idealized notion. Today, in many successful organizations, great leaders create environments in which people naturally work together to do remarkable things. In his work with organizations around the world, Simon Sinek noticed that some teams trust each other so deeply that they would literally put their lives on the line for each other. Other teams, no matter what incentives are offered, are doomed to infighting, fragmentation and failure. Why? The answer became clear during a conversation with a Marine Corps general. Officers eat last, he said. Sinek watched as the most junior Marines ate first while the most senior Marines took their place at the back of the line. What's symbolic in the chow hall is deadly serious on the battlefield: Great leaders sacrifice their own comfort--even their own survival--for the good of those in their care. Too many workplaces are driven by cynicism, paranoia, and self-interest. But the best ones foster trust and cooperation because their leaders build what Sinek calls a Circle of Safety that separates the security inside the team from the challenges outside. Sinek illustrates his ideas with fascinating true stories that range from the military to big business, from government to investment banking.
