Decision Making for Leaders Thomas L. Saaty,1990 This book is about how to make decisions using the Analytic Hierarchy Process. The basics of the theory are described in a clear, non-technical manner with many examples. It is suitable for business leaders and also is probably the best book for introducing the AHP to students at the college and graduate level. In this fifth printing of the book the reader will find a new appendix containing real-life applications that validate the use of the fundamental scale of the AHP.

Honor Bound Stuart I. Rochester, Frederick T. Kiley,1998 Honor Bound is the result of a fruitful collaboration between Stuart I. Rochester and Frederick Kiley. In examining the lives of the prisoners in captivity, it presents a vivid, sensitive, sometimes excruciating, account of how men sought to cope with the physical and psychological torment of imprisonment under wretched and shameful conditions. It includes insightful analyses of the circumstances and conditions of captivity and its varying effects on the prisoners, the strategies and tactics of captors and captives, the differences between captivity in North and South Vietnam and between Laos and Vietnam, and analysis of the quality of the source materials for this and other works on the subject.

Letchfield, 2011-02-15 Social Care Management, Strategy and Business Planning is a comprehensive guide to strategic social care management, covering all the knowledge and skills that managers in the 21st century must have, and showing how to make theory a practical reality. The book aims to make business planning a more accessible and user-friendly process, offering practical advice on how to tackle the everyday tasks which good social care management should involve. Topics covered include strategic planning, business development, commissioning and contracting, project management, decision-making, risk, and evaluation techniques. The book also acknowledges the challenges of working collaboratively within a complex legislative and policy framework and juggling different aspects of the management tasks whilst retaining professional identities and ethics. Also included are practical examples and lively tips and comments from practising managers on their experiences in different areas of business planning. This book will be essential reading for anyone involved in managing or leading practice either in the front line or at a more strategic level. It will be useful to post-qualifying social work students and is particularly valuable to anyone following a management training programme.

Cultural Analysis Aaron B. Wildavsky, In Cultural Analysis, the fourth collection of his essays posthumously published by Transaction, Wildavsky argues that American politics, public law, and public administration are the contested terrain of rival, inescapable political cultures. Analysts of American politics distinguish liberals from conservatives and Democrats from Republicans, but do not explain how these categories of political allegiance develop, maintain themselves, or change. Wildavsky offers a cultural-functional explanation for ideological and partisan coherence and realignment. Wildavsky also felt that these dualisms did not adequately capture the ideological and partisan variation he observed on the political landscape. Like others, he detected another recurring strain of political allegiance: that of classical liberalism or libertarianism. People of this political stripe valued freedom more than equality (the primary political value of contemporary liberals), and also more than order, the primary political value of conservatives.

Strategic Business Case Analysis Christopher Williams, 2023-12-07 This textbook provides students with the skills and techniques necessary to analyse business case studies from a strategic perspective. With career development and impact in mind, the book goes beyond simply listing tools, instead teaching students how to prepare for a major strategic business case analysis project, how to position their analysis on a spectrum from reductionist to holistic approaches, how to critically engage with theory and case data, as well as how to leverage their work after completion. A logical approach is offered, taking the reader through the analysis journey, from preparing to analyse a case study to conducting the analysis and maximising the impact going forwards. A comprehensive analysis task is incorporated, which asks the reader to reflect on a range of case data, understand the choices of analytical positioning and tool selection, and develop an analysis based on this positioning. Further pedagogical features include: Reflective practice exercises at the end of chapters, allowing the student to self-identify areas of strength and weakness as they develop through the process. Worked examples based on cases reproduced in the book, allowing the student to follow the analytical process that the author went through in different analysis modes. Quotes and analysis insights from former students who have previously conducted a strategic business case analysis, aiding reflective practice. As case study analysis continues as a core component of teaching across business schools, this unique text will help to build key skills in advanced undergraduate, postgraduate, MBA, and executive education students conducting strategic business case analysis.
