Decision Making for Leaders Thomas L. Saaty,1990
This book is about how to make decisions using the Analytic Hierarchy Process. The basics of the theory are described in a clear, non-technical manner with many examples. It is suitable for business leaders and also is probably the best book for introducing the AHP to students at the college and graduate level. In this fifth printing of the book the reader will find a new appendix containing real-life applications that validate the use of the fundamental scale of the AHP.

Visual Voyages Daniela Bleichmar,2017-01-01 An unprecedented visual exploration of the intertwined histories of art and science, of the old world and the new From the voyages of Christopher Columbus to those of Alexander von Humboldt and Charles Darwin, the depiction of the natural world played a central role in shaping how people on both sides of the Atlantic understood and imaged the region we now know as Latin America. Nature provided incentives for exploration, commodities for trade, specimens for scientific investigation, and manifestations of divine forces. It also yielded a rich trove of representations, created both by natives to the region and visitors, which are the subject of this lushly illustrated book. Author Daniela Bleichmar shows that these images were not only works of art but also instruments for the production of knowledge, with

scientific, social, and political repercussions. Early depictions of Latin American nature introduced European audiences to native medicines and religious practices. By the 17th century, revelatory accounts of tobacco, chocolate, and cochineal reshaped science, trade, and empire around the globe. In the 18th and 19th centuries, collections and scientific expeditions produced both patriotic and imperial visions of Latin America. Through an interdisciplinary examination of more than 150 maps, illustrated manuscripts, still lifes, and landscape paintings spanning four hundred years, *Visual Voyages* establishes Latin America as a critical site for scientific and artistic exploration, affirming that region's transformation and the transformation of Europe as vitally connected histories.

A History of the University of Cambridge: Volume 4, 1870-1990 Christopher Brooke, Christopher N. L. Brooke, Damian Riehl Leader, Victor Morgan, Peter Searby, 1988 This is the fourth volume of *A History of the University of Cambridge* and explores the extraordinary growth in size and academic stature of the University between 1870 and 1990. Though the University has made great advances since the 1870s, when it was viewed as a provincial seminary, it is also the home of tradition: a federation of colleges, one over 700 years old, one of the 1970s. This book seeks to penetrate the nature of the colleges and of the federation; and to show the way in which university faculties and departments have come to vie with the colleges for this predominant role. It attempts to unravel a fascinating institutional story of the society of the University and its place in the world. It explores in

depth the themes of religion and learning, and of the entry of women into a once male environment. There are portraits of seminal and characteristic figures of the Cambridge scene, and there is a sketch - inevitably selective but wide-ranging - of many disciplines, an extensive study in intellectual and academic history.

Strategic Business Case Analysis Christopher Williams, 2023-12-07 This textbook provides students with the skills and techniques necessary to analyse business case studies from a strategic perspective. With career development and impact in mind, the book goes beyond simply listing tools, instead teaching students how to prepare for a major strategic business case analysis project, how to position their analysis on a spectrum from reductionist to holistic approaches, how to critically engage with theory and case data, as well as how to leverage their work after completion. A logical approach is offered, taking the reader through the analysis journey, from preparing to analyse a case study to conducting the analysis and maximising the impact going forwards. A comprehensive analysis task is incorporated, which asks the reader to reflect on a range of case data, understand the choices of analytical positioning and tool selection, and develop an analysis based on this positioning. Further pedagogical features include: Reflective practice exercises at the end of chapters, allowing the student to self-identify areas of strength and weakness as they develop through the process. Worked examples based on cases reproduced in the book, allowing the student to follow the analytical process that the author went through in different analysis modes. Quotes and analysis insights from former students

who have previously conducted a strategic business case analysis, aiding reflective practice. As case study analysis continues as a core component of teaching across business schools, this unique text will help to build key skills in advanced undergraduate, postgraduate, MBA, and executive education students conducting strategic business case analysis. Support material includes PowerPoint slides as well as video content.
