Such a curriculum can only be planned as a cohesive whole; compartmentalizing aspects of the whole curriculum risks seeing one part as having more merit or worth than another. The whole curriculum in ail schools will vary, depending on local needs and opportunities. In special education it is important that we embrace that whole curriculum, using its diversity and opportunity to plan for breadth, balance and relevance. This book makes a significant contribution to the developments in planning for access to the whole curriculum.

Measuring Access to Learning Opportunities National Research Council,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Center for Education,Committee on Improving Measures of Access to Equal Educational Opportunity,2003-06-28 Since 1968 the

Elementary and Secondary School Civil Rights Compliance Report (known as the E&S survey) has been used to gather information about possible disparities in access to learning opportunities and violations of students' civil rights. Thirty-five years after the initiation of the E&S survey, large disparities remain both in educational outcomes and in access to learning opportunities and resources. These disparities may reflect violations of students' civil rights, the failure of education policies and practices to provide students from all backgrounds with a similar educational experience, or both. They may also reflect the failure of schools to fully compensate for disparities and current differences in parents' education, income, and family structure. The Committee on Improving Measures of Access to Equal Educational Opportunities concludes that the E&S survey continues to play an essential role in documenting these disparities and in providing information that is useful both in guiding efforts to protect students' civil rights and for informing educational policy and practice. The committee also concludes that the survey's usefulness and access to the survey data could be improved.
