Fluent Forever Gabriel Wyner, 2014-08-05 NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you’ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

A Field Guide to the Birds of Brazil Ber van Perlo, 2009-10-09 Brazil's bird diversity is one of the richest in the world. And yet there has never been a comprehensive field guide to this splendid and elusive avifauna. Until now. The carefully vetted text and images are the first to cover the full range of bird life in this vast and varied country. The more than 1800 up-to-date accounts treat the Yellow-nosed Albatross to the Sombre Hummingbird, the Ash-throated Gnat-eater to the Black-bellied Whistling-Duck, Nighthawks and Jacamars to Motmots, Puffbirds, and Peppershrikes. They are all here--every species and many subspecies found in each region of Brazil--with special attention given to the 218 Brazilian endemics. The book is laid out so that the illustrations sit across from the commentary and the distribution maps, so it is easy to use. Also, the author uses short-hand notation

throughout, to make the book compact and easy to carry when in the field. For each bird, the scientific, English, and Portuguese name are given as well as detailed information on measurement; identifying features; habitat; voice, song, and call. Distribution maps show the range for each species, also indicating seasonality and occurrence, essential for finding and identifying specific birds. From the equatorial North to the tropics, the introductory paragraphs set the stage in describing Brazil's varied biogeography, climate, geomorphology, and natural vegetation. A list of protected areas of Brazil, information on relevant national and international organizations, a bibliography and further references, and an English-Portuguese dictionary of frequently used terms enhance the user-friendly qualities. Anyone wishing to fully explore the fabulously varied bird life of Brazil will find this light-weight, easy-to-use, attractive guide an invaluable field companion.

Hacking Chinese Olle Linge, 2016-03-26 Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook:

you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study. - Geoff van der Meer, VP engineering This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision. - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.
