The Social Life of the Japanese Language Shigeko Okamoto, Janet S. Shibamoto-Smith, 2016-08-04 Why are different varieties of the Japanese language used differently in social interaction, and how are they perceived? How do honorifics operate to express diverse affective stances, such as politeness? Why have issues of gendered speech been so central in public discourse, and how are they reflected and refracted in language use as social practice? This book examines Japanese sociolinguistic phenomena from a fascinating new perspective, focusing on the historical construction of language norms and its relationship to actual language use in contemporary Japan. This socio-historically sensitive account stresses the different choices which have shaped Japanese and Western sociolinguistics and how varieties of Japanese, honorifics and politeness, and gendered language have emerged in response to the socio-political landscape in which a modernizing Japan found itself.

Intercultural Language Use and Language Learning Eva Alcon Soler, Maria Pilar Safont Jorda, 2007-05-24 Eva Alcón Soler Maria Pilar Safont Jordà Universitat Jaume I, Spain The main purpose of the present book is to broaden the scope of research on the development of intercultural communicative competence. Bearing this purpose in mind, English learners are considered as intercultural speakers who share their interest for engaging in real life communication. According to Byram and Fleming (1998), the intercultural speaker is someone with knowledge of one or more cultures and social identities, and who enjoys discovering and maintaining relationships with people from other cultural backgrounds, although s/he has not been formally trained for that purpose. Besides, possessing knowledge of at least two cultures is the case of many learners in bilingual or multilingual communities. In these contexts, the objective of language learning should then focus on developing intercultural competence, which in turn may involve promoting language diversity while encouraging English as both a means and an end of instruction (see Alcón, this volume). This is the idea underlying the volume, which further sustains Kramsch's argument (1998) against the native/non-native dichotomy. Following that author, we also believe that in a multilingual world where learners may belong to more than one speech community, their main goal is not to become a native speaker of English, but to use this language as a tool for interaction among many other languages and cultures.

Media in Foreign Language Teaching and Learning Wai Meng Chan, Kwee Nyet Chin, Masanori Nagami, Titima Suthiwan, 2011-10-27 While educators and educational psychologists debate the influence of media on learning, there can be little doubt that media is now an integral constituent of

any educational context. In particular, computer and internet media, with their immense processing power and multimedia capabilities, can have significant bearing on learning processes and outcomes in today's learning environment. Such media, which are increasingly designed to be highly interactive and adaptable, can enable reflective, productive and communicative activities and have much potential for foreign language learning. The book contains 16 papers which look at different forms of media and explore how these affect or can be used effectively in foreign language education. The first of three parts focuses on important theoretical and pedagogical issues in selecting and using media. In the second part, insightful empirical research findings are presented on the contributions of different forms of media in language teaching and learning, including their effect on learners' learning motivation. The third and concluding part of the book provides in-depth accounts of how media can be harnessed to drive innovative curricular practice as well as students' evaluations of these curricular projects.

Globalization and Japanese Exceptionalism in Education Ryoko Tsuneyoshi, 2019-03-21 Globalization is the most common overriding characteristic of our time, with societies all over the world struggling to change their educational systems to meet what are perceived to be the needs of globalization. This book provides an insider's account of how the Japanese educational system is trying to meet that challenge while placing the developments in a larger international context. Distinguishing itself from other books in the same genre, this volume (1) brings in the diversity of insiders' reactions concerning globalization reform in education, while placing such actions in the larger international context, and (2) covers a wide span of education (elementary to higher education) and shows how the globalization reforms as a whole are affecting Japanese education. With a focus on insiders' accounts, this book brings in information that is little known outside of Japan. It also links globalization processes in Japanese society, school education and higher education, accounting for similarities and differences across educational levels, providing insight into the multifaceted processes affecting the Japanese education system. Chapters include: From High School Abroad to College in Japan: The Difficulties of the Japanese Returnee Experience The University of Tokyo PEAK Program: Venues into the Challenges Faced by Japanese Universities Why Does Cultural Diversity Matter? Korean Higher Education in Comparative Perspective
