Cultural Anthropology: 101 Jack David Eller,2015-02-11

This concise and accessible introduction establishes the relevance of cultural anthropology for the modern world through an integrated, ethnographically informed approach. The book develops readers' understanding and engagement by addressing key issues such as: What it means to be human The key characteristics of culture as a concept Relocation and dislocation of peoples The conflict between political, social and ethnic boundaries The concept of economic anthropology Cultural Anthropology: 101 includes case studies from both classic and contemporary ethnography, as well as a comprehensive bibliography and index. It is an essential guide for students approaching this fascinating field for the first time.

English in East and South Asia Ee Ling Low,Anne

Pakir,2021-08-29 This book provides a first systematic and comprehensive account of English in East and South Asia (EESA) based on current research by scholars in the field. It has several unique features. Firstly, it provides a rigorous theoretical overview that is necessary for the understanding of EESA in relation to the burgeoning works on World Englishes as a discipline. Secondly, in the section on linguistic features, a systematic template was made available to the contributors so that linguistic coverage of the variety/varieties is similar. Thirdly, the vibrancy of the sociolinguistic and pragmatic realities that govern actual English in use in a wide variety of domains such as social media, the Internet and popular culture/music are

discussed. Finally, this volume includes an extensive bibliography of works on EESA, thus providing a useful and valuable resource for language researchers, linguists, classroom educators, policymakers and anyone interested in the topic of EESA or World Englishes. This volume hopes to advance understanding of the spread and development of the different sub-varieties reflecting both the political developments and cultural norms in the region.

Translation in Undergraduate Degree Programmes Kirsten Malmkjær, 2004-01-01 This book brings together an international team of leading translation teachers and researchers to address concerns that are central in translation pedagogy. The authors address the location and weighting in translation curricula of learning and training, theory and practice, and the relationships between the profession, its practitioners, its professors and scholars. They explore the concepts of translator competence, skills and capacities and two papers report empirical studies designed to explore effects of the use of translation in language teaching. These are complemented by papers on student achievement and attitudes to translation in programmes that are not primarily designed with prospective translators in mind, and by papers that discuss language teaching within dedicated translation programmes. The introduction and the closing paper consider some causes and consequences of the odd relationships that speakers of English have to other languages, to translation and ultimately, perhaps, to their own language.

Learning Through Practice Stephen Billett, 2010-06-02 Practice-based learning—the kind of education that comes from experiencing real work in real situations—has always been a prerequisite to qualification in professions such as medicine. However, there is growing interest in how practice-based models of learning can assist the initial preparation for and further development of skills for a wider range of occupations. Rather than being seen as a tool of first-time training, it is now viewed as a potentially important facet of professional development and life-

long learning. This book provides perspectives on practice-based learning from a range of disciplines and fields of work. The collection here draws on a wide spectrum of perspectives to illustrate as well as to critically appraise approaches to practice-based learning. The book's two sections first explore the conceptual foundations of learning through practice, and then provide detailed examples of its implementation. Long-standing practice-based approaches to learning have been used in many professions and trades. Indeed, admission to the trades and major professions (e.g. medicine, law, accountancy) can only be realised after completing extended periods of practice in authentic practice settings. However, the growing contemporary interest in using practice-based learning in more extensive contexts has arisen from concerns about the direct employability of graduates and the increasing focus on occupation-specific courses in both vocations and higher education. It is an especially urgent issue in an era of critical skill shortages, rapidly transforming work requirements and an aging workforce combined with a looming shortage of new workforce entrants. We must better understand how existing models of practice-based learning are enacted in order to identify how they can be applied to different kinds of employment and workplaces. The contributions to this volume explore ways in which learning through practice can be conceptualised, enacted, and appraised through an analysis of the traditions, purposes, and processes that support this learning—including curriculum models and pedagogic practices.

The Intonational System of English Mark Liberman, 1979

Meaning and Relevance Deirdre Wilson, Dan

Sperber, 2012-03-22 When people speak, their words never fully encode what they mean, and the context is always compatible with a variety of interpretations. How can comprehension ever be achieved? Wilson and Sperber argue that comprehension is a process of inference guided by precise expectations of relevance. What are the relations between the linguistically encoded

meanings studied in semantics and the thoughts that humans are capable of entertaining and conveying? How should we analyse literal meaning, approximations, metaphors and ironies? Is the ability to understand speakers' meanings rooted in a more general human ability to understand other minds? How do these abilities interact in evolution and in cognitive development? Meaning and Relevance sets out to answer these and other questions, enriching and updating relevance theory and exploring its implications for linguistics, philosophy, cognitive science and literary studies.

At the Hairdresser's Anita Brookner, 2011-12-01 Penguin
Specials are designed to fill a gap. Written to be read over a long commute or a short journey, they are original and exclusively in digital form. This is a poignant novella from Anita Brookner. 'I rather hope I shall die at the hairdresser's, for they are bound to know what to do. At least that is what I tell myself.' Solitude is a familiar burden for Elizabeth Warner. She lives in a basement flat near Victoria and leaves the house only to go shopping and to have her hair done - until a chance encounter at the hairdresser's brings unexpected change. *At the Hairdresser's* is a deeply moving, unflinchingly observed story about trust and betrayal by one of the greatest writers of contemporary fiction.

Encyclopedia of Bilingualism and Bilingual Education Colin Baker, Sylvia Prys Jones, 1998 This encyclopedia is divided into three sections: individual bilingualism; bilingualism in society and bilingual education. It includes many pictures, graphs, maps and diagrams. The book concludes with a comprehensive bibliography on bilingualism.

Introducing Anthropology of Religion Jack David Eller, 2007-08-07 This lively and readable survey introduces students to key areas of the field and shows how to apply an anthropological approach to the study of contemporary world religions. Written by an experienced teacher, it covers all of the traditional topics of anthropology of religion, including definitions

and theories, beliefs, symbols and language, and ritual and myth, and combines analytic and conceptual discussion with up-to-date ethnography and theory. Eller includes copious examples from religions around the world – both familiar and unfamiliar – and two mini-case studies in each chapter. He also explores classic and contemporary anthropological contributions to important but often overlooked issues such as violence and fundamentalism, morality, secularization, religion in America, and new religious movements. *Introducing Anthropology of Religion* demonstrates that anthropology is both relevant and essential for understanding the world we inhabit today.

The Role of Motivation Ema Ushioda, 1996 Advocating a cognitive approach to motivation in which the learner's thought processes play a central role, this text discusses patterns of motivational thinking in language learning and considers the potential for developing effective motivational thinking as an integral part of learner autonomy.

Talking Freedom Karsten Legère, Sandra Fitchat, Femi Akindele, 2002

Translation & Language Teaching Kirsten Malmkjær, 1998 For at least a century, attitudes to the use of translation in language teaching have been predominantly negative, the deprecators of the methodology having been particularly vocal at the turn of the 20th century and again in the 1960s and 70s. Yet, for all of this time, translation has remained a significant component in the teaching of many languages in many parts of the world, and the 1980s saw a revival of support for the practice among a number of applied linguists. Language teaching for translators has been rather less contentious. It has always been assumed that translators must know their languages thoroughly, but little has been written about how they, as a special group, might be taught their languages. In the final quarter of the 20th century, attention among translation scholars and pedagogues has turned so decisively away from linguistics that even teaching

translators about their languages and how they can be put to use has been frowned on in many quarters. This book takes a fresh look at both issues. Part One addresses the question of the place and nature of language teaching in translator training programmes. Part Two deals with the issue of how translation might best be used as a teaching and testing methodology in language classes. Finally, the papers in Part Three address the relationship between translation and language teaching from the somewhat divergent points of view of the translator trainer and language teacher.

The Routledge Handbook of Semantics Nick

Riemer, 2015-07-30 The Routledge Handbook of Semantics provides a broad and state-of-the-art survey of this field, covering semantic research at both word and sentence level. It presents a synoptic view of the most important areas of semantic investigation, including contemporary methodologies and debates, and indicating possible future directions in the field. Written by experts from around the world, the 29 chapters cover key issues and approaches within the following areas: meaning and conceptualisation; meaning and context; lexical semantics; semantics of specific phenomena; development, change and variation. The Routledge Handbook of Semantics is essential reading for researchers and postgraduate students working in this area.

Phonology and Phonetic Evidence Bruce Connell, Amalia

Arvaniti, 1995-09-14 This 1995 work presents an integrated phonetics-phonology approach in what has become an established field, laboratory phonology.

Treebanks A. Abeillé, 2012-12-06 This book provides a state

of the art on work being done with parsed corpora. It gathers 21 papers on building and using parsed corpora raising many relevant questions, and deals with a variety of languages and a variety of corpora. It is for those working in linguistics, computational linguistics, natural language, syntax, and

grammar.

Historical Dictionary of Lesotho Scott Rosenberg, Richard F. Weisfelder, 2013-06-13 This second edition of Historical Dictionary of Lesotho covers the full scope of Lesotho's ancient, colonial, and independence eras. It gives greater emphasis to the more recent period and brings the book fully up-to-date. This is done through a chronology, an introductory essay, appendixes, and an extensive bibliography. The dictionary section has over 400 cross-referenced entries on civil society, key events, leaders, governmental, international, religious, and other private organizations, policies, political movements and parties, economic elements, and many other areas that have shaped the country's trajectory. This book is an excellent access point for students, researchers, and anyone wanting to know more about Lesotho.

Dictionary of Languages Andrew Dalby, 2015-10-28 Covering the political, social and historical background of each language, Dictionary of Languages offers a unique insight into human culture and communication. Every language with official status is included, as well as all those that have a written literature and 175 'minor' languages with special historical or anthropological interest. We see how, with the rapidly increasing uniformity of our culture as media's influence spreads, more languages have become extinct or are under threat of extinction. The text is highlighted by maps and charts of scripts, while proverbs, anecdotes and quotations reveal the features that make a language unique.

Multilingualism, the Judiciary and Security Services Kas Deprez, Theo Du Plessis, Lut Teck, 2001 This work deals with international principles regarding the use of language in the administration of justice, and looks at the way in which multilingual countries such as Belgium and Switzerland approach this complex problem.

Australian English Reimagined Louisa Willoughby, Howard Manns, 2019-11-01 Australian English is perhaps best known for

its colourful slang, but the variety is much richer than slang alone. This collection provides a detailed account of Australian English by bringing together leading scholars of this English variety. These scholars provide a comprehensive overview of Australian English's distinctive features and outline cutting-edge research into the variation and change of English in Australia. Organised thematically, this volume explores the ways in which Australian English differs from other varieties of English, as well as examining regional, social and stylistic variation within the variety. The volume first explores particular structural features where Australian English differentiates itself from other English varieties. There are chapters on phonetics and phonology, socio-phonetics, lexicon and discourse-pragmatics as these elements are core to understanding any variety of English, especially within the World Englishes paradigm. It then considers what are arguably the most salient aspects of variation within Australian English and finally focuses on historical, attitudinal and planning aspects of Australian English. This volume provides a thorough account of Australian English and its users as complex, diverse and worthy of study. Perhaps more importantly, this volume's scholars provide a reimagining of Australian English and the paradigm through which future scholars may proceed.
