*GOLD COURSE ** SPEED READING* Silviu Vasile, Today is the best day to evolve and continue the upward path you started when you chose personal development and which you should accelerate now when you use fast reading and live in the culture of speed reading. You may not have been successful because you lacked the determination to act in the most serious way possible. You relied on the SAFETY NET. You knew that no matter what you did, you had a way out and a way to deal with failure. Success means going so far as to get to the POINT WITHOUT RETURN - to the place where you can only go forward. You have no alternative but success because any other option is excluded. You have to look inside yourself and discover unsuspected resources, access your true power of the subconscious. Thus, you will find brilliant ideas and realize how valuable and well-prepared you are and how easy it is to make decisions that you would have postponed indefinitely. Success is the steps you take in the right direction. I believe that, first of all, the wisest decision you

have to make is to be and remain honest. People lose their integrity when they have no definite value or when resources are limited or endangered. Evolution means peace and maintaining individual and collective integrity at a high level. Speed reading is the factor that increases your value and helps you maintain your integrity. The higher your value, the more critical resources you have access to, and the more you can negotiate and trade those resources. Speed reading works as a lever for you and your purposes, and all you have to do is use it. You can easily retain substantial amounts of information over medium periods by training your memory and using your creativity. This book challenges you to be creative and live your life challenging yourself and experiencing your inner freedom, stepping out of your comfort zone, and believing in yourself with all your might. The technique and exercises presented will broaden your horizons and help you evolve. Challenge yourself to be happy and enjoy the little things that happen! Life sends you small joys and tries your patience and courage whenever a challenge comes that you have to overcome.

Building Better Universities Jos Boys, 2014-11-13 *Building Better Universities* provides a wide-ranging summary and critical review of the increasing number of groundbreaking initiatives undertaken by universities and colleges around the world. It suggests that we have reached a key moment for the higher education sector in which the services, location, scale, ownership, and distinctiveness of education are being altered dramatically, whether universities and colleges want it or not. These shifts are affecting traditional assumptions about both the future 'shape' of higher education institutions, and the roles of—and relationships between—learners, teachers, researchers, managers, businesses, communities and other stakeholders. *Building Better Universities* aims to bridge the gap between educational ideas about what the university is, or should be 'for', and its day-to-day practices and organisation. It roams across strategic, operational, and institutional issues; space planning and building design; and technological change, in order to bring together issues that are often dealt with separately. By analysing the many challenges faced by higher education in the contemporary period, and exploring the various ways universities and colleges are responding, this powerful book aims to support a 'step-change' in debates over the future of higher education, and to enable senior managers and faculty to develop more strategic and creative ways of enabling effective twenty-first-century learning in their own institutions.
